Summary

Results-driven **Business Analyst** with **5+** years of experience driving AI-powered product innovation across customer, sales, and e-commerce domains. Skilled in building and scaling solutions using **GenAI, ML, NLP**, and cloud platforms (**AWS, GCP, Azure**) to optimize revenue, **customer engagement**, and operational efficiency. Proven track record of delivering impactful products at HomeAdvisor and Justdial, with expertise in **cross-functional leadership, data-driven decision-making**, and Agile delivery. **Actively seeking opportunities** to lead AI-driven product strategy and innovation.

Awards

- Awarded as the “Top Performer” 3 times in a row at Justdial
- Received “Customer Impact Award” (x2) and features in the monthly “Spotlight” newsletter, and multiple “Shout-outs” for excellence in project delivery
- Certified AI Mastermind - Outskill
- Certified ScrumMaster® (CSM) – Scrum Alliance
- Tableau Desktop Qualified Associate

Experience

HOMEADVISOR
Business Analyst

Remote
Feb 2024 - Present

Delivered AI-powered customer and sales solutions, including call routing, live chat, transcription, and payment automation.

- Integrated **Smith.ai AI-powered call** routing with Twilio & Salesforce, reducing missed calls by 35% and improving sales productivity by 20%.
- Deployed **24/7 AI chat widget** (React, Node.js, Salesforce) across high-conversion pages, capturing **5K+ incremental** leads/month and reducing bounce rate by 18%.
- Managed product **sprints**, epics, and user stories in **Jira**, ensuring timely delivery of **AI-enabled product** releases
- Built **Power BI** dashboards for marketing **attribution** and **lead-scoring insights**, improving **decision-making** on campaign optimization and customer segmentation within **8–14 week agile cycles**.
- Experienced in leveraging **Excel's** advanced functionalities, including **pivot tables, VLOOKUPS, macros**, and **data validation**, to organize, analyze, and present data clearly and concisely, enhancing decision-making capabilities across various business functions
- Utilized **SQL** for data processing and **exploratory analysis** on **customer-engagement datasets**, uncovering behavioral patterns that influenced product roadmap decisions.
- Collaborated in **Agile** teams to deliver high-quality software solutions through iterative development and continuous feedback cycles
- Implemented **AI transcription & lead scoring** (AWS Comprehend, Smith.ai API, Tableau), cutting response times by 40% and boosting hot-lead conversions by 22%.
- Launched automated AI-driven payment collection & **fraud detection** (Smith.ai, Stripe, Salesforce Billing), reducing delayed payments by 30% and chargebacks by 15%.
- Partnered cross-functionally with **Sales, Marketing, Finance, Engineering**, and **Vendor teams** to deliver solutions in 8–14 week cycles from ideation → deployment.
- Leveraged customer research, analytics, and sales feedback loops to prioritize features, secure executive buy-in, and drive measurable revenue & NPS growth

J.P. Morgan Chase
Technical Product Analyst

Mumbai, India
Sept 2021 - Dec 2021

Optimized the Credit Card offer pages and offered solutions in the Chase Credit Card department.

- Led technical SEO enhancements for Chase credit card offers, including **metadata/meta tags, structured data**, and **CMS SEO implementation**, boosting organic traffic by **18%** in **3 months**.

- Streamlined cross-functional execution with Marketing and Engineering teams, optimizing crawl paths and page speed to improve **search visibility and user experience**.

JUSTDIAL
Technical Product Manager

Mumbai, India
May 2019 - Sept 2021

Client: Justdial Omni E-commerce Platform

Managed the product lifecycle of JD Omni web and mobile app, front-end and backend from feature planning to deployment, analyzing market trends, generating requirements, and writing user stories & epics

- Launched “**Most Relevant**” ranking feature on product listing pages (web + mobile) by leveraging Elasticsearch/Solr relevance scoring (**TF-IDF, BM25**), metadata indexing, and basic personalization; boosted customer sales by **12%** and increased overall e-commerce revenue.
- Drove migration to microservices architecture for the Grocery store category, enabling store-specific features via **Docker, Kubernetes, REST APIs, Kafka, PostgreSQL/MongoDB**; reduced churn by 18% and improved scalability, resilience, and delivery speed.
- Upgraded Sales Proposal Generator used by **CRM & Sales teams** by introducing a standalone E-commerce-only plan with a 7-day free trial; improved customer conversion rates by 16% within the first quarter.
- Partnered with Engineering, Sales, and CRM teams to manage the full lifecycle from ideation → deployment, balancing technical trade-offs in scalability, latency, and cost with business growth goals.
- Managing overall operations for executing projects involving scoping, planning, requirements, and **GAP analysis**, including interfacing with needs, training, and resources

Senior Business & Quality Analyst

May 2018 - Apr 2019

Analyzed the JD Omni software for business and quality purposes, ensuring the web and mobile app meet the business and quality requirements

- Reviewed and refined business requirements and functional specifications to ensure clarity and completeness.
- Led requirement-gathering sessions, collaborating with stakeholders to define project scope and objectives.
- Worked closely with cross-functional teams in Agile environments, contributing to **QA planning** and execution in sprints.
- Conducted various types of analysis, including gap and impact analyses, to identify risks and opportunities for process improvement.
- Facilitated **User Acceptance Testing (UAT)** sessions, ensuring alignment between system functionality and user needs.
- Performed comprehensive testing activities, including Functional, Regression, and User Acceptance Testing (UAT), to validate system functionality and performance

Projects

House Price Prediction using SAP Data Analytics & MS Excel (Kaggle Project)

- Generated a smart discovery story in SAP Data Analytics in Cloud using Linear & Non-linear Regression analysis, explaining to users the overview of the training data set, the distribution of the data set, the contributions of different dimensions, and the influences of all dimensions in the forecasting tab that contribute towards better prediction of the house price.
- Uploaded the project on Kaggle, which showed an RMSE of 0.12850 and a ranking of 994 on Kaggle's leaderboard. (Among the Top 5 students in the batch with the highest leaderboard ranking)

Performance Tracking Dashboard (Tableau + SQL)

- Built executive dashboards to monitor strategic KPIs and visualize roadmap progress, enabling leadership to make data-informed decisions

Retail Pricing Engine (Python + ML)

- Designed a predictive pricing model resulting in a theoretical margin improvement of 11%, showcasing strong alignment of analytics with strategic goals

Skills

- **Databases:** MySQL, SQL Server Management Studio, Oracle, Snowflake
- **Programming Languages:** Python (NumPy, Pandas, Matplotlib, Scikit-learn), R, Java, SQL, PL/SQL, Python, HTML, Bootstrap, CSS, JavaScript, JQuery
- **Tools & Libraries:** Excel, PowerPoint, JIRA, Confluence, ServiceNow, Trac, SAP ERP, Spyder(anaconda3), MS Access, Visual Studio, Google Analytics, AWS, Google Cloud, MS Azure, Eclipse

- **Data Visualization:** Data Analysis in Excel, Tableau, Power BI
- **AI:** GenAI, Prompt Engineering/Optimization, Vibe-coding, Agentic AI, No-code/Low-code AI, RAG
- **Machine Learning:** Supervised ML (Linear and Logistic Regression, Decision Trees), Unsupervised ML (K-means, PCA), NLP, Classification techniques (binary classification, multi-class classification), A/B testing
