Professional Summary

Senior Data Engineer with 14+ years of experience in Business Intelligence, Data Warehousing, and Cloud Data Platforms, delivering scalable data solutions across education, banking, insurance, and manufacturing industries. Expert in Snowflake, ETL pipelines, SQL, and automation, with proven success in reducing processing times, optimizing data platforms, and ensuring compliance for sensitive financial and student data. Adept at collaborating with cross-functional teams, leading migrations, and mentoring teams to drive efficiency and innovation.

Core Skills

- Data Platforms & Tools: Snowflake | Informatica (8.6/9.1) | Ab Initio | SSIS | Control-M | Appworx
- Databases: Oracle (9i/10g) | MS SQL Server | Teradata
- Programming & Scripting: SQL | PL/SQL | Python | Unix Shell Scripting
- Data Engineering & ETL: Pipeline Automation | Data Migration | Data Modeling | Performance Optimization
- Other Skills: Problem Solving | Stakeholder Management | Agile Collaboration | Documentation

Professional Experience

PowerSchool Inc. – Senior Application Specialist

Apr 2022 – Aug 2025 | Tools: Snowflake, SQL, Unix

- Engineered and optimized Snowflake-based data platform supporting millions of student and educator records worldwide.
- Worked closely with clients to troubleshoot urgent batch or data issues by reviewing files and resolving the issues using Linux / SQL tools the team has developed.
- Created customizations of standard code to meet client reporting requirements.
- Reduced report generation time by 25% and improved query speed by 20% via schema optimization and SQL tuning.
- Automated ETL pipelines (1M+ records/day) using Unix scripting, accelerating real-time data availability.
- Led migration of legacy data systems to Snowflake, ensuring compliance with student privacy standards.
- Partnered with architects and product managers to deliver reliable, scalable data-driven solutions.

MetLife Insurance (Infosys) – Technology Lead

Mar 2021 – Oct 2021 | Tools: SSIS, Informatica, ServiceNow

- Managed sensitive disability and insurance claims data for the DFSS application.
- Owned triage of production issues, designing preventive measures that reduced recurrence.
- Developed and maintained documentation (BRDs, use cases, test cases), improving stakeholder visibility.
- Collaborated with business teams to ensure timely delivery of solutions.

J.P. Morgan Chase (TCS) – IT Analyst

Aug 2018 – Oct 2019 | Tools: Ab Initio, Python, Unix, Oracle, Control-M

- Designed a Python-based framework replacing costly ETL processes, saving \$30M across EMEA.
- Built validation, file watcher, and archival processes to streamline staging workflows.
- Ensured risk mitigation through proactive identification of technical issues.

Credit Suisse (TCS) – Business Analyst

Apr 2017 – Jul 2018 | Tools: Informatica, SQL, Unix

- Gathered requirements for Myriad risk management platform integration.
- Prepared functional specifications and mapping documents to streamline system migration.
- Took additional responsibility to support QA and UAT.

PNC Financial Services (TCS) – Business Analyst / Developer

Oct 2016 – Mar 2017 | Tools: SQL, Teradata

- Developed Basel II/III compliant data warehouse for enterprise reporting.
- Authored BRD and TR documents used by downstream development teams.

Earlier Roles (2010 – 2016) – TCS, Capgemini, IGATE

Roles: ETL Developer, Unix Developer | Clients: Royal Bank of Scotland, GE Aviation, HP, AT&T

- Delivered ETL solutions using Informatica, PL/SQL, Unix scripting, and Oracle.
- Designed AML monitoring systems, MDM enhancements, and sales data warehouses.
- Developed automation for regulatory compliance and export control data systems.

Education

Bachelor of Computer Science & Engineering – Pune University, India (2009)
