## Professional Summary

Experienced Quality Assurance Engineer with a strong foundation in QA processes, management skills and a Master's degree in Total Quality Management. Passionate about delivering high-quality software, I have over 10 years of experience applying an ROI-driven approach to ensure end-to-end quality across Web, Desktop, API, IoT and Mobile applications. My expertise spans Manual, API, Gaming, Database, Performance and Automated Software Testing, seamlessly integrated with CI/CD pipelines in fast-paced Agile cross-functional teams. With a deep understanding of business challenges and project requirements. I am committed to continuous learning, enhancing quality standards and promoting best practices in quality assurance.

## Technical Skills

**Testing and Tracking Tools:** Putty, PowerShell, WinSCP, Postman, JMeter, Selenium IDE, GitLab CI/CD, Jenkins, TortoiseSVN

**Reporting and Analytics Tools:** Grafana

**Automation tools:** JMeter, Postman, SeleniumIDE

**Database Tools:** SQL, MySQL, DB browser for SQLite

**Platforms:** Ubuntu, Linux, Windows 10 IoT Core, Windows 7 IoT Core, Windows XP, Vista, 7, and 8, Android, iOS, Raspberry Pi(IoT), Emulator, Simulator, Android Box, iPad, Tablet

**Defects Trackers:** Jira, Mantis, Fogbugz, Wrike, Redmine, TFS, Trello, BugZilla, Trello, Asana, Assembla, Atlassian Confluence, TestRail

**Environments:** JAVA, Php, Dot NET, Linux, Python, C#

**Script Language:** C, C++, C#, PHP, HTML, CSS

## Professional Experience

### SELLERCLOUD | PRINCIPAL SQA ENGINEER

July 2023 – To Date

- Tested game functionality, Usability and user experience across the Android, iOS, iPad, Tablet devices, Emulators, Simulators, Web and different OS environments.
- Lead and managed test team and maintained testing schedules of project.
- Carried out test development, requirement analysis, risk identification, estimation, Test planning, execution, reporting, and closure states of project.
- Developed, executed and maintained Test plans, Test Scenario, Test Case and Traceability Matrix documents to ensure test coverage.
- Reported, verified and tracked test results, discussed KPIs to evaluate resolution and ensured that database is up to date throughout the software development lifecycle
- Collaborated with development teams to identify requirements, assisted them in the reproduction of bugs and provided feedback on resolution of defects.
- Executed black-box, gray-box testing. Also executed white-box testing with the developer.
- Tested QR code, Catalog, Inventory, Warehouse, Order, Purchasing, Shipping Management, Reporting, Accounting, APIs workflows features on Emulators, Simulators, Web application, Android, iOS, and different OS environments.
- Executed Security testing (Vulnerability testing, Ethical Hacking and SQL Injection) to enhance cybersecurity
- Performed Functional and Non-functional testing, Regression Testing, Ad Hoc, Database verification, Backend data verification, UI/UX testing, UAT, Sanity, Smoke and API testing for Positive and Negative Test Cases of the application.
- Tested APIs using Postman and JMeter for Performance tests of application
- Tested application for Localization and Globalization.
- Carried out daily Scrum, Retrospective meeting, weekly QA meetings, project walkthroughs, and reviews.

### TEKHQS | PRINCIPAL SQA ENGINEER

March 2022 – June 2023

- As a project lead involved in complete SDLC and STLC processes.
- Managed QA team tasks, trained juniors and new team members for project domain and QA tasks.
- Conducted Functional and Non-functional testing on NetSuite and Loadstop applications.
- Performed Integration, System testing, Performance testing, Regression, Smoke, Sanity, Ad Hoc testing and User Acceptance testing on the application, Database testing and Backend data verification.
- Created and Executed Test Plan, Requirement Traceability Matrix, Test Scenario and Test Case documents, based on requirements.
- Assigned troubleshooting testing defects, identified defects, reported, verified and tracked bugs using Jira and maintained product health metrics KPIs.
- Attended Change control meetings with client and offshore team and executed Change management process.
- Carried out weekly QA meetings, project walkthroughs, and reviews and daily scrum meetings.

**Strategic Systems International | PRINCIPAL SQA ENGINEER****October 2015 – March 2022**

- Conducted Functional Testing, Cross Browser Testing, Smoke testing, Sanity, Usability (UI/UX) Testing, Regression Testing, Unit testing, Integration Testing, System Testing, Security testing, Performance testing and User Acceptance testing.
- Tested application on Android, iOS, Emulator, Simulator, developer tools, Virtual machines, IoT, different OS and environments.
- Executed Performance testing (Stress, Load, Spike, Volume, Capacity) of application on IoT devices.
- Tested application's memory leaks and verified complete application logs for errors.
- Used Grafana charts for visualizing and verifying ETL of data, timestamps, conversion and storage.
- Tested data of application for different regions by Globalization and Localization testing on Virtual machines and different Operating Systems.
- Verified application flow and data verification with simulators, scripts, system logs files, excel data files, data generators, backend data flow, database and FTP files.
- Tested APIs using Postman and Jmeter for Performance tests of application.
- Created automation Test Scripts using Postman for Regression testing of the Application.
- Created detailed Timelines, Test Plans, Requirement Traceability Matrix, Test Scenario and Test Case documents, based on requirements.
- Carried out testing activities by Identifying, reporting, verifying and tracking bugs through bug tracking tools.
- Trained team members for QA tasks and on ISO27001 standard.
- Organized strategy review meetings.
- Managed SQA team, monitored and maintained quality and compliance targets, ensuring that all QA Tests are carried out on time and in full.

**SolitonTechnologies | SENIOR SQA ENGINEER****March 2014 – October 2015**

- Conducted Functional Testing, Cross Browser/ Compatibility Testing, Smoke, Sanity, Load and Stress Testing, Usability (UI/UX) Testing, Regression Testing, User Acceptance testing, Integration and System Integration Testing.
- Tested application and games on different OSs, Android Box, Android and iOS Smartphones, Tablets and Simulators.
- Created Test Plan, test Scenario and Test Case documents based on test strategy, business requirements and business rules.
- Created Technical manual of product for new features.
- Executed test cases for tracking and validating software requirements.
- Deployed and updated build on (Android Box, Android and iOS devices, Tablet, iPad) using TortoiseSVN.
- Maintained test reports, product health matrices, validated data in reports and tracked bugs to determine open/closed/Reopened/ Deferred bug count for the ongoing build.
- Identified bugs, Executed Bug Root Cause Analysis and monitored product to ensure high standards of quality.
- Gave training and demos to team and clients (on new features of product) and prepared Training Documents to improve customer experience.
- Participated in a Joint Application Development(JAD) session with the Project Manager and client.
- Deployed product builds on client's site.
- Attended meetings with Project Manager and the Client for understanding and finalizing the requirements for new projects and new modules/features in the product.
- Worked with cross-functional and offShore teams to manage defects, compile test results, communicate status, evaluate risks and issues on a timely basis to ensure the solution meets the business requirements.

**SwaamTech | SQA ENGINEER |****July 2012 – February 2014**

- Performed Functional, Regression, Compatibility testing (Cross-Browser and Cross Platform), Smoke, Sanity, Regression Testing, Usability (UI/UX), AdHoc testing and User Acceptance Testing of application.
- Tested application on different Smartphone devices(Android, iOS, Blackberry), Simulator, Emulator, Operating Systems, iPad and Android tablets.
- Tested different web applications, Mobile applications and Desktop applications.
- Based on the Use Case and Functional Design Requirements, created and executed test cases, test scenarios.
- Identified, Reported and tracked bugs, defects, improvements and deficiencies using Jira.
- Coordinated in requirement analysis, defect management and review meetings with different teams.
- Reported work status to the Team Lead and the Project Manager in Scrum meetings. Also attended Sprint Planning and Retrospective Meetings.

**Education****Masters of Science in Total Quality Management****| 2015 - 2017****Bachelor of Science in Computer Engineering****| 2008 - 2012**
