

Tiraj KC

Virginia, US

Phone: 840-777-6140

Email: tirajkc@gmail.com

LinkedIn: <https://www.linkedin.com/in/tiraj-kc>

Professional Summary:

- ❖ Around 5 years of experience with Java/J2EE and Object-Oriented Methodologies for wide range of development from Enterprise applications to web-based applications.
- ❖ Handsome experience in Struts, Spring, JSF, Hibernate, SAX, JAXB, DOM, ANT, JMS, and LOG4j, Splunk, Spring IOC, Data Access Object (DAO), Junit and web services.
- ❖ Extensive experience in Core Java concepts that includes Exception handling, Multi-threading, Synchronization, Serialization, IO, Collections framework, Java Beans.
- ❖ Strong experience in design and development of multi-tier application utilizing Java, Servlets, Struts, JSP, JSF, XML, SOAP JNDI, JDBC, Web Services, Hibernate and Spring Framework.
- ❖ Knowledge of Cassandra maintenance and tuning - both database and serve
- ❖ Experienced in Restful Services and distributed Web Services using Spring MVC, Jersey, JAXB, JSON, SOAP, AXIS, JAX-WS, and WSDL.
- ❖ Hands-on experience with Integration Frameworks like Apache Camel and also with distributed database, caching and processing platform like Apache Ignite.
- ❖ Experience in developing software using RESTful APIs, SDLC and Agile Methodology (Scrum), RUP, Waterfall, UML and Test-Driven Methodologies.
- ❖ Used JBoss 6.x Application server to deploy the applications.
- ❖ Good knowledge of latest version of object-oriented JavaScript frameworks like Angular.js, Node.JS, Backbone, Bootstrap, React JS.
- ❖ Valuable experience in designing and developing business applications with technologies such as core and advanced Java technologies Java, J2EE, Servlets, JSP, JavaScript, jQuery, Web Services, Struts, Spring, Hibernate, Maven, Gradle, ANT, HTML, XML, XSLT, XSD, JDBC, Cascading Style Sheets (CSS), JNDI, JUnit and XML-related technologies.
- ❖ Hands on experience with scripting languages like JavaScript, jQuery and AJAX.
- ❖ Responsible for developing single page applications using AngularJS/Angular 4/5/6/7 and bootstrap Hands-on experience in MVC framework using AngularJS, custom Directives, Controllers, Services and Factories.
- ❖ Worked extensively on Session Beans, Entity Beans and Message Driven Bean and implemented JMS API, and worked on MQ-Series.
- ❖ Exposure to service Oriented Architecture including Universal Descriptive and Discovery Integration (UDDI)lookups, Web Services Description Language (WSDL) using SOAP protocol and Extensible Markup Language (XML) and Java XML parsers such as JAXP.
- ❖ Extensive experience in working with different MVC Frameworks like spring, Struts and ORM (Object Relational Mapping tools) like Hibernate.
- ❖ Experience with test-driven development (TDD) using Junit.
- ❖ Experience in implemented business logic on XML content using XPath Query Language, DTD, XSD, XSLT, JAXP (DOM & SAX), and JAXB.
- ❖ Developed Java applications and tools to automate tests run in UNIX environment.
- ❖ Hands-on experience in IDE Tools: Eclipse, RAD, WSAD.
- ❖ Good at implementing the database designing, SQL, stored procedures using RDBMS like DB2, Oracle and MS SQL Server.
- ❖ Experience with Streaming platforms like Apache Kafka.
- ❖ Proficient in handling Web and Application Services in creating Domain, configuring connection pool, JMS, deploying applications on WebLogic, WebSphere, Apache Tomcat and JBoss.

- ❖ Expertise in web application development using HTML, CSS, JavaScript, jQuery, Ajax, AngularJS, jQuery, Bootstrap.
- ❖ Used the basic principles of MVC to incorporate the AngularJS to build client-side application and Node.js for building server-side API's.
- ❖ Used JavaScript, jQuery for user interactions in pages. Creating a responsive web application integrating Bootstrap with AngularJS and media queries.
- ❖ Having experience on DOJO based applications.
- ❖ Have strong experience in code debugging and bug fixing.
- ❖ Used Version Control (SVN), CVS, Clear Case for maintaining source code and documentation.

Technical Skills

Languages	Java 8.0/7.0/6.0, Java/J2EE, C, C++, Kotlin,JDBC, DTD, UML, Design Patterns, Shell Scripts, HTML, PHP, JavaScript, typescript,SQL and PL/SQL, Groovy Grails 3, Ruby on Rails.
Frameworks	Spring 5.x/4.x/3.x/2.x, Hibernate 4.0/3.0, Apache Camel, Struts 1.x/2.0.
Web Technologies	HTML/XHTML/DHTML/HTML5, CSS/CSS3, Servlets, JSPs, EJB, JNDI, JMS, XML, XSLT, JSF, jQuery, Ajax, AngularJS, Angular4 and 5.2, Node.js, ReactJS, BackboneJs, Bootstrap.
Web/Application Servers	Apache Tomcat 5.x/6.x/7.x/8.x, IBM WebSphere, BEA Web Logic 9.x/10.x/12.x, JBoss 6.x/7.x,
IDE's	Eclipse, Spring Tool suite 2.x/3.x, IntelliJ 14.x/15.x, Visual Studio code
Database	Oracle 12c/11i/11g/10g/9i/8i, SQL Server, MySQL5.7, DB2, MongoDB and Cassandra, PL/SQL11
Web Services	AXIS, SOAP, RESTful, JAX-RPC, JAX-RS, JAX-WS, WSDL, JAX-P, JAX-B, GraphQL,
Version Control	JIRA, CVS, SVN, GitHub, Subversion and Clear Case
Build Tool / plugin	ANT, Log4j and Maven 3.x, Hudson 3.x, Jenkins 2.x, Gradle 6.x
Testing Frameworks	Junit, JMeter, Jtest, SOAP UI, Jasmin. Karma, Groovy Spock, cucumber, Splunk
Operating Systems	Windows, Unix, Linux and MAC.
Cloud Computing	EC2, Simply Storage Service, Cloud Front, Relational Data Base, Virtual Private Cloud, Route 53, Cloud Watch, Cloud Trial, Identity and Access Management, Simple Notification Service, AWS EMR, AWS CLI, Terraform
Network Protocols	TCP/IP, DHCP, DNS, SNMP, OSPF, VPN
Micro Services	Swagger, Pivotal Cloud Foundry, Spring Micro Services, Springboot, Spring Integration, Netflix Eureka, Spark

Professional Experience

American Express Company, Sunrise, Florida

Senior Software Engineer (Sep 2023 -July 2024)

Responsibilities

- Working closely with Business team, Product Owners and other functional teams to form a team effort in development by following Agile methodology i.e Extreme programming (XP).

- Designing and developing the application components by Test Driven Development (TDD) approach using Mockito framework.
- Utilizing pair programming approach for maintaining high quality code.
- Using Core Java/J2EE, XML, JAXB API, JDBC, IBM DB2, IBM MQs, Activation Specs, JNDIs, Web Services, Spring Framework and Rational Application Developer (RAD) in integration with WebSphere as development environment in developing new components in the CMP application.
- Designing and developing the REST based Microservices using spring boot.
- Using J2EE, JSON, JACKSON API, RESTful Webservices, spring technologies and STS as development environment in developing Microservices architecture for new functionalities in CMP application.
- Involving in writing the controllers that react to the navigation of user interactions with the services.
- Developing XSLTs in transforming the XML input messages into the appropriate XML outputs required for the application.
- Hands on experience on TOAD (DB2) for the data maintenance using SQL queries and Pitney Bowes for content management.
- Making use of the WSDL and XSDs to generate client jars in implementing SOAP webservices.
- Extensively working with JMS API for sending messages between two or more components asynchronously.
- Working with all the delivery methods for all the alerts dealing with bugs Fixation and defect clearance as reported.
- Working with MQVE in dropping the XML messages manually into the queues while debugging.
- Utilizing static and dynamic analysis techniques to assess internal and third-party applications for Security vulnerabilities.
- Good exposure in dealing with UNIX commands for setting up CRON jobs for batch processing.
- Migrating the code repository/versioning tool from Serena Dimensions to GIT for better maintenance purpose.
- Working on developing the process and structure required for Jenkins and creating the multibranch pipelines for continuous integration and continuous delivery (CI/CD).
- Expertise in using built tools like Maven and ANT for the building of deployable artifacts such as jar, war & ear from source code.
- Using Postman, ARC and SOAP UI REST clients for integration testing of web services and Mockito framework for unit testing.
- Using Veracode tool for scanning the applications for security constrains and to trace down any vulnerabilities.
- Building components around the analytics and audit to deal with the data from client and members so that it can be used for research and future development.
- Developing documentation to support the subsequent deployment of the interface components.
- Participating in retrospective meetings after every sprint to discuss about the overall ranking of the pervious sprint and to discuss about the drawbacks and scope for development.

Environment: Rational Application Developer, STS, Spring Boot, JAVA/J2EE, EJB, Spring, MQVE, FileZilla, JDBC, Restful Web Services, SOAP, WSDL, JUnit, ANT, MAVEN, WebSphere Application Server v8.5, XML, JNDI, XSLT, XSD, JMS, JSON, JAXB, JACKSON, HPSM, HPQC, Postman, ARC, SOAP UI, GIT, JENKINS, MQs, JIRA

Cubic Technologies LLC, Texas

Software Engineer (May 2023 - Sep 2023)

- Developed Java applications for customer portfolio management, enhancing data tracking and performance.
- Integrated third-party APIs to expand functionality and improve user accessibility.
- Wrote efficient, maintainable code following industry best practices.
- Conducted unit testing and debugging to minimize application errors.
- Optimized backend operations using Spring Boot and Hibernate.
- Migrated critical systems to the Azure cloud platform, reducing infrastructure costs.
- Engineered secure microservices, implementing Spring Security and JWT.
- Created sequence diagrams and use cases to ensure seamless application flow.
- Designed dynamic user interfaces using Angular, HTML5, and CSS.
- Maintained version control with Git, ensuring efficient team collaboration.

Environment: Java, Spring Boot, Angular, MySQL, RESTful APIs, Azure, Git, Docker, Jenkins.

Fidelity Investments, Dallas, TX

Software Developer (Feb 2022 – Apr 2023)

Responsibilities:

- Involved in the design and development phases of Agile Software Development.
- Developed java modules implementing business rules and workflows using Spring Boot.
- Involved in Sprint planning for the estimation of efforts for user stories and bugs.
- Designed and developed the REST based Microservices using Spring Boot.
- Resolved the CSS and JavaScript related issues across all platforms of web application.
- Participated in development of a well responsive single page application using ReactJS framework and JavaScript in conjunction with HTML5, CSS3 standards, with front end UI team.
- Performed GET and POST requests in Ajax call of XML, JSON using JavaScript, jQuery.
- Extensively worked with Core Java Collection classes like Array List, Hash Map, and Iterator etc.
- Used JAVA Mail API and implemented an automated functionality to generate e-mails.
- Developed SOA and J2EE web services based on SOAP, WSDL, UDDI, JAX-WS, JAXB, JAXRPC using tools like Apache Axis.
- Designed and developed Web application to generate reports using Java-J2EE technologies.
- Manage datasets using Panda data frames and MySQL, queried MYSQL database queries from python using Python-MYSQL connector and MySQL dB package to retrieve information.
- Involved in the Web/Application development using Python, HTML5, CSS3, AJAX, JSON, and jQuery.
- Generated Python Django forms to record data of online users and used PyTest for writing test cases.
- Deployed Spring Boot based micro services and Docker container in internal cloud server.
- Created and consumed Microservices based on Web API.
- Used Micro service architecture with Spring Boot based services interacting through a combination of REST and Apache Kafka message brokers and Developed data pipeline using Apache Kafka.

Environment: Windows family, Oracle 11g, J2EE, Servlets, JSP, Struts2, Spring, Hibernate, Web Sphere, Java script, Ajax, AngularJS, HTML, CSS, log4J, Junit, and XML.

Apple Inc., Austin, Texas

Software Engineer (Oct 2021 - Feb 2022)

Responsibilities:

- Involved in design discussions and understanding of business requirements and identify the relevant functional and technical requirements.
- Worked with Spring Core, Spring MVC Framework for Dependency Injection (DI), and Spring Context to provide message sources.
- Used Struts framework to follow MVC Architecture in the application server
- Managed connectivity using JDBC for querying/inserting & data management including triggers and stored procedures.
- Implemented Business processes such as user authentication, using Session EJB
- Intercepting filter design pattern used for all the pre-processing and post-processing purposes which include session validation, authorization, logging.
- Designed and developed presentation layers using JSP, Java Beans, CSS, HTML, DHTML, jQuery and JavaScript, Json in UI pages.
- Writing JavaScript functions for various validation purposes. Writing Java Beans to contain data objects. Implemented session beans, entity beans, and message-driven beans.
- Develop custom directives, controllers, views and filters using Angular 2/4/6
- Dynamic form generation auto-completion of forms and user-validation functionalities using AJAX.
- Used SOAP JAXB for producing web services and involved in writing programs to consume web services
- Developed the application using Spring MVCFramework that helps in separating the business logic, presentation logic and navigation logic
- Written Spring Core and Spring MVC files to associate DAO with Business Layer
- Written different Routing (SPA), modules and reusable components using Angular 4
- Involved in AWS EC2, Amazon S3, Amazon Elastic Load balancing and other parts of AWS infrastructure.
- Setting up daily Status meetings with the team and communicate status to Project Manager.
- Worked with the Business team during UAT to review the requirements for any new functionality or enhancement
- Worked with server admin and deployed the application on to the production and Stage Servers.
- Worked on the jQuery JavaScript Library that simplifies HTML document traversing, and event handling.
- Deployed the applications on IBM WebSphere Application Server

Environment: Java 8, Java Beans, J2EE, SOAP, Spring, AWS, CXF, Ajax, jQuery, JSP, XSD, XML Bean, WebSphere, DB2, JUnit, Angular 2/4/6, Log4J, FileZilla, Spring Framework security using LDAP, TFS, SharePoint, RAD, DB2, Mainframe Platform.

IMCS Group, Irving, TX

Software Developer (Feb 2019 - Oct 2021)

Responsibilities:

- Involved in analyzing micro services architecture challenges, design analysis, development of the user stories, assigning tasks, testing the application.
- Involved in dividing the functionality into multiple micro services, carefully designed to have high CPU utilization to take advantage of the scalability.
- Developed micro services using Spring Boot, built using the Maven, runs as jar file on embedded tomcat sever.
- Removed EJBs from the original application and used Spring Core to make it compatible with Tomcat server. Used Spring DAO layer to make database operations on oracle database.
- Exposed micro services as both SOAP and RESTful web services using Spring Soap, Rest controllers.
- Used Spring Cloud Config server to load the properties dynamically, Spring Eureka service registration and discovery client for maintaining instances and use ribbon load balancer to balance the load between multiple instances of the same service.
- Developed end-to-end API Design and development using Swagger JEE and Spring Boot for micro services.
- Used slf4j for developing loggers.
- Deployed micro services on to PCF and involved in finding optimum cloud instance environment variables and application specific system variables.
- For better integration, configuration and deployment (CI/CD), AWS code pipeline was used in this application development work flow.
- Developed complex SQL queries and stored procedures, involved in creating Database objects such as functions, triggers, tables, views, packages.
- Created Jenkins jobs for continuous integration and continuous delivery to AWS environment.
- Debug troubleshoot and resolving defects encountered during various testing cycles
- Support during SIT, UAT and Regression testing Phases and Perform production release support and maintenance.

Environment: Java 1.8, J2EE, Agile Methodology, Spring Boot, Micro Services, Spring Rest, Spring SOAP, Spring Config Server, Eureka Registry Server, Eclipse, XML, SQL, JDBC, slf4j, Oracle 11g, Maven, Java Mail, SOAP, AWS, LOG4J, GIT, Jira, Confluence, Jenkins, Pivotal Cloud Foundry, Axis 1.2, Oracle 11g.

Education

University of the Cumberlands, Kentucky

M.S. in Information Technology (Jul 2024 – Dec 2025)

Wilmington University, Delaware

B.S. in Computer Science (Graduated 2021)
