

TYLER ABEL

SUMMARY

Full stack software engineer with 7+ years of experience in application design, development, and deployment across various industries. Expert in full stack development, proficiently handling both front-end and back-end tasks to ensure efficient project completion. Demonstrated success in mentoring junior developers and managing large-scale projects, achieving a notable 90% performance improvement. Excel in both independent and team settings, bringing leadership experience from established enterprises and startups. Dedicated to continuous learning and staying abreast of the latest technologies to foster innovation and exceed client expectations.

SKILLS

Frontend Development

HTML5, CSS, CSS3, Tailwind, Bootstrap, React.js, Vue.js, Angular, jQuery, Redux, JavaScript, TypeScript, Next.js, Webpack, Socket.io

Backend Development

Python, Django, Flask, FastAPI, Django Rest Framework, Celery, Kotlin, Elixir

Frameworks & Libraries

Django, Flask, FastAPI, Django REST Framework, Celery, SQLAlchemy, SciPy, NumPy, OpenCV, Machine Learning

Databases & Storage

PostgreSQL, MySQL, MongoDB, DynamoDB, RedisSQL, NoSQL

DevOps & Infrastructure

CI/CD Pipelines, GitLab CI, Docker, Kubernetes, Jenkins, Travis CI, AWS, AWS CodePipelineGCP, Digital Ocean, Terraform, HerokuMonitoring: Datadog, New Relic

API & Authentication

RESTful API Design, GraphQLJWT / OAuthChannels (WebSockets)

Collaboration & Testing

Jira, ClickUp, Trello, FigmaAgile/Scrum, Kanban, Pytest, Jest, Selenium, TestCafe, RSpec, Cypress, TDD

EDUCATION

Bachelor's Degree

Senior Full Stack Software Engineer

📞 (213) 568-6527 @ tylerabeldev@gmail.com ☆ <https://github.com/script-ex>

EXPERIENCE

Senior Full Stack Software Engineer

01/2022 - Present

TheApexCraft

- Led a team of 4 engineers to develop and maintain web applications utilizing Python, Django, flask and React, leading to a 40% boost in productivity and a 15% decrease in development cycles
- Designed database architecture for applications using Postgres and MySQL, achieving a 30% boost in query performance
- Executed DevOps and CI/CD pipelines using Jenkins, elevating code quality by 25% and reducing deployment time by 65%
- Engineered server less solutions with AWS, Azure, Lambda, enabling scalable operations and reducing operational costs by 50%
- Leveraged Agile methodologies, object-oriented design principles in Python, REST, SOAP, JavaScript, and React, leading to a 30% increase in development velocity and a 20% reduction in time-to-market for projects
- Extended the build system to integrate with the Mercurial sparse feature, cutting 47% performance issues
- Engaged with team members, employing Git for version control and GitHub for project management, leading to a 35% reduction in deployment errors
- Demonstrated mastery in React.js for frontend development and MongoDB for database management, resulting in a 20% enhancement in application performance and data management efficiency
- Created and wrote result reports in different formats like TXT, CSV, XIS, and JSON while working on CSV files and try to get input from MySQL database to ease company processes and ensure continuity

Full Stack Developer

08/2019 - 01/2022

Bizzabo

- Headed a team in developing REST APIs with Python, facilitating seamless communication between frontend frameworks and web applications, resulting in a 30% increase in data transfer efficiency
- Engineered scalable applications utilizing Python with Django and Flask frameworks, along with React.js, Node.js, Express.js, and MongoDB, yielding a 25% increase in development efficiency
- Applied Docker and Kubernetes to expedite deployment processes, achieving a 50% decrease in deployment time and a 40% improvement in deployment reliability
- Developed Web application using Flask framework for the backend and React/Next and Vue.js for frontend, with hands-on experience leading to a 20% improvement in application performance and efficiency
- Introduced automated testing frameworks, resulting in a 40% decrease in bug incidents and a 45% increase in overall system stability
- Collaborated with cross-functional teams to troubleshoot issues, conduct application profiling, and enhance performance, leading to a 25% increase in system efficiency
- Deployed applications to AWS, Kubernetes, and Heroku, ensuring 45% scalability

Software Engineer

06/2017 - 08/2019

Letsremotify

- Applied Agile methodologies and object-oriented design in Python, RESTful, SOAP, JavaScript, resulting in a 25% faster project delivery rate and a 10% improvement in code maintainability
- Strengthened security measures through advanced authentication and authorization protocols, reducing security vulnerabilities by 65%
- Directed teams to design visually appealing user interfaces using Bootstrap, Tailwind CSS and Material UI, resulting in a 10% reduction in bounce rates
- Deployed complex front-end functionalities using AngularJS and React, leading to a 10% increase in user engagement and satisfaction across devices
- Implemented robust authentication and authorization mechanisms utilizing OAuth, JWT, and Spring Security, resulting in a 40% reduction in unauthorized access incidents and a 25% improvement in overall security posture
- Implemented efficient data storage solutions utilizing MySQL, PostgreSQL, MongoDB, and DB2, resulting in a 30% improvement in data retrieval speed
- Integrated seamlessly with a range of cloud services, including AWS S3 and Google Drive, achieving a 20% reduction in file storage and retrieval time for enhanced efficiency
