SUMMARY

Results-driven Data Engineer with 4 years of experience in designing, developing, and maintaining scalable data pipelines and real-time processing systems. Proficient in Python, SQL, Scala, and Shell scripting for automating complex data workflows and handling large-scale data operations. Experienced in big data ecosystems using Apache Spark, Hadoop, Hive, and Pig, along with real-time streaming using Apache Kafka and Spark Streaming. Skilled in orchestrating ETL workflows with Apache Airflow, AWS Glue, and Talend. Strong expertise in AWS cloud services, including S3, Redshift, Lambda, Glue, CloudWatch, IAM, and Step Functions, as well as database systems like Snowflake, PostgreSQL, MySQL, DynamoDB, and MongoDB. Adept in implementing infrastructure automation and CI/CD pipelines using Docker, Kubernetes, Jenkins, and Terraform. Demonstrated success in maintaining data quality and compliance with PCI-DSS and HIPAA, and experienced in monitoring and debugging with Datadog, Power BI, Jupyter Notebook, Visual Studio Code, and collaboration via Git, Bitbucket, and Azure DevOps.

TECHNICAL SKILLS

Programming Scripting: Python, SQL, Scala, Shell Scripting

Big Data Processing: Apache Spark, Hadoop, Hive, Pig

Streaming Real-Time Processing: Apache Kafka, Spark Streaming

ETL & Workflow Orchestration: Apache Airflow, AWS Glue, Talend

Databases Data Warehousing: AWS Redshift, Snowflake, PostgreSQL, MySQL, DynamoDB, MongoDB

Cloud Platforms Services: AWS (S3, Redshift, Lambda, CloudWatch, Glue, IAM, Step Functions)

Infrastructure DevOps for Data Pipelines: Docker, Kubernetes, Jenkins, Terraform, CI/CD Pipelines

Monitoring, Debugging Development Tools: Jupyter Notebook, Datadog, Visual Studio Code, SQL Server Management Studio

Data Governance Compliance: Data Lineage, Data Quality Checks, PCI-DSS, HIPAA

Version Control Collaboration: Git, Bitbucket, Azure DevOps

Data Visualization: Power BI

WORK EXPERIENCE

American Express

Plano, TX

Data Engineer

April 2024 – Present

- Designed and deployed real-time streaming pipelines using Apache Kafka and Spark Streaming to process financial transaction data at scale.
- Built and orchestrated robust ETL workflows with Apache Airflow and AWS Glue, integrating data from multiple structured and semi-structured sources.
- Utilized AWS services (Lambda, S3, Redshift, Glue, Step Functions) to implement serverless architecture and manage cost-efficient data workflows.
- Developed distributed batch processing jobs using Apache Spark in Scala, reducing data processing time by 40%.
- Established CI/CD pipelines with Terraform, Docker, and Jenkins for automated deployment of data infrastructure in production environments.
- Implemented data quality checks and lineage tracking to maintain compliance with PCI-DSS and HIPAA regulations.

Humana Healthcare Inc

Louisville, KY

Data Engineer

January 2023 – March 2024

- Developed scalable data ingestion frameworks using Python and SQL, ingesting data into Snowflake, PostgreSQL, and DynamoDB from API and streaming sources.
- Managed big data workflows on Hadoop, performing data wrangling with Hive and Pig for data lake aggregation.
- Built containerized ETL jobs using Docker and deployed them via Kubernetes to cloud-native environments.
- Integrated Talend ETL pipelines with data warehousing platforms like AWS Redshift for enterprise reporting.
- Collaborated on monitoring and alerting dashboards using Datadog, reducing downtime and enabling proactive issue resolution.
- Used Azure DevOps for version control, sprint planning, and release tracking across multiple development teams.

Reliance Retail

Bengaluru, India

Data Analyst

January 2021 – Nov 2022

- Created dynamic dashboards and ad-hoc reports in Power BI to visualize KPIs and business metrics for executive decision-making.
- Wrote complex queries in MySQL and MongoDB to extract and clean data for customer behavior analysis.

- Built automated reporting scripts in Python and Shell, improving delivery time of weekly reports by 60%.
- Conducted exploratory data analysis using Jupyter Notebook and shared reproducible insights with stakeholders.
- Tracked data anomalies and collaborated with engineering teams for fixes using Bitbucket and Visual Studio Code.
- Supported compliance efforts by documenting data governance processes and implementing data lineage tracking.
- Assisted in monitoring ETL job outputs using SQL Server Management Studio, ensuring accuracy of daily data loads.

EDUCATION

Masters in Computer Science

Lindsey Wilson College

Columbia, KY
