CLOUD DEVOPS ENGINEER

SKILLS

EC2, Lambda, ECS, EKS, RDS, S3, VPC, EFS, Elastic Beanstalk, DynamoDB, ELB, ALB, Route 53, SNS, EBS, CloudWatch, API Gateway, Fargate, CloudFront, Glue, SSM, CloudTrail, CloudFormation, CodePipeline, CodeBuild, CodeDeploy, PrivateLink, Transit Gateway, AKS, Blob Storage, Functions, Azure DevOps, Azure SQL Database, Azure Key Vault, ARM, GKE, BigQuery, Cloud Functions, Cloud Run, Compute Engine, IAM, SIEM, CrowdStrike, Sysdig, HITRUST, HIPAA, NIST CSF, ISO 27001, KMS, NACLs, Security Groups, Datadog, Prometheus, Grafana, NewRelic, CloudWatch, Dynatrace, ELK Stack, Sumo Logic, GitLab CI/CD, Jenkins, Azure DevOps, Terraform, CloudFormation, Bamboo, Docker, Kubernetes, Packer, Artifactory, Vault, ArgoCD, Chef, Puppet, Istio, Python, Terraform, Bash, Ansible, PowerShell, Shell, JSON, YAML

EXPERIENCE

Cloud Engineer III

August 2024 - Current

FedEx Dataworks | Remote, TN

- Designed and implemented end-to-end pipelines using Azure Pipelines, YAML, Docker, and Kubernetes for microservices-based applications. Achieved a 40% reduction in deployment time, a 99.9% deployment success rate, and significantly reduced manual intervention
- Deployed and managed containerized applications on AKS using Helm and Docker, achieving 30% reduction in infrastructure costs and a 50% improvement in application performance. Developed Terraform scripts for Azure resource provisioning, reducing setup time by 60% while eliminating configuration drift.
- Implemented comprehensive monitoring solutions using Azure Monitor, Log Analytics, Prometheus, and Grafana, reducing mean time to resolution by 50% and maintaining 99.95% uptime for critical systems. Enabled proactive issue identification and resolution through automated alerting.
- Leveraged Azure Boards with Git and Azure Repos to manage sprint backlogs and visualize project progress through Kanban boards. Enhanced team collaboration and alignment with business goals, resulting in 20% increase in team productivity and improved delivery timelines.
- Designed and implemented multi-cloud CI/CD pipelines using Azure Pipelines (YAML), AWS CodePipeline, and Jenkins to automate deployments for 50+ microservices. Reduced deployment time by 40% and achieved a 99.95% success rate through parallel task execution and robust rollback strategies.
- Automated cloud infrastructure provisioning using Terraform and AWS CloudFormation, reducing manual setup errors by 90% and ensuring consistent environments across development, staging, and production.

Cloud SecOps Engineer

July 2023 - August 2024

Beyondsoft Consulting | Remote, TX

- Led migration of 80% infrastructure to AWS within six months, architecting solutions across AWS (ECS, Lambda, S3, RDS, EC2) and Azure (AKS, Blob Storage). Achieved 35% increase in engineering productivity and 20% reduction in AWS costs through optimized resource utilization.
- Implemented comprehensive monitoring and logging across AWS, GCP, and Azure using New Relic, Prometheus, Datadog, and Grafana. Maintained 99.95% uptime while reducing MTTR through proactive issue identification and automated alerting.
- Developed CI/CD pipelines using Terraform, GitLab-CI, Jenkins, and Azure DevOps, reducing setup time by 60% and deployment time by 40%. Achieved 99.9% deployment success rate while streamlining resource provisioning across cloud platforms.
- Enhanced security through IAM roles/policies, AWS Secrets Manager, and Azure Key Vault implementation. Improved security posture by 40%, ensuring zero RTO/RPO for Tier-1 workloads while managing seamless access integration during M&A activities.
- Deployed serverless applications on AWS Lambda and Azure Functions, reducing operational costs by 30% and improving scalability during traffic spikes.
- Streamlined Infrastructure as Code (IaC) workflows using Ansible and Azure ARM templates, cutting provisioning time from 2 hours to 15 minutes.
- Optimized AWS ECS and Azure Kubernetes Service (AKS) clusters by fine-tuning resource limits and liveness probes, reducing runtime errors by 45%.

Cloud DevOps Engineer

May 2022 - May 2023

Constellation | Remote

- Implemented end-to-end monitoring using CloudWatch, Datadog, Prometheus, and Grafana. Configured SumoLogic log transportation with automated alerts, achieving real-time visibility into system performance and enhanced security monitoring.
- Designed zero RTO/RPO solution for Tier-1 workloads and established automated multi-AZ failovers with VPC flow logs and AWS Config rules. Achieved 90% coverage of cloud resources while eliminating single points of failure.
- Developed Infrastructure as code using Terraform and CloudFormation, integrating AWS Transfer Family with S3, Athena, and AWS Glue. Streamlined Docker image lifecycle through GitLab-CI, implementing robust pipelines with Drone CI for secure, consistent deployments across multiple registries.
- Designed and deployed secure AWS infrastructure including EKS clusters, managing IAM policies and OKTA SSO integration. Led team mentorship on AWS best practices and DevOps methodologies, fostering cloud excellence while reducing operational costs.
- Integrated Prometheus/Grafana dashboards with AWS CloudTrail and Azure Log Analytics to monitor cross-cloud performance, identifying and resolving 80% of latency issues proactively.
- Led a multi-cloud migration project (on-premises to AWS/Azure) using Azure Migrate and AWS Server Migration Service, completing the transition 3 weeks ahead of schedule.

Cloud DevOps Engineer

January 2019 - June 2022

VISA Inc | Remote

- Engineered AWS, GCP, and Azure solutions handling 50M+ daily requests through ECS, GKE, and AKS implementations. Reduced latency by 25% via serverless functions and CDN optimization, while improving cost efficiency through GKE Autopilot migration.

- Developed comprehensive automation using Python, Ansible, and Terraform, reducing manual effort by 30%. Created reusable Infrastructure as code modules for Cloud Composer and GKE clusters, while ensuring consistent deployments through Packer-built AMIs and GitLab-CI/Jenkins pipelines.
- Implemented robust security measures including IAM roles, KMS encryption, and HIPAA/HITRUST compliance standards. Integrated Prometheus and Dynatrace for real-time threat detection, reducing compliance risks by 40% through automated audits and monitoring.
- Reduced cloud spending by 35% through automated resource management using GCP Recommender Python scripts and lifecycle policies. Implemented cross-region backup strategies while building analytics pipelines with BigQuery/Cloud Scheduler for data-driven decision-making.

System Engineer

April 2017 – December 2018

Xceedance | Remote

- Implemented Azure AD Identity Protection for 8,000+ users, automating 95% of risk remediation and reducing security breaches by 50%
- Deployed SSO and MFA across 50+ applications, decreasing password reset requests by 70% and fortifying access management
- Implemented GPOs for 5,000+ devices and Azure AD Connect for hybrid identity management
- Integrated Azure AD with 15+ SaaS applications, reducing login time by 60% and eliminating 90% of password-related tickets while improving user productivity by 25%
- Deployed comprehensive Azure Information Protection, DLP policies, and Microsoft 365 compliance tools including eDiscovery and Information Barriers
- Achieved 100% compliance with SOX and HIPAA regulations across multiple geographies through robust data governance
- Developed Power BI dashboards for real-time IAM operations monitoring and reduced support ticket resolution times by 25% through SCOM and Azure Monitor implementation
- Improved end-user satisfaction scores by 40% while maintaining proactive risk management

Education

Master of Science - Supply Chain and Logistics Management

University of Warwick, United Kingdom

Bachelor of Science - International Business and Trade

Eastern Mediterranean University, Cyprus

Certifications

- AWS Solutions Architect Certification Associate (Expired- Renewal Pending)
- Microsoft Certified Azure Administrator Associate (Expired- Renewal Pending)
- Microsoft Certified Identity and Access Administrator (Expired- Renewal Pending)
- Microsoft Certified Azure Fundamentals (Expired- Renewal Pending)
- CompTIA Security+ (ID: TgLM1RZYY1RE1CgF) - Valid through 02/07/2028
