Trailhead: <https://www.salesforce.com/trailblazer/jkumar13>

SUMMARY

Certified Salesforce Manager with 10+ years of experience delivering custom Salesforce solutions, Implementing data management solutions and integrated Salesforce with multiple platforms.

- Salesforce CRM, Sales Cloud, Health Cloud, Experience Cloud, Apex Classes, Triggers, Lightning Web Components (LWC), Visualforce, SOQL, SOSL, Security and Permissions, Data Model, Flow, Approval Processes, Objects, Reports, Dashboards, Validation Rules, SOAP API, REST API, Metadata API, Platform Events, Unit/Integration testing, Java, AEM, MySQL, HTML5, CSS3, JavaScript, React, XML, Copado, Gearset, GitHub.
- Having excellent experience on Salesforce conflict resolution, Release pipeline management, Designing Branching strategy, Sandbox management, CI/CD trouble shooting & resolution.
- Experience in building Continuous Integration (CI) & Continuous Deployment/Delivery (CD) pipeline as an iterative process using Copado, Jenkins and Gearset. Troubleshooting Ci/Cd job related issues and fix production issues and always keep eye on GitHub instances and Salesforce CRM instances.
- Collaborate with teams working on solutions to increase the efficiency of the continuous integration/continuous delivery pipelines continuously.
- Experienced with handling production incidents, queries, problems through remedy ticketing system and non-production issues/tasks/incidents through JIRA/SAAS ticketing system.

TECHNICAL SKILLS

- **Salesforce Technologies:** Salesforce CRM, Salesforce SFA, Salesforce Lightning, Marketing cloud, Apex Language, Apex Classes/Controllers, Apex Triggers, SOQL, SOSL, Einstein Analytics, Visualforce Pages/Components, Apex Web Services, Workflow & Approvals, Flows, Dashboards, Custom Objects, Salesforce CPQ, Apex Data Loader, Sales Cloud, Experience Cloud, Health Cloud, FSC, CMS Connect.
- **Web Development Technologies:** Apex, Visualforce, HTML, CSS, JavaScript, AJAX
- **Development Tools and Environments:** GitHub, Gearset, Web services REST API, SOAP API, Eclipse IDE Plug in, Force.com Explorer, Visual Studio, JIRA
- **Software Development Processes and Methodologies:** Agile methodology / Scrum, Waterfall methodology

CERTIFICATIONS

- Salesforce Certified Administrator (ID: 18709283).
- Salesforce Certified Advanced Administrator (ID: 4589517).
- Salesforce Certified Platform Developer I (ID: 18709417).
- Salesforce Certified Platform Developer II (ID: 4742342).
- Salesforce Certified Experience Cloud (ID: 4703460).
- Salesforce Certified CPQ Specialist (ID: 4733406).

PROFESSIONAL EXPERIENCE

Wilco Source

Senior Salesforce Delivery Manager

August 2024 – Present

Phoenix, AZ

Salesforce Development for Health Cloud applications

- Led the Salesforce service delivery team, including internal administrators, developers, and external contractors.

- Managed JIRA tickets assigned to the Salesforce service delivery team, ensuring SLAs were met.
- Architected and executed internal Salesforce.com deployments while providing strategic technical and architectural recommendations.
- Designed scalable and reusable Custom Portals for complex business processes using Experience cloud, Lightning Web Components, Lightning Design System, Lightning App Builder.
- Designed long-running Queueable Apex jobs and Schedulable jobs to generate records in Case Objects.
- Developed complex Apex classes, triggers, and batch processes for patient data synchronization and health records.
- Acted as a liaison between technical personnel and end-user departments to evaluate and translate needs and problems effectively.
- Conducted business process analyses, needs assessments, and cost/benefit analyses with business goals.
- Developed project plans, user acceptance test plans, and communication plans for knowledge transfer.
- Designed and implemented custom Visualforce pages within Salesforce Experience Cloud to dynamically generate PDFs, including personalized copay cards, for end users based on input data.
- Utilized Copado and Gearset to automate deployments across environments, ensuring consistency and reliability.
- Work with Developers to Deploy right code to QA, UAT, and Production Environments. Involved, and design sandbox management, Designing branching strategy and Single Sign on (SSO).
- Provide training and support to end-users, developers, and administrators on release management processes and tools.
- Provide continuous support to Developers, promptly addressing technical issues and guiding teams through the onboarding process.
- Migrated entire DevOps process GitHub Actions to Gearset, Created Github Repository, Designed branching strategy, Sandbox Management, configured & Integrated Jira user stories and sync with Copado. Performed all types of Pd steps, Dataloads for Production releases and Defects Releases.

Environment: LWC, Apex, Triggers, Batch Apex, Sales cloud, Experience cloud, CSS, JavaScript, Rest API, Custom Objects, SOQL, Custom Meta Data, Reports and Dashboards, Process Builder, Flows, Profiles, Permission sets, Gearset, VSCode, GITbash, Jenkins, CI/CD.

State Farm

Lead Salesforce Developer/Architect

January 2019 – August 2024 Phoenix, AZ

Salesforce Development for Insurance applications

- Lead a team of Eleven Salesforce developers and administrators, ensuring high-quality deliverables and adherence to project timelines.
- Established CI/CD pipelines via GitHub and Jenkins
- Enhanced SOQL & SOSL queries, optimize LWC components, and leverage platform cache to boost performance
- Developed Custom Components on Accounts and Custom Portal UI using Experience cloud, Lightning Web Components, Lightning Design System, Reports & Dashboards, AEM, Custom Metadata, Custom Settings, Remote site settings, Named credentials, Profiles and Permission.
- Achieved complex business use cases using Apex class, Triggers.
- Enhanced quote-to-order (QTO) processes, optimizing Salesforce CPQ configurations and workflows.
- Integrated Salesforce with AWS API Gateway for seamless data synchronization, creating a secure, scalable user experience.
- Managed and organized community content using CMS Connect-AEM and Salesforce CMS, maintaining up-to-date and relevant information for users.
- Implemented Platform Events to trigger background processing functionality.
- Designed and optimized Salesforce CPQ processes, including custom templates, product bundles, and pricing rules.
- Resolving code merge, code push, code pull, branching creation issues and helping to developers to deploy into SIT & UAT environment.

Environment: LWC, Apex, Triggers, Batch Apex, workflows, Sales cloud, Experience cloud, Salesforce CPQ, CSS, JavaScript, Rest API, Custom Objects, SOQL, Custom Meta Data, Data Loader, Mobile testing, Einstein Analytics, Reports/Dashboards, Workflows, Process Builder, Profiles, Permission sets, AEM, CMS connect, VSCode, GITbash, Jenkins, CI/CD, Gearset.

GTL

Salesforce Administrator

June 2017 – November 2018 Pittsburgh, PA

Salesforce Development for Communication and Technology applications

- Developed and maintained reports and dashboards to provide actionable insights, improving data-driven decision-making for key stakeholders.
- Managed user permissions and profiles, ensuring proper data access and compliance with security protocols.
- Created and optimized workflow rules, process builder flows, and approval processes, Custom Objects.
- Performed routine administration functions on internal Salesforce instances
- Developed operational dashboards to track KPIs and provide weekly insights into business rhythms, highlighting actionable levers.
- Created record-triggered, scheduled-triggered, and platform event-triggered flows to meet various business requirements through Salesforce Flows.
- Deployed the build artifacts into environment like QA, Staging and UAT according to the build life cycle.
- Created Custom List buttons and Perform unit Testing.

Environment: Aura Components, Apex, Triggers, Batch Apex, workflows, Sales cloud, Custom Objects, Custom Meta Data, Data Loader, Reports/Dashboards, Workflows, Profiles, Permission sets, Process Builder, Record Types, Page layouts, Validation Rules, Change Sets, Data Import Wizard GIT

Cadsys Ind LTD

Salesforce Administrator

October 2013 – November 2014 India

- Managed the gathering of functional and business requirements, ensuring alignment with user needs, resulting in a 15% enhancement in user satisfaction.
- Assisted in configuring custom fields, page layouts, and record types to align with evolving business requirements.
- Supported data import/export processes for ongoing data updates, maintaining a 95% data accuracy rate.
- Involved in Data Migration Activities to handle bulk loads using APEX Data Loader.
- Managed user accounts and permissions, ensuring that security protocols were followed, and users had appropriate access.

Environment: Sales cloud, Workflows, Process Builder, Flows, Sales cloud, Custom Objects, Custom Meta Data, Custom Settings, Data Loader, Reports/Dashboards, Workflows, Profiles, Permission sets, Record Types, Page layouts, Validation Rules, Change Sets, Data Import Wizard, GIT.

EDUCATION

Fairleigh Dickinson University – Teaneck, New Jersey

M.S. Computer Science

January 2015–March 2017

Relevant Courses:

Database systems, Operating Systems, Software Engineering, Computer Architecture, Information Security, Data Warehouse & Data Mining, Systems Programming, Computer Algorithms.
