Cheyenne, WY | (202) 302-3061 | jordana.fyne@gmail.com | [linkedin.com/in/jordanafyne](https://www.linkedin.com/in/jordanafyne)

SUMMARY

Digital operations and content strategy leader with 15+ years of experience delivering high-impact web experiences for large-scale organizations. Certified Project Management Professional (PMP) with proven success in optimizing websites, leading accessibility and analytics initiatives, and managing cross-functional digital teams. Expert in content management systems, accessibility compliance (WCAG/ADA/508), and data-driven performance tracking.

EXPERIENCE

Boise State University – Boise, ID (Remote)

Digital Accessibility Project Manager | Oct 2025 – Present

- Leading enterprise-wide digital accessibility and optimization roadmap for 250+ university sites and applications in preparation for Title II ADA compliance.
- Modernizing digital content systems to meet WCAG 2.2 standards, optimizing workflows to ensure all student-facing content is perceivable, operable, and robust.
- Developing a site governance model integrating automated quality checks, metadata tagging, and broken link remediation to reduce content errors.
- Partnering with Marketing, IT, and eCampus to integrate analytics dashboards for continuous improvement, enabling data-driven UX enhancements across departments.
- Conducting A/B testing and conversion tracking for priority web experiences with a goal to increase course enrollment conversions through improved clarity and visual hierarchy.

Federal Emergency Management Agency (FEMA) – Washington, DC & Remote

Digital Content Project Manager | Jun 2019 – Sept 2024

- Directed FEMA.gov's Drupal migration and redesign, restructuring 74,000+ pages for improved navigation and accessibility. The project was recognized in a [White House "Digital-First Public Experience"](#) report.
- Managed multilingual equity initiative translating disaster content into 20+ languages, improving inclusivity for millions of users nationwide.
- Implemented Jira-based content request workflows, improving turnaround time by 40% and standardizing review across content, UX, and IT teams.
- Led UX testing and data analysis (heatmaps, session recordings, surveys) resulting in a 15% increase in homepage engagement and measurable improvement in mobile navigation scores.
- Led a large-scale "clean-up" effort to reduce broken links from 2,000+ to 81 in five months, increasing site reliability and search visibility.

Health Resources & Services Administration (HRSA) – Washington, DC
Content Management Lead | Jun 2018 – Jun 2019

- Developed audience-segmented communication campaigns and managed multi-platform content calendars for federal health initiatives.
- Conducted usability studies and implemented content revisions that reduced page bounces by 22% and increased time-on-page by 17%.
- Supported mobile-first web enhancements using CMS and analytics integration.

Consumer Financial Protection Bureau (CFPB) – Washington, DC
Content Management Lead | Nov 2016 – Jun 2018

- Simplified complex consumer finance information into plain language, increasing readability and comprehension across key pages.
- Built new editorial workflows in the CMS so writers, designers, and developers could collaborate in real time, which sped up approvals and cut errors in half.

The Nature Conservancy (TNC) – Arlington, VA
Internal Communications Manager | Oct 2011 – Oct 2016

- Supported TNC's first SharePoint intranet build and launch, engaging 3,700+ employees through streamlined digital communication tools.
- Developed global Diversity & Inclusion campaign content, attracting 1,500+ community members across four continents.

KEY PROJECTS & IMPACT

- **Website Optimization & Testing:** Deployed A/B testing and personalization initiatives using SiteImprove and GA4 to drive measurable gains in engagement and conversion.
- **Digital Governance:** Designed scalable CMS governance frameworks for FEMA and Boise State, ensuring compliance, consistency, and operational efficiency.
- **Analytics Leadership:** Created and maintained performance dashboards, integrating analytics into decision-making for UX, SEO, and content strategy.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Journalism – University of Florida, 2009

Project Management Professional (PMP) – Project Management Institute, 2024

Communications Fellow – The Nature Conservancy, 2015 (Micronesia Program)

Coda Global Fellow – The Nature Conservancy, 2013 (Digital Marketing)

Analytics & SEO: Adobe Analytics, Google Analytics, SEMrush, Tag Manager

Project Tools: Jira, Confluence, Asana, Trello

Accessibility: WCAG 2.1/2.2, Section 508, ADA Title II

Design: Adobe Photoshop, Canva, Figma

Hello Hiring Committee,

From the job description, it sounds like you're looking for a digital operations leader who can manage complex web systems, guide cross-functional teams, and make data-driven improvements that enhance customers' experience.

That's me! My name is Jordana Fyne.

I'm a PMP-certified digital project manager and content strategist with over 15 years of experience leading large-scale web transformations for government agencies, universities, and nonprofits. I'm currently serving as the Digital Accessibility Project Manager for Boise State University, where I'm building an enterprise-wide roadmap to bring more than 250 university websites and systems into ADA Title II compliance. The project combines analytics, content optimization, and governance — all with a focus on inclusivity and measurable results.

Before Boise State, I led FEMA's nationwide website redesign and Drupal migration, restructuring over 74,000 pages and improving usability and accessibility for millions of users. That work was [recognized in a White House report](#) on delivering a digital-first public experience.

Content management at scale is the name of my game. I help dispersed organizations build governance models, lead SEO and analytics initiatives, and launch new processes that make teams more efficient and websites more impactful.

While my experience spans Drupal, WordPress, and SharePoint rather than Adobe ecosystems, I have deep CMS expertise that translates easily into any platform. The fundamentals of quality assurance, accessibility, tagging, analytics, and content lifecycle management are the same, and those are the areas where I've consistently delivered results.

On a personal note, I live in Cheyenne, Wyoming, where I've had the chance to get to know several people who work for Dish Network and have heard great things about the company's innovative culture. My family plans to move to Colorado in four years, after our youngest finishes high school, so this opportunity feels like an exciting step in that direction.

I hope to earn an opportunity to tell you more about the professional experience and systems-thinking mindset that I would bring to Sling TV's digital operations.

Thank you for your time and consideration.
