PERSONAL DATA

IT consultant since March 1990 Belgian, born
 March 5, 1964 in Braine-l'Alleud

TRAINING

01/09/1976-30/06/1979	Tubize municipal school. School block. Latin-Math. Lower humanities.
01/09/1979-30/06/1982	Paul Pastur University of Work in Charleroi. Higher Humanities. Industrial Science Option.
01/09/1982-30/06/1984	University of Liège. Application in physical sciences. Paul
01/09/1984-30/06/1986	Pastur University of Work in Charleroi. Graduate in Computer Science.
01/09/1988-30/06/1989	Provincial Normal Institute of Technical Education in Anderlecht (Inpet, Province of Brabant). Diploma of Pedagogical Aptitude.
02/2024-12/2024	Wallangue. Dutch Level A2 Wallangue. Nederlands Level B1 Wallangue. Dutch Level B2

COMPUTER KNOWLEDGE

Knowledge and in-depth mastery of everything related to the functioning of IT, whether it concerns the functioning of operating systems, programming or the classic use of various products such as office automation, accounting, management, messaging, internet, etc.

LINGUISTIC KNOWLEDGE

French	Very good command of oral, written, administrative and technical language.
Dutch	Oral: B2. Written: B2. Training in progress.
English	Good understanding of spoken (B1) and written (B1) language.

PERSONALITY and SKILLS

- Analyst
- Ability to analyze and implement complex projects High
- capacity to work, if necessary, without interruption
- Communicates easily
- Excellent writing skills in French Team
- leadership
- Project management

- Listening
- Know how to decide
- Respectful of ideas and people
- Tenacious
- Stress resistant
- Gatherer
- Adapts to any situation
- Easily manages conflicts
- Open

PROFESSIONAL EXPERIENCE

09/1996-02/1990	Employee at Groupe S asbl, corporate social secretariat, analyst, method analyst and system engineer roles.
03/1990-08/1992	Employee of an IT service company seconded to Crédit Agricole de Luxembourg (Luxembourg city) and to Volkswagen (Forest).
08/1992- ...	IT service provider. Multiple missions carried out for the benefit of more than a hundred companies as diverse as Digital Belgium, Digital Luxembourg, SNCB, Union des Banques Suisses, Metropolitan Bank, Société Générale de Banque, OCCH, Duferco Clabecq, Duferco La-Louvière, Trasys, MACH Luxembourg, Invik Bank Luxembourg, Transac Luxembourg, Stater Belgium, NLMK, Proximus, Groupe S, AJK Kaulille, Crédit à l'Industrie, CGER (FORTIS), Société Générale (France), Worldline, etc.

Software expertise summary

Tool/OS/Utilities	Skill (1-5)	Duration (months)
OpenVMS	5	450
DCL	5	450
VMS Clustering	5	400
Oracle/RDB	4	190
BACKUP	5	240
Fixed-term contract	5	350
HSC50	5	36
HSJx0	5	72
HSZ70	5	36
HP SAN EVA4000	5	72
VDD/DDAL	5	34
CMS/MMS	5	179
VAX-COBOL	5	112.5
VAX-FORTRAN	5	47.5
VAX-C	3	12
RPG S34-S36	3	12
Assemble S34	3	6
VMS-DATATRIEVE	3	36
RM-COBOL	4	12
MCL(Modular Control Language)	5	24
DEC-TPU	5	24
SQL	3	60
\$U	4	43
Confluence	2	64

JIRA	3	84
FTP/SFTP	5	30
HP/DATAPROTECTOR	5	35
MQTT	3	6
RMAN	3	6
TOAD	3	8

Projects

..... **Period** : 01/10/2020 – 29/02/2024

Company : NLMK Belgium - Steel industry

Function : VMS System Engineer – Fortran & Cobol Programming

Environment : OpenVMS VAX-ALPHA

- Various system tasks (VAX/ALPHA Cluster)
- Development of an application for transferring data for monitoring the production process, from the slab in stock to the sheet metal placed on a truck or wagon (Fortran).
- Implementation of said application into production
- Monitoring of said application for fixes and maintenance
- Analysis and development of various programs (Cobol and Fortran) or operating control procedures (DCL)

..... **Period** : 01/10/2020 – 31/08/2022

Company : NLMK Strasbourg - Steel industry

Function : VMS System Engineer

Environment : OpenVMS VAX (emulation)

- Implementation of VAX/AS400 file exchange procedures
- Support/Operating advice (VAX-4000 system in emulation)

.....Period : 01/03/2017 – 30/09/2020

Company : Finances – Payment Cards

Function : VMS System Engineer –
Build & Deploy Manager

Environment : OpenVMS ITANIUM - \$UNIVERSE V5-V6

- The mission consists of ensuring the deployment of the client's regular releases, namely, the acceptance and build of VMS application developments (CMS/MMS), their deployment on test systems and their implementation into production.
- Check, before execution, SQL queries for updating ORACLE databases (4 test levels and 1 production level).
- Application developments broadly mean code, database update scripts, data loading scripts, configuration scripts, task definitions (\$U elements) and specific settings.
- Builds and releases are ensured by secure deployment and control procedures that I maintain.
- The mission includes general systems management activities (6 dual-clusters).
- Miscellaneous:
 - o migration \$U_V5 to \$U_V6 various
 - o optimizations under \$U_V6
 - o implementation of MQTT as a replacement for MQS (writing modules in C++ for calls by Cobol application programs)

.....Period : 07/18/2016 – 02/28/2017

Company : NLMK Belgium - Steel industry

Function : VMS System Engineer – Cobol/Fortran Programming

Environment : OpenVMS VAX-ALPHA

- The mission is to relieve the development team for analysis and production of various programs. Developments in Cobol and Fortran.
- TDMS/SMG conversion (Cobol and Fortran).
- Various system tasks (VAX/ALPHA Cluster)

.....

.....Period : 01/01/2016 – 15/07/2016

Company : Societe Generale France – PAREL Bank-Stock Exchange Support

Function : VMS System Engineer – DBA Rdb/Sql

Environment : OpenVMS Itanium- RDB

- Production monitoring
- Optimization of RDB/SQL queries and databases
- Optimization of system performance
- Transfer procedures (FTP, SFTP) for file exchanges with clients

.....Period : 01/09/2005 – 31/12/2015

Company : STATER Belgium Mortgage loan

Function : System Engineer – DBA Rdb/Sql

Environment : OpenVMS AXP – Itanium- RDB/SQL

- Production monitoring
- Reorganization of maintenance contracts Restructuring
- of systems for financial optimization
- Setting up development, pre-production and production structures
- Developing “Build” procedures (CMS/MMS)
- ALPHA / ITANIUM Migration
- Implementation of BACKUP procedures (with HP/
- DATAPROTECTOR) Optimization of SQL commands for query
- optimization Optimization of RDB/SQL databases
- Analysis and implementation of the file archiving process.
- Implementation and implementation of the BCP

Period : 01/09/2005 – 31/12/2012

Company : DUFERCO Clabecq – DUFERCO La-Louvière - Metallurgy

Function : System Engineer

Environment : VAX & AXP/VMS

- Production monitoring
- Various repairs
- Staff training
- Interventions on demand

Period : 01/03/2005 - 30/06/2006

Company : Group S - SOPA (Social Secretariat of Employers)

Function : Public Sector Analyst

- As part of the social secretariat's desire to respond to the needs of the public sector, analysis of the general regulations of the local and provincial public service of Wallonia
- Implementation of the application functionalities required by employers in the local and provincial public service of Wallonia

Period : 01/07/2001 - 31/08/2004

Company : MACH Luxembourg – Transac - Invik

Function : System Engineer

Environment : AXP/VMS - ORACLE

- Production monitoring
- Various maintenance of a network of 9 clustered systems spread over 2 sites in DUDELANGE (recovery site)
- Implementation of ORACLE and other backup procedures
- Writing a DB-LOAD sub-application (C++ interface) in CLUSTER mode for performance reasons
- Rewriting parts of dynamic memory usage programs for performance issues (C++)

Period : 01/01/1999 - 30/06/2001

Company : Group S - SOPA (Social Secretariat of Employers)

Function : System Engineer

Environment : VAX & AXP/VMS

- Progressive and secure upgrades (with rollback) of VAX and AXP operating systems and their peripheral products, as part of the transition of the century.
- Orientation study of the Disaster Recovery Plan
- Writing operating procedures for connections to the ISABEL network
- Implementation of a tool for automatic conversion of magnetic tape control programs delivered to the ONSS (IBM/Cobol to VAX/Cobol conversion).
- Analysis of central systems performance, for reorganization of the VMS and DRP environment.

Period : 01/01/1998 - 31/12/1998

Company : Group S - SOPA (Social Secretariat of Employers)

Function : System Engineer

Environment : VAX & AXP/VMS

- Installation and configuration of new systems.
- Implementation and monitoring.
- Substitution of Pathway by TCPIP Substitution of
- I/O Express by I/O caching VMS Management of
- the performance of "clusters" Reorganization of
- the cell of VMS systems

Period : 08/15/1997 - 12/31/1997

Company : Proximus (Mobile Phones)

Function : System Engineer

Environment : VAX & AXP/VMS

- Installation and configuration of new systems.
- Putting into production.
- Transition from VAX architecture to ALPHA.

Period : 01/01/1997 - 15/08/1997

Company : "General Bank" - Belgium

Function : System Engineer

Environment : VAX & AXP/VMS

- Production monitoring and maintenance of the network made up of around forty machines (VAX and ALPHA).

Period : 01/03/1996 - 31/12/1996

Company : "Metropolitan Bank"

Function : Programmer Analyst

Environment : VAX/VMS

- As part of the takeover of Metropolitan Bank's activities through industrial credit, analysis and programming of the transfer application (Cobol, Datatrieve, etc.)

Period : 01/03/1993 - 31/12/1995

Company : National Company of Belgian Railways

Function : Operational management of the production network, system manager, DBA-RDB

Environment : VAX, VAX Stations, LPS 20, VMS, Cobol, RDB, DECFORMS, RMS Alpha Systems, DCL, RDB/SQL

- As part of the SABIN project, start of production, organization of production and training of personnel intended to take over this function.
- Creation of numerous utilities necessary for the daily evolution of the IT environment.
- Monitoring of site production (900 systems).
- Configuration and implementation of VDD for data distribution (900 RDB/SQL databases).
- Implementation of automatic procedures for monitoring software upgrades.
- Development of a database comparison utility (Database Comparison Utility), intended for updating databases in the network (complement to VDD). Development of a method and automatic procedures intended to proceed, by the network, without human intervention, to the updating of the VMS operating system.

Period : 01/04/1991 - 28/02/1993

Company : Digital Belgium-Luxembourg

Function : System Manager – Data Manager (Rdb)

Environment : VAX, LPS 20, VAX Stations, VMS, RDB, LPS 20/40, LN06, VAX 6000-510 and 4000-200, Infoserver 100, DECWRITE, Micro VAX 3100/3800, VAX Stations 3100, DECSERVER 300, DDAL, VAX/ VMS, DECFORMS, VAX Notes, VAX Document

- Implementation of different parts of the SABIN project (implementation, reference data distribution system, system configuration, etc.).
- Performance study of Digital Belgium-Luxembourg client systems

Period : 08/15/1990 - 03/31/1991

Company : Volkswagen car manufacturer Brussels

Function : System Engineer – Data Manager (Rdb/Sql)

Environment : VAX 3600, VAX 4000-300, Digital LN03-R, VAX Stations,
VMS 5.3 and 5.4, RDB, VPA, TSM, VAX Cluster, DECNET

- As part of the implementation of a new assembly line tracking application, participation in improving application response times through appropriate advice related to VMS and the equipment available.
- Transition from VMS 5.3 to VMS 5.4.
- Implementation of Shadowing, phase II.
- Development of the application Optimization
- of Rdb/Sql databases

Period : 01/16/1990 - 07/15/1990

Company : Bank. Crédit Agricole in Luxembourg

Function : System Engineer

Environment : VAX, Micro VAX, Digital TA79, VMS, PSI, PCSA, VPA

- Commissioning of turnkey applications delivered to the customer (Portfolio)
- Configuration of systems including communication systems with SWIFT
- Implementation of operating and backup procedures
- Organizational advice aimed at the efficiency of the site's production, through appropriate management of human and material resources.

Period : 01/09/1986 - 15/01/1990

Company : Group "S"

Function : Programmer analyst, system engineer

Environment : VAX, Micro VAX, VMS, Cobol, DCL, System Services, DecNet,
TPU, Ethernet, PSI, WPS+, S2020, DTR, RDB, RMS

- Analysis and implementation of an application for managing hardware and IT resources in order to account for and allocate the IT activity of the "Groupe S" Analysis
- and implementation of an automatic conversion utility (99%) into VAX/Cobol of existing and future SISA-CEE application programs (multi-firm, multilingual, and multi-currency accounting software), allowing the maintenance of a single source text written in RM-Cobol, and a simple recompilation and link under VAX/VMS. Analysis of
- availability and use of machines, and proposals for ways to resolve bottlenecks (processor management, memory, inputs/outputs, file locking, etc.)
- Management of the local network and its interaction with decentralized offices (DCS), and users who collect database information.
- RMS file optimization study (analysis of file operation and their behavior according to their use).
