

Full .Net Stack Developer

Akshara Gangarapu
Phone: +1 (858)-744-2668
Email: aksharareddy890@gmail.com

PROFESSIONAL SUMMARY:

- Full Stack .NET Developer with around 9 years of experience in designing, building, testing, and deploying scalable enterprise web and cloud applications using **.NET Framework**, **.NET Core**, **.NET 6/7**, and **SQL Server**, following Agile-Scrum and Test-Driven Development (TDD) practices.
- Extensive experience in software development lifecycle (SDLC) using **Waterfall**, **Agile-Scrum**, and **TDD** approaches across diverse domains such as Financial Services, Healthcare, Insurance, Pharmaceutical, E-commerce, B2B, and B2C platforms.
- Proficient in developing cloud-native and distributed applications using **C#**, **ASP.NET Core MVC/Web API**, **ADO.NET**, **WCF**, **Blazor**, **WPF**, **Entity Framework (EF/EF Core)**, **HTML5**, **CSS3**, **JavaScript (ES6+)**, **TypeScript**, **jQuery**, **AJAX**, and **Kendo UI**.
- Hands-on expertise in **Microsoft technologies**, including **.NET Framework 4.8**, **.NET Core 3.1**, **.NET 6.0/7.0**, **Visual Studio 2017/2019/2022**, **WPF/XAML**, and **Azure DevOps** for cloud deployments, desktop apps, and CI/CD automation.
- Six years of experience working extensively with **Azure Cloud Services** such as **App Services**, **Functions**, **Azure SQL Database**, **Cosmos DB**, **Blob Storage**, **Azure API Management**, **Event Grid**, and **Azure Monitor** for building scalable, event-driven systems.
- Additional experience with **AWS Services** including **EC2**, **S3**, **Lambda**, **RDS**, **DynamoDB**, and **AWS CloudWatch**, delivering hybrid cloud solutions with high availability and monitoring.
- Skilled in modern web development using **AngularJS**, **Angular 2/4/7/12**, **ReactJS 18**, **Tailwind CSS**, **Bootstrap 5**, and **Responsive Web Design** principles for clean, intuitive front-end applications.
- Deep knowledge of **OOP**, **SOLID principles**, **Domain-Driven Design (DDD)**, **MVC**, **SOA**, and architectural patterns. Implemented reusable libraries using **Microsoft Application Blocks** like Exception Handling and Logging.
- Hands-on experience building scalable n-tier applications using **Microservices architecture**, **RESTful APIs**, **GraphQL**, and **event-driven systems** with **Kafka**, **Redis Cache**, and **Azure Event Grid**.
- Proficient in advanced **C#** features such as **async/await**, **lambda expressions**, **dynamic binding**, and **LINQ query expressions**.
- Expertise in securing applications using **ASP.NET Core Identity**, **OAuth 2.0**, **OpenID Connect**, **Role-Based Authorization**, and **Azure Active Directory (AAD)**.
- Strong database experience with **SQL Server 2008–2022**, **PostgreSQL**, **Oracle**, **MongoDB**, and **Cosmos DB**; well-versed in T-SQL, stored procedures, triggers, views, indexing, and performance tuning.
- Developed and automated ETL pipelines using **SSIS** and **Informatica PowerCenter** for transforming and migrating large-scale data in healthcare and financial systems.
- Built rich BI dashboards and reports using **SSRS**, **Crystal Reports**, and **Power BI** to support data-driven decision-making.
- Practical experience working with **Docker** and **Kubernetes** for containerization, integrated with modern CI/CD workflows using **Azure DevOps**, **Jenkins**, and **GitHub Actions**.
- Designed and developed branded UI experiences using **Master Pages**, **Razor Views**, and reusable components in **Blazor** and **ASP.NET Core MVC**.
- Involved in full-cycle **application modernization**, including migration from **.NET 2.0 to 4.5+**, and cloud adoption on **Azure** and **AWS**, transforming monoliths into microservices-based systems.
- Proficient in real-time application and infrastructure monitoring using tools like **Splunk**, **Dynatrace**, **Uptrends**, **Azure Monitor**, and **AWS CloudWatch**.
- Strong problem-solving and analytical skills, with the ability to quickly analyze problems, design solutions, and deliver quality results within tight deadlines. Proven ability to collaborate in cross-functional Agile teams while being self-motivated, proactive, and detail-oriented.

TECHNICAL SKILLS:

Framework:	.NET Core, .NET Framework, ASP.NET MVC, Web API, Blazor (WASM & Server), WCF, Entity Framework (EF/EF Core), WPF, WinForms, Spring Boot, Hibernate
Programming Language:	C#, VB.NET, JavaScript (ES6+), TypeScript, SQL (T-SQL, PL/SQL), HTML5, CSS3, Java, Python, PowerShell
Cloud Platforms:	Microsoft Azure (App Services, Functions, DevOps, Azure SQL, Blob Storage, Azure Event Grid, Azure API Management), AWS (Lambda, EC2, S3, RDS, DynamoDB, CloudWatch), GCP (Google Cloud Platform – DMS, M4CE)
Databases:	SQL Server 2005/2008/2012/2019/2022, Oracle 11g/12c/19c, PostgreSQL, NoSQL (MongoDB, Cosmos DB, DynamoDB), Redis Cache, SSRS, SSIS, Informatica PowerCenter
Architecture:	Microservices Architecture, RESTful API Design, GraphQL API Integration, Event-Driven Architecture (Kafka, Azure Event Grid), Domain-Driven Design (DDD), MVC

	Architecture, Service-Oriented Architecture (SOA), Containerized Deployments (Docker/Kubernetes)
DevOps:	Azure DevOps, Jenkins, GitHub Actions, TFS, Docker, Kubernetes, Terraform, ARM Templates, Infrastructure as Code (IaC), AWS CloudFormation, Grafana, Prometheus
Testing:	Unit Testing (NUnit, XUnit), Integration Testing, Mocking Frameworks (Moq, NSubstitute), Performance Testing Tools, API Testing (Postman, SoapUI), UI Testing (Playwright, Selenium)
Version Control:	Git, Tortoise SVN, TFS, Bitbucket
Front-end Development:	AngularJS, Angular 2/4/7/12+, ReactJS, Blazor, ExtJS (legacy knowledge), jQuery, Tailwind CSS, Bootstrap 4/5, Responsive Web Design (Mobile-First)
Reporting and Analytics:	Crystal Reports, SSRS (SQL Server Reporting Services), Power BI
Monitoring and Logging:	Splunk, Dynatrace, Uptrends, AWS CloudWatch, Azure Monitor, Log Analytics
API Management & Integration:	Azure API Management, REST APIs, GraphQL APIs, Kafka Messaging
Methodologies:	Agile (Scrum/Kanban), Test-Driven Development (TDD), Sprint Planning, Daily Standups, Waterfall Model (legacy exposure)
Other Tools:	Postman, JIRA, Bugzilla, Salesforce CRM, Lotus Notes (legacy exposure), Viper, Cobra, ALM, SSMS (SQL Server Management Studio)
Operating Systems:	Windows Server, Linux (Ubuntu, CentOS), macOS

PROFESSIONAL EXPERIENCE:

Delta | Atlanta, Georgia

.Net Full Stack Developer

July 2024 to Present

Responsibilities:

- Designed, developed, and maintained web applications using **WCF, ASP.NET MVC, AngularJS, JavaScript, jQuery, HTML5, CSS3**, and **Bootstrap 5**, delivering dynamic and responsive user interfaces.
- Integrated cloud-based solutions leveraging **Microsoft Azure** (App Services, Azure SQL Database, Blob Storage) to enable seamless application hosting, scalability, and maintenance.
- Implemented secure and scalable APIs using **Azure API Management**, ensuring enterprise-grade API lifecycle management, throttling, and monitoring.
- Designed event-driven architectures by integrating **Azure Event Grid** and **Kafka** messaging systems, facilitating real-time communication across distributed services.
- Developed and optimized **T-SQL** stored procedures, views, and functions in **SQL Server 2019** and introduced **PostgreSQL** backend integration for advanced analytics support.
- Automated ETL processes using **SQL Server Integration Services (SSIS)** to efficiently extract, transform, and load data between heterogeneous systems.
- Provided proactive 24/7 production support, including monitoring, troubleshooting, RCA (Root Cause Analysis), incident management, and quick turnaround hotfix deployments.
- Implemented distributed caching strategies using **Redis Cache**, significantly improving backend service response times and database performance.
- Configured application monitoring and health checks using **Azure Monitor, AWS CloudWatch, Splunk, Uptrends**, and proactive alerting systems to ensure high availability and performance.
- Designed UML diagrams including Class Diagrams, Sequence Diagrams, and Activity Diagrams to support architectural documentation and development workflows.
- Coordinated application changes, patches, upgrades, and hotfixes while ensuring minimal downtime and seamless deployments via **Azure DevOps** CI/CD pipelines.
- Delivered comprehensive reporting and business intelligence insights using **SSRS**, providing stakeholders with multi-format data exports (Excel, PDF, CSV, HTML).
- Integrated RESTful third-party APIs for data synchronization and developed scalable, microservices-based architectures aligned with modern 12-factor app principles.
- Ensured data security compliance by managing user roles, multi-tenant authentication, and implementing role-based access control across distributed applications.
- Authored and maintained detailed technical documentation covering deployment processes, troubleshooting guides, and support playbooks.
- Actively participated in Agile ceremonies (Scrum meetings, sprint planning, retrospective sessions) using **JIRA** for project tracking and status reporting.

Environment: .NET Framework 4.8 / .NET 6 / .NET Core, C#, ASP.NET MVC, Web API, WCF, Razor Pages, AngularJS, Bootstrap 5, HTML5, CSS3, JavaScript, jQuery, Azure App Services, Azure SQL, Azure DevOps, Azure API Management, Azure Event Grid, AWS EC2/S3/RDS, PostgreSQL, SQL Server 2019/2022, Redis Cache, Kafka, SSIS, Docker, Kubernetes, Splunk, Uptrends, Dynatrace, Git, TFS, JIRA, SSRS, RESTful Services, Microservices Architecture, Agile-Scrum Methodology, TDD (Test Driven Development), CI/CD Pipelines.

Master Card | Purchase, New York

Senior .Net Developer

April 2022 to June 2023

Responsibilities:

- Developed and maintained customized, data-centric web applications and backend services using **.NET Core, ASP.NET Web Forms, C#, T-SQL, Entity Framework, and LINQ**.
- Designed and implemented responsive and reusable UI components using **ASP.NET Web Forms, ReactJS, AngularJS, Angular 7, HTML5, Tailwind CSS, Bootstrap, and JavaScript/jQuery**.
- Built scalable and modular web applications following **MVC 4.0 architecture**, ensuring separation of concerns, maintainability, and scalability across application layers.
- Implemented DOM manipulations and client-side scripting enhancements using **AngularJS** (Directives, Templates, Dependency Injection) and native **JavaScript** to deliver dynamic user interactions.
- Developed robust and secure **RESTful Web APIs** using ASP.NET Core and designed CRUD operations with HTTP verbs (GET, POST, PUT, DELETE).
- Integrated **GraphQL APIs** to enable flexible data queries and efficient communication between front-end applications and distributed backend services.
- Built and automated reporting modules using **Crystal Reports** for complex financial data analysis, exportable to formats like Excel, PDF, and HTML.
- Developed editable, high-performance grid views using third-party controls like **ComponentOne** to handle large-scale datasets efficiently.
- Integrated AWS cloud services such as **EC2, S3, Lambda, RDS, and DynamoDB** to build and deploy cloud-native, scalable web applications.
- Implemented logging, monitoring, and performance alerting using **AWS CloudWatch** to ensure system uptime, early issue detection, and compliance with SLAs.
- Applied secure data access patterns and handled identity management through OAuth2 authentication flows across multiple environments.
- Migrated legacy modules into cloud-based microservices architecture, containerized deployments using **Docker**, orchestrated builds and deployments via **Jenkins**, and Git-based version control (Git, SVN).
- Participated in Agile/Scrum ceremonies including daily standups, sprint reviews, retrospectives, and task estimations using **JIRA**.
- Coordinated closely with QA and DevOps teams to ensure smooth CI/CD pipeline delivery and cloud environment provisioning.

Environment: .NET Framework 4.0 / .NET Core, Visual Studio 2015/2017, C#, ASP.NET MVC4, Web Forms, Web API, WCF, HTML5, Tailwind CSS, Bootstrap 5, CSS3, JavaScript, jQuery, ReactJS, AngularJS (2+, 4, 7, 12), Node.js, GraphQL, AWS (EC2, S3, RDS, Lambda, DynamoDB, CloudWatch), Jenkins, Tortoise SVN, Tortoise Git, Agile-Scrum Methodology, Microservices Architecture, Docker, OAuth2 Authentication, RESTful Services, Crystal Reports.

ElevanceHealth | Indianapolis, Indiana
.Net Developer

Oct 2019 to March 2022

Responsibilities:

- Designed, developed, and maintained enterprise healthcare applications using **ASP.NET MVC 4.0, C#, WCF, HTML5, CSS3, and jQuery** with **SQL Server 2016/2019** as the backend database.
- Defined and configured **WCF** service contracts, bindings, and behaviors for secure and reliable enterprise service integrations.
- Developed robust Business Layer and Data Access Layer components using **C# .NET, Entity Framework, and LINQ** to ensure efficient database interactions and modular application design.
- Designed and developed **RESTful Web Services** and APIs to enable seamless data integration with third-party systems and internal modules.
- Built and maintained cloud-native applications using **Microsoft Azure App Services, Azure SQL Databases, Azure Blob Storage**, and implemented CI/CD pipelines using **Azure DevOps**.
- Integrated authentication and authorization through **Azure Active Directory (AAD)** to ensure secure access control across multiple clinical modules.
- Implemented **event-driven messaging architectures** using **Apache Kafka**, enabling real-time processing of clinical data events such as patient admissions, pharmacy updates, and lab results.
- Designed and built ETL data integration pipelines using **Informatica PowerCenter** for healthcare data ingestion, transformation, and migration from multiple external sources into centralized systems.
- Participated in the migration of legacy ASP.NET Web Forms applications into modernized **ASP.NET MVC 4** architecture with Razor Views and strongly typed ViewModels.
- Developed high-performing database objects including complex **T-SQL** stored procedures, views, and functions for reporting and operational data retrieval.
- Designed scalable reporting modules for healthcare operations by integrating **SSRS** and delivering data reports to business stakeholders in secure, scheduled formats.
- Built cloud event workflows using **Azure Event Grid** and serverless computing via **Azure Functions** to improve real-time communication between healthcare applications.
- Created and managed scalable, container-ready microservices leveraging **Docker** for portable deployment across hybrid cloud environments.
- Provided production support for critical clinical systems, maintaining SLAs and performing root cause analysis (RCA) for service incidents and outages.

- Authored and maintained technical documentation including system designs, deployment plans, test plans, and operational runbooks.
- Actively collaborated with business analysts, architects, and QA teams across Agile/Scrum ceremonies including sprint planning, story grooming, daily standups, and retrospectives using **JIRA** and **Azure Boards** for work tracking.

Environment: ASP.NET MVC 4.0, C#, WCF, WPF, Entity Framework, HTML5, CSS3, JavaScript, jQuery, Azure App Services, Azure Functions, Azure SQL Database, Azure Event Grid, Azure DevOps, Kafka, Informatica PowerCenter, SQL Server 2016/2019, Docker, RESTful APIs, Microservices Architecture, SSRS Reporting Services, Scrum/Agile Methodologies, TFS, Git, SVN, JIRA.

HCL Technologies | Hyd, India
.Net Developer

May 2016 to July 2019

Responsibilities:

- Developed dynamic, responsive UI pages using **ASP.NET Web Forms, ASP.NET MVC, C#, HTML5, CSS3**, and **jQuery**, delivering seamless user experiences across multiple platforms.
- Implemented the **MVC architectural pattern** to streamline the development of scalable web applications and to modularize business, presentation, and data access layers.
- Integrated **AJAX** controls and asynchronous calls to enhance page responsiveness, autocomplete search functionalities, and real-time form validations.
- Utilized **Unity Dependency Injection (DI)** framework to build loosely coupled, maintainable, and testable codebases. Applied **Entity Framework Code First** approach for ORM, managing complex CRUD operations, schema migrations, and relational mappings with SQL Server.
- Developed and consumed **RESTful Web Services** using **jQuery Ajax**, enabling smooth real-time communication between front-end and back-end systems.
- Designed optimized **T-SQL** stored procedures, views, and functions for handling large-scale data transactions and performance-intensive queries.
- Built interactive dashboards and detailed reports using **SSRS**, delivering business-critical insights to stakeholders in multiple output formats (Excel, PDF).
- Improved UI/UX by enhancing web interfaces using modern **CSS3** features and responsive XHTML structures, ensuring mobile compatibility and accessibility standards.
- Implemented **LINQ** queries to streamline data access and manipulation, enhancing application responsiveness and database interaction efficiency.
- Prepared technical and functional documentation for all project modules, facilitating effective knowledge transfer and maintainability.
- Participated in database optimization initiatives by writing custom SQL queries, improving Access code performance, and tuning database indexing strategies.
- Supported integration of multiple heterogeneous databases (SQL Server, Salesforce CRM data) into unified application dashboards.
- Initiated the early adoption of **Azure App Services** to deploy and host ASP.NET MVC applications on cloud, improving deployment scalability and disaster recovery readiness.
- Contributed to early-stage containerization efforts by exploring **Docker** packaging of legacy .NET applications for portable deployments.
- Collaborated with cross-functional Agile teams, using **Scrum methodology**, to deliver high-quality releases and continuous feature enhancements on schedule.

Environment: .NET Framework 4.0/4.5, ASP.NET Web Forms, ASP.NET MVC, Visual Studio 2010/2015, IIS 6.0/7.5, SQL Server 2005/2008 R2, T-SQL, Entity Framework (Code First), LINQ, JavaScript, jQuery, AJAX, CSS3, HTML5, SSRS, RESTful Web Services, Azure App Services, Docker (POC level), SVN, Salesforce CRM integration, Visual Studio Management Studio (SSMS), Kendo MVC, Scrum/Agile Methodology.
