SUMMARY

Skilled GIS Analyst with 15+ years of expertise in geospatial data management, analysis, and visualization for government agencies, private energy sector clients, and NGOs. Proficient in ArcGIS, data modeling, and quality control, with a strong track record in environmental and geoscience GIS support. Experienced in mapping, database creation, and handling diverse geospatial datasets. Adept at working in both collaborative and remote settings.

SKILLS

- ArcPro 3.4, ArcGIS 10.x
- ArcGIS Online
- CAD file to GIS conversion
- Digitization
- Geodatabase design, editing, maintenance
- Map production
- Metadata
- Spatial Analyst
- 3D Analyst/Visual Assessments
- GIS Project Management
- Data modeling
- QA/QC

EXPERIENCE

GIS Specialist

NiyamIT, Inc. | Leesburg, VA | Feb 2022-Nov 2024

- Updated, maintained, and QC'd the FEMA Zone1 regional Flood Hazard Layers (rFHL).
- The rFHL was merged with the FEMA National Flood Layer (NFHL), which is the definitive source of the digital flood hazard map.
- Included and incorporated all digital effective Study, Physical Map Revision (PMR), Letter of Map Revision (LOMR), and Notice to User (NTU) data.
- As part of the FEMA Professional Technical Services (PTS) contractors' team, worked with Customer Data Services (CDS) to maintain the NFHL and ensure that the most accurate and latest Zone 1 data is available for public distribution.
- Interfaced with stakeholders to resolve any issues discovered during use.
- Helped with FEMA's Coordinated Needs Management Support (CNMS) with Linework and Reach Assessments for Zone 1 counties when needed.

Sr. GIS Analyst

AECOM | Santa Barbara, CA | Jun 2001-May 2021

- Led GIS support for environmental and geoscience services, mapping, database creation, and analytics for licensing and permitting; for instance, led the GIS efforts for the AV Solar Ranch One 230 MW photovoltaic project, supporting all phases from inception to post-construction (EPC).

- Displayed and analyzed GIS data from a wide range of subjects, such as Solar Project Phase I's, Phase II's, Phase III's, Land Use, Zoning, General Plans, Master Plans, Airport Plans, Wetland Jurisdictions, Ecology, Threatened and Endangered Species, Cultural, Water, Traffic, Geologic, Noise, FEMA Hazard maps/data, FEMA flood maps/data, and Assessment, Remediation and Geosciences data.
- Led GIS support for environmental consulting, focusing on energy facility site selection, mapping, database development, and statistical analysis for permitting; in siting studies, generated models and utilized decision analysis to identify optimal sites for power facilities including many CSP/PV solar sites with minimal impact and maximum profit for power clients and local/regional governments; Conducted multi-attribute utility assessments for projects like SMUD CSP/PV siting, PV siting in the San Joaquin Valley, and RETI mapping reproduction.
- Performed detailed audits of DOD assets with a focus on as-built project documentation.
- Expert in managing spatial datasets, including shapefiles, geodatabases, and LiDAR. Conducted advanced GIS analysis using Esri tools for 3D terrain assessments, elevation modeling, Visual Assessments and data conversion.
- Utilized QA/QC processes and visualized analytical data using contour plotting for refinery and Superfund site projects.
- Developed GIS workflows with environmental scientists and geologists to manage field data, QA/QC, and spatial analysis for refinery projects and EPA Superfund sites in the LA Metro region, Santa Barbara, and Kern County.
- Successfully managed GIS deliverables for the landmark Tehachapi Renewable Transmission Project, coordinating multiple URS offices and an external consultant to support the connection of Antelope Valley's renewable energy to the Los Angeles Basin and San Bernardino.
- Mapped dig site surveys for the Freeport McMoran (FMOG) pipeline and completed the GIS portion of a Phase V for the FMOG Arroyo Grande Oil Field.

GIS Specialist

URS Corporation, an AECOM company | Tallahassee, FL | Jun 1998-Jun 2001

- Provided GIS support to the Traffic Group, creating numerous ArcView maps for Florida's Turnpike, Florida District 2, Louisiana DOT, and other transportation-related projects, including projecting traffic trends and volumes, mapping hurricane evacuation routes, Traffic Analysis Zones (TAZs), environmental impacts and demographics (Census data).

GIS Technician

Florida Natural Areas Inventory (FNAI) | Tallahassee, FL | Apr 1992-Jun 1998

- GIS support and products, such as maps and data, were provided for the Florida Department of Environmental Protection.
- Tasks included interpreting and processing ecological and Threatened and Endangered Species information from various sources to conform within a statewide database.
- Digitized and edited FNAI's element occurrence records, created maps and shapefiles, and fulfilled data requests using ArcInfo and ArcView.
- Led GIS support and assisted biologists in a 5-year ecological survey at Eglin Air Force Base, developing GIS-based ecological condition tiers and conducting GPS ground truth surveys. Liaisoned with FNAI and Eglin AFB's staff.

EDUCATION

Bachelor of Arts: Geography | Florida State University | Tallahassee, FL | Jun 1991
