Azure Cloud Administrator Certified

✉ ansarifah@gmail.com

☎ 614-517-8581

I am a highly passionate, determined, and result-oriented platform solution architect with expertise in designing and deploying big data and K8s infrastructure in on-premise, hybrid, and multiple cloud environments. My solutions have helped customers navigate big data, analytics, and data management journeys.

Core Qualifications

- Terraform for Azure
- Starburst Presto Deployment with AKS
- Azure Cloud Administration
- Azure AKS deployment and Troubleshooting
- Azure DevOps
- GitHub, Azure GitHub repo management
- Unity Catalog Deployment and Management
- AKS cluster administration and maintenance
- Data Bricks administration
- CDH/CDP Deployment using Ansible
- CDP Public Cloud deployment
- CDP Security Deployments
- Data Migration using Replication Manager
- Big Data Issues Troubleshooting
- Ansible for cluster management and Shell Scripting
- Customer Management
- Team Management and Mentoring

Technical Skills

- Cloud Platform: Microsoft Azure Cloud expertise, GCP, AWS Cloud, and On-premises
- DevOps: Terraform, Azure DevOps, Docker, Git, Github, Helm, Kubernetes, Azure Kubernetes Service, OpenShift, Ansible, and Shell Scripting
- SQL Query Engine: Starburst Presto Implementation, Deployment, and Troubleshooting Issues
- Big Data and Hadoop Framework: Apache Hadoop Framework, Cloudera Data Platform CDP Private Cloud, CDP Public Cloud, CDH, CDP Private and Public Cloud, HDInsight Distribution
- Security: Ranger, Knox, and AD Implementation with RHEL and CentOS. MIT KDC Kerberos with Master-Slave configuration. Knox implementation with AD/LDAP to access Web UI's
- Database: MySQL, PostgreSQL, and Azure PostgreSQL Server
- Build tools: Ant, Maven
- Scheduler: ControlM, Crontab.
- Operating System: RHEL, CentOS, Ubuntu, Windows. Windows Server 2008/2012 R

Work EXPERIENCE

TCS: Plano-Tx

July 2024 to Present

End Customer: Wells Fargo

- I have 2+ years of experience developing the Terraform configuration for Azure and AWS cloud.
- I have 4+ years of hands-on experience as a Kubernetes Administrator(k8s).
- I have worked on creating the Terraform modules for the different services, such as Azure storage account for (blob and ADLs). Azure Data Factory, Azure Key Vault, SQL Server, etc.

- Currently working on creating the modules for AKS, virtual machine modules, Azure App Insights, Azure Container Registry..
- I have a good hands-on experience with a self-managed Kubernetes cluster.
- I have a solid understanding of the K8s and AKS architecture.
- I have a good understanding and hands-on experience managing and administering the K8s service, deployment, replicasets, secrets, and Ingress, etc.
- I have worked closely to deploy the different types of applications in the self-managed K8S cluster.
- Managed cluster lifecycle, including installation, upgrades, scaling, and troubleshooting.
- I have worked on deploying the AKS using Azure CLI using the service principal.
- Managing the different GitHub repos for the yamls.
- Providing access to the user on GitHub for the different repos and branches.
- I have an excellent understanding of the Deployment and services in K8s or AKS.
- I have worked on performing the version upgrade from 1.29 to 1.30.
- Managed node pools, auto-scaling (HPA), and cluster upgrades with minimal downtime.
- Configured Azure CNI/Calico for secure networking and optimized pod-to-pod communication.
- Administered multi-tenant Kubernetes clusters with RBAC, Namespaces, and Quotas for resource isolation.
- Troubleshoot cluster performance issues.
- Managed etcd backups and disaster recovery strategies for Kubernetes clusters.

Intellitask LLC

April 2024 to July 2024

- I have been working on setting up the AKS cluster.
- I worked on creating and maintaining the AKS with different applications deployed.
- I have worked on deploying the AKS cluster using a service principal-based approach.
- Deploying Apache Presto/Starburst Presto with AKS and troubleshooting the Presto-related issues.
- I have worked on creating the RABC for the namespace.
- I have worked with the development team to help them access the Starburst Presto Web UI.
- I have worked on setting up a catalog in Starburst.
- I have good hands-on experience with ACR connectivity with AKS.

Cloudera Inc

August 2022 - Feb 2024

Responsibilities

- I was a senior solution consultant in big data and the cloud with the professional services team.
- Capacity Planning and Cluster layout for a big data platform per customer requirement.
- I have worked on design and end-to-end implementation using Ansible for CDP Private and Public Cloud.
- CDH to CDP Public Cloud (Azure and GCP) deployment and Data Migration.
- I worked on the CDH to CDP Private Cloud Base Sidecar migration.
- I have worked on the Deployment of AKS and k8s on-premise with REHL.
- I have worked on upgrading the AKS on Azure.
- I have worked as a K8s admin to manage and maintain the K8s cluster, creating different YAML configurations, and the PV and PVC.
- I have worked on deploying the AKS cluster using a service principal-based approach.
- Deployment of Apache Airflow with AKS and troubleshooting the Airflow-related issues.
- I have worked on creating the RABC for the namespace.
- I have worked with the development team to help them access the Airflow and schedule the job.

- Data Migration via Replication Manager.
- I worked on multiple in-place upgrades from CDH to CDP Private Cloud Base and CDP upgrades, as required by customers.
- I have worked on troubleshooting the delay issue on CDH and CDP clusters.
- I have worked on configuring the Ozone file system in CDP Private Cloud Base for Hive and Impala.
- Performance optimization, health monitoring, backup & recovery across one or more customers.
- I have written a shell script to meet the Apache web Server deployment requirements. It includes log rotation, data copy, rsync, etc.

Abzooba Inc

PepsiCo

Nov-2021 – August 2022

Responsibilities

- I have worked as a Platform Solution Architect in Big Data and Cloud practices with Abzooba Inc.
- I have worked as an Azure SME for Azure AKS and Starburst SME, helping clients with their analytics journey.
- Azure Kubernetes Private cluster deployment for the QA, Test, UAT, and Production cluster using the Service principal was later converted with managed identity.
- Deploy the different applications in Azure Kubernetes services.
- I have worked on troubleshooting the AKS-related issue.
- Managing and maintaining the different k8s manifest files with the GitHub source code control.
- I have worked on creating the RBAC for the namespaces.
- Creating and managing the secrets in k8s. I have worked on developing different services for AKS to expose the application to the end user.
- I have performed multiple Azure Kubernetes Service upgrades.
- Azure Kubernetes Service administration, creating namespaces with the Kubectl tool, creating a node pool via the Azure portal, and command. Syncing the user credentials to access the Azure AKS and setting up connectivity with Azure ACR to Azure Kubernetes Service.
- I have worked on deploying the Azure Container Registry Azure Container Instances and provided support for troubleshooting the issues.
- Designed and Implemented the Azure DevOps pipeline for the Infrastructure creation for ADLs Gen2, ADF, Key Vault, and Database servers via Terraform.
- I have played the lead roles for Terraform and Azure DevOps to manage and maintain the source code on Azure GitHub and manage state files for the environment.
- I have a good understanding of the build tools such as Ant and Maven to troubleshoot the build-related issues.
- I have a good understanding of Python2 and Python3 to install different packages and troubleshoot the issues.
- I have worked on creating multiple Azure DevOps pipelines for the infrastructure creation.
- I have experience deploying the Starburst with Helm.
- I understand how to write the YAML manifests file and how to troubleshoot the YAML issues.
- I have a good understanding of Istio service mesh.
- I have good hands-on experience with open-source K8s as well.
- Adding the Starburst Catalog as per the client's requirement.
- I have worked on deploying Log Analytics and provided support in the Kusto query language.
- I have up to 12+ years of experience as a platform engineer/administrator/platform lead, emphasizing Big Data and container Technologies.
- I have hands-on experience in creating tables and restoring them with the help of DDLs.

- I helped the team finalize the project flow, working closely with the project build and support teams to inform and provide guidance about all the running and upcoming projects.

Abzooba India Infotech PVT LTD

Oct-2018 – 26th Nov 2021

Customer Name: PepsiCo

Roles and Responsibilities

- Worked as Platform Lead in Big Data and Cloud practices with Abzooba India PVT LTD.
- 12+ years of experience with emphasis on Big Data Technologies as a Platform Engineer/Administrator/Platform Lead.
- Excellent understanding/knowledge of Hadoop architecture (1. x and 2. x) and various components such as HDFS, Yarn, NameNode, DataNode, MapReduce, Zookeeper, etc.
- I have worked with developers to debug and troubleshoot SQL job-related issues.
- I have a good understanding of SQL queries.
- I have good hands-on experience with Linux troubleshooting.
- Setting up an Azure CLI in RHEL and Ubuntu.
- Good hands-on experience in hadoop security like Kerberos, Ranger, and Knox
- I have worked on setting up the HDInsights cluster with Enterprise deployment.
- I have worked on data migration from Blob to ADL's gen2.
- Configure fully distributed node clusters in the AWS cloud.
- Commissioning and Decommissioning of nodes as per the client's requirement.
- Managed and monitored hadoop services like Namenode, Data node & Yarn.
- Performance tuning and solving hadoop issues using CLI or WebUI.
- Configure MySQL database for Hive, Ranger, and Oozie.
- Report generation of running nodes using various benchmark operations.

Hashmap Tech India PVT LTD (May 2016 - Sep 2018)

Roles and Responsibilities

- I worked as a Hadoop administrator at Hortonworks and Cloudera Distribution.

H2 Technology (March 2014 – April 2016)

Roles and Responsibilities

- Responsible for deploying HDP and Ambari on AWS Cloud.
- Monitoring and managing the cluster.
- Creating bucket and EC2 instance as per the client's request.
- Troubleshooting the web UI issues.
- I worked with the Hortonworks team on the required cases.
- Troubleshooting the issues on CLI.
- Service Now ticketing tool for clients and internal tracking Github.
- Set up the Single node and Multinode Apache hadoop cluster on VM and AWS cloud.
- Ambari 2.1 and HDP 2.2 in a production environment.
- Database: MySQL.

Anvil Technology (Dec 2011 – Feb 2014)

Roles and Responsibilities

- Worked as IT Support Specialist.
- Worked as a testing and debug engineer for installing VMs and Linux.
- Worked on HTML, C, and ASM language.

Education

Master of Science: Electronics & Automation Industries, July 2011.

AKI's Poona College of Arts, Science and Commerce, University of Pune, India.

Training and Certifications

- HashiCorp Certified: Terraform Associate
- Azure Certified Administrator
- Google Cloud Administrator Certified

Accomplishment

Abzoobian of the Month February 2019.

CLOUDERA Code Awards in October 2022
