📄 Green Card

Summary

- Results-driven **Senior Salesforce Developer & DevOps Engineer** with **12+ years of experience** designing, developing, and deploying **enterprise-level Salesforce solutions** across industries like **insurance, healthcare, and financial services**.
- Adept at **Salesforce customization, automation, and integration**, with expertise in **Sales Cloud, Service Cloud, CPQ, Tableau CRM, and Experience Cloud**. Strong background in **Apex, Lightning Web Components (LWC), MuleSoft, and REST/SOAP API integrations**, ensuring seamless data flow and system connectivity.
- Proven success in **CI/CD automation using Copado, GitHub Actions, and Jenkins**, optimizing deployment workflows. Experienced in **leading development teams, implementing security best practices, and driving system scalability**.
- Key Achievements:**
 - Migrated Salesforce Classic to Lightning** at **New York Life Insurance**, modernizing the UI with **Lightning Web Components (LWC)** and improving performance by **30%**.
 - Implemented Salesforce CPQ at UnitedHealth Group (UHG)**, streamlining the **Order-to-Cash process** and reducing quote generation time by **40%**.
 - Developed and integrated a custom Salesforce CMS for Geico**, enhancing **content management, marketing automation, and database functionalities**, improving **team efficiency by 25%**.
 - Led large-scale data migrations using Data Loader and MuleSoft**, ensuring **99.9% data integrity** across Users, Accounts, Leads, and Quotes.
 - Automated CI/CD pipelines with Copado, GitHub Actions, and Jenkins**, cutting deployment time by **35%** and reducing manual errors.
 - Integrated Salesforce CRM with Siebel, policy management, and accounting systems** across multiple roles, optimizing **cross-platform data synchronization**.
 - Reduced case resolution time by 20%** by implementing **Service Cloud Email-to-Case, Omni-Channel Routing, and Chatter for real-time collaboration**.
 - Developed and optimized API-based integrations at Insurity and TrueBlue Inc.**, leveraging **REST, SOAP, and Boomi**, ensuring seamless connectivity with external platforms.
 - Trained and mentored Salesforce developers and admins**, improving **team productivity and adherence to best coding practices**.

Skillset

- Salesforce Products:** Sales Cloud, Service Cloud, Tableau CRM, CPQ, Pardot, Experience Cloud
- Salesforce Industries:** Financial Services Cloud (FSC), Commerce Cloud, Health Cloud
- Salesforce Development:** Lightning Web Components (LWC), Apex Classes & Triggers, Visualforce, APIs, FSL
- Salesforce Customization:** Flows, Validation Rules, Data Modeling, Email Services, Lightning Pages
- Other Salesforce Features:** Einstein, CTI, SSO, Bots, Knowledge, Shield
- Programming Languages:** Apex, Java, JavaScript
- Web Development:** HTML 5, CSS 3, NodeJS, jQuery, JSON, AJAX
- Software Development:** Agile Methodology, Code Quality, DevOps
- Integration Development:** Boomi, REST API, SOAP API, Integration Patterns

Professional Experience

Sr. Salesforce Developer, *Geico*

Dec 2022 – present | Houston, TX

- Developed a custom Salesforce CMS** with **advanced form generation, marketing automation, social networking, and database marketing** functionalities, ensuring seamless user experience and enhanced content management.
- Implemented and customized Service Cloud**, configuring **Email-to-Case, Case Assignment Rules, and Omni-Channel Routing**, improving customer support efficiency.
- Designed automated workflows** for **lead routing, escalation alerts, and coaching plans**, streamlining sales and customer support processes.
- Customized Salesforce UI and tabs** for diverse business units using **Apttus CPQ**, optimizing **pricing, quoting, discounts, and incentive calculations**.
- Executed large-scale data migrations** using **Data Loader** for objects like **Users, Accounts, Leads, Contacts, Campaigns, and Quotes**, ensuring data integrity.
- Integrated Salesforce CRM with legacy systems** using **MuleSoft and Cast Iron**, enabling seamless data synchronization between **Salesforce and Siebel**.
- Enhanced collaboration via Salesforce Chatter**, enabling **real-time notifications** and fostering better team communication across departments.
- Implemented security and compliance best practices**, providing **data access reports, role-based access control, and ensuring GDPR & SOC compliance**.
- Automated deployments using CI/CD pipelines**, leveraging **Copado, GitHub Actions, and Change Sets**, reducing deployment time and minimizing manual errors.
- Developed and tested Apex Triggers, Classes, and Batch Jobs**, optimizing Salesforce application performance and scalability.
- Created and maintained MuleSoft integrations**, designing **asynchronous flows, OAuth2-secured APIs, and HTTP outbound orchestrations**, deploying Mule ESB applications **on-premises and in CloudHub**.
- Led regression and unit testing** using **Junit and SOAPUI**, ensuring **data integrity, application stability, and performance efficiency**.
- Supported internal users** by **troubleshooting issues, creating reports, and providing hands-on Salesforce training**, improving adoption and usability.

Senior Salesforce Tech Lead Developer/DevOps Engineer, *UnitedHealth Group (UHG)*

Jun 2020 – Nov 2022 | Minnetonka, MN

- Led end-to-end Salesforce application development**, from **requirement analysis, design, development, testing, deployment, and support**, ensuring alignment with business objectives.

- **Designed and architected Salesforce solutions**, implementing **Apex, Visualforce, Lightning Web Components, and declarative tools (Process Builder, Workflow Rules)** to meet complex business needs.
- **Managed Salesforce customization and configuration**, optimizing **objects, fields, page layouts, security settings, reports, and dashboards**, improving user experience.
- **Implemented Apttus CPQ for subscription, billing, and invoicing**, streamlining the **Order-to-Cash process** and enhancing revenue management.
- **Integrated Salesforce with enterprise systems** using **APIs, middleware (MuleSoft, Cast Iron), and ETL tools**, ensuring seamless data exchange and process automation.
- **Developed and executed CI/CD pipelines** using **Copado, GitHub Actions, and Jenkins**, automating deployments and improving release efficiency.
- **Led a team of Salesforce developers and administrators**, mentoring on **best practices, code quality, and technical problem-solving**, enhancing team productivity.
- **Configured and optimized Field Service Lightning (FSL)**, setting up **service resources, territories, work orders, and appointment scheduling**, improving field operations efficiency.
- **Built and maintained Salesforce CPQ pricing strategies**, implementing **list, cost markup, percent total, block, price rules, calculator plugins, and discount models**, enhancing sales effectiveness.
- **Managed release and deployment processes**, setting up **testing workflows, automated regression testing with Jasmine, JIRA, and Selenium**, ensuring smooth production transitions.
- **Developed test automation suites for SOAPUI, regression testing, and negative testing**, reducing defect rates and improving application stability.
- **Monitored and maintained Salesforce platform performance**, troubleshooting system issues and optimizing data flows to ensure high availability.
- **Ensured compliance and security** by implementing **role-based access controls, security policies, and generating compliance reports**, aligning with regulatory standards.
- **Stayed ahead of Salesforce innovations**, evaluating new features and driving **continuous improvement initiatives**, enhancing application performance and scalability.

Senior Salesforce Developer, TrueBlue Inc.

Nov 2019 – Jun 2020 | Tacoma, WA

- **Developed a custom Salesforce CMS**, integrating **advanced form generation, marketing automation, social networking, and database marketing functions**, improving content management capabilities.
- **Implemented and customized Service Cloud**, configuring **Email-to-Case, Case Assignment Rules, and Omni-Channel Routing**, enhancing customer service workflows.
- **Designed and automated lead management workflows**, developing **custom routing, lead escalation, and alerts**, increasing sales efficiency.
- **Configured and customized Salesforce UI**, modifying **tabs, page layouts, and user groups** to align with business requirements. Integrated **Apttus CPQ** to optimize **pricing, quoting, discounts, and proposal generation**.
- **Executed large-scale data migration** using **Data Loader**, transferring data for **Users, Accounts, Leads, Contacts, Campaigns, and Quotes**, ensuring data accuracy and integrity.
- **Integrated Salesforce with legacy systems** using **Cast Iron and MuleSoft**, enabling seamless **data synchronization and process automation** between **Salesforce and Siebel**.
- **Enabled real-time collaboration via Salesforce Chatter**, improving **cross-functional team communication and notifications**.
- **Developed and tested Apex Triggers, Batch Jobs, and Classes**, ensuring optimized **code performance and scalability**.
- **Led deployment activities**, utilizing **Change Sets, Eclipse, and Sandbox environments** to test and release code to production with minimal disruptions.
- **Strengthened security and compliance**, defining **role-based access, data security policies, and compliance reports**, ensuring regulatory adherence.
- **Implemented automated testing frameworks**, creating **SOAPUI test suites, Junit regression tests, and SQL-based data validation scripts**, improving software reliability.
- **Developed and deployed Mulesoft integrations**, designing **asynchronous flows, OAuth2-secured APIs, and HTTP outbound orchestrations**, optimizing system interactions.
- **Automated CI/CD pipelines using Copado and GitHub Actions**, streamlining **Salesforce metadata validation and deployment processes**, reducing release cycle times.
- **Provided internal user support and training**, troubleshooting **application issues, generating reports, and assisting users**, increasing adoption and usability.

Senior Salesforce Developer, Insurity

Jan 2018 – Oct 2019 | Hartford, CT

- **Designed and implemented a centralized customer database** within **Salesforce**, integrating data from **lead generation systems, policy management, and customer service platforms**, enabling **360-degree customer visibility** and personalized interactions.
- **Automated end-to-end sales processes** using **Salesforce Sales Cloud**, streamlining **lead management, opportunity tracking, quoting, and policy creation**, reducing manual efforts and accelerating the sales cycle.
- **Leveraged Salesforce Marketing Cloud** to design and execute **targeted marketing campaigns**, implementing **lead nurturing, segmentation, email marketing, and campaign tracking**, improving customer acquisition and conversion rates.
- **Enhanced customer service operations** by implementing **Salesforce Service Cloud**, enabling **efficient case management, ticketing, and knowledge base management**, improving response time and customer satisfaction.
- **Developed customized reports and dashboards** for **sales, marketing, and customer service teams**, providing **real-time insights into key performance indicators (KPIs)** and supporting data-driven decision-making.
- **Executed ETL and SQL testing**, developing **test scenarios, positive and negative test cases, and ETL routines** to validate data accuracy, leveraging **HP ALM/Quality Center and JIRA** for **test management and defect tracking**.
- **Integrated Salesforce with enterprise systems**, including **policy management, accounting, and document management platforms**, ensuring **data consistency and eliminating duplicate entries** to enhance operational efficiency.
- **Deployed and configured Salesforce security settings**, ensuring **role-based access control, compliance reporting, and data privacy policies** in alignment with industry standards.
- **Conducted Salesforce user training sessions**, developing **comprehensive onboarding materials, hands-on workshops, and ongoing support programs**, increasing platform adoption across teams.
- **Optimized system performance** through **data deduplication, validation rules, and automated workflows**, improving overall system efficiency and user experience.

Salesforce Developer, *New York Life Insurance*

Mar 2016 – Dec 2017 | New York, NY

- **Led the migration from Salesforce Classic to Lightning**, analyzing **existing functionalities, user workflows, and business requirements** to enhance user experience.
- **Developed and customized Lightning Components and Lightning Pages**, leveraging **Aura Components and Lightning Web Components (LWC)** to modernize the UI.
- **Refactored and optimized Apex Classes, Triggers, and Visualforce Pages**, ensuring **seamless compatibility with the Lightning framework** and improving system performance.
- **Conducted gap analysis and designed a migration strategy**, collaborating with **stakeholders, developers, and administrators** to ensure a **smooth transition** with minimal disruption.
- **Implemented automation solutions using Process Builder, Workflow Rules, and Flows**, streamlining **approval processes and reducing manual interventions**.
- **Executed rigorous testing strategies**, performing **unit testing, integration testing, and user acceptance testing (UAT)** to validate the stability and functionality of migrated components.
- **Gathered feedback from end users**, iterating and enhancing Lightning components to improve usability and business alignment.
- **Integrated third-party applications via REST and SOAP APIs**, ensuring **seamless data exchange and process automation** within the Salesforce ecosystem.
- **Provided training and documentation for Salesforce Lightning adoption**, educating users on **new features, navigation, and best practices**, increasing overall platform utilization.
- **Monitored and optimized system performance**, addressing **performance bottlenecks, debugging issues, and enhancing Lightning UI responsiveness**.

Salesforce Developer, *Oloop Technology*

Oct 2013 – Sep 2015 | Hyderabad, TG, India

- **Analyzed complex client requirements**, identifying **Salesforce solutions** to align with business objectives and enhance system efficiency.
- **Documented business flow processes and created user stories** using **Agile Accelerator**, improving communication between stakeholders and the development team.
- **Designed and implemented Salesforce customizations**, configuring **custom tabs, validation rules, approval processes, and workflow rules** to streamline business operations.
- **Automated key workflows** by developing **email alerts, field updates, time-dependent actions, and API message handling**, reducing manual interventions and improving response times.
- **Developed and integrated Salesforce with external platforms**, enabling **seamless data exchange between Salesforce and third-party applications** through **REST and SOAP APIs**.
- **Engineered Apex-based custom business logic**, leveraging the **Force Migration Tool and Web Services API** to extend platform functionality.
- **Implemented case management solutions**, developing **auto-assignment and escalation rules**, ensuring timely and efficient customer support resolution.
- **Optimized lead management processes**, integrating **email marketing lead capture, website-based lead qualification, and automated lead conversion workflows** to increase sales efficiency.
- **Managed deployment and version control**, utilizing **Force IDE, ANT, JIRA, Rally, and SVN** to package and migrate customizations across environments.
- **Enforced security best practices**, managing **user roles, organization-wide defaults, record access, and sharing models**, ensuring data protection and controlled system access.
- **Implemented Email-to-Case functionality**, enabling **automated case creation via customer email submissions**, improving support request handling.
- **Executed data reconciliation strategies**, identifying and resolving inconsistencies in **client data to maintain business accuracy and system integrity**.
- **Engaged with clients for requirement gathering**, conducting **stakeholder meetings and feedback sessions** to ensure seamless project execution and delivery.

Java Developer, *4D Animations Pvt. Ltd.*

May 2012 – Sep 2013 | Hyderabad, TG, India

- **Developed the iHUB (Integration Hub) web application** using **Struts framework, JSP, and HTML**, serving as a **centralized interface for initiating processes** in the animation pipeline.
- **Designed and implemented a web framework** following the **MVC (Model-View-Controller) pattern**, leveraging **Front-Controller design principles** for streamlined request handling.
- **Created user interface components** using **JSP, Struts, custom tag libraries, and form beans**, allowing users to **configure and manage their preferences** efficiently.
- **Developed and optimized ANT scripts**, automating **build processes, binary file generation, and deployment scripting**, reducing manual overhead.
- **Implemented Quiet Time Alerts architecture**, leveraging **Message Broker infrastructure**, reducing project timelines by **400 man-hours**.
- **Built interactive user interfaces** using **JSP, HTML, XML, and JavaScript**, ensuring **seamless user experience and responsiveness**.
- **Engineered XML-based data processing solutions**, generating **XML schemas, utilizing XML Beans, and parsing XML files for data transformation**.
- **Designed and optimized database structures**, normalizing **Oracle databases** and implementing **stored procedures, functions, and complex SQL queries** for **DB2/AS400 and SQL Server** databases.
- **Integrated secure web services** by invoking **Message flows through an XML gateway**, ensuring **reliable system communication**.
- **Collaborated with infrastructure teams** during the **deployment and configuration of Message Broker**, troubleshooting **environmental issues to maintain system stability**.

Education

Masters in Computer Science | Grade: A+, *Wilmington University*

2017 – 2018 | New Castle, DE

Bachelors in Computer Science | Grade: A, *JNTUH College of Engineering*

2008 – 2012 | Hyderabad, India

Certificates

Salesforce Certified Administrator (SCA) ☑ — Issued Jul 2019 | Salesforce Certified Platform Developer (PD1) ☑ — Issued Jul 2019 |

Salesforce Platform App Builder ☑ — Issued Jul 2019
