

CASEY SHEA

GIS Analyst

PROFESSIONAL SUMMARY

GIS Analyst with extensive experience in data visualization and spatial analysis, employing Python, R, ArcGIS, and QGIS to craft innovative solutions that enhance decision-making. Demonstrates a strong ability to streamline processes and boost productivity through the development of advanced web maps and Spotfire dashboards. Committed to pioneering data-driven strategies that drive efficiency and strategic insights.

EMPLOYMENT HISTORY

INDEPENDENT GIS ANALYST/DEVELOPER

2022 - Present

- ◆ Designs web maps for Appalachian well data analysis, enhancing decision-making capabilities
- ◆ Develops Spotfire dashboards for seamless data access, improving efficiency
- ◆ Creates maps for oil and gas basin insights, aiding geologic consulting
- ◆ Analyzes EPA data for carbon sequestration trends, informing strategic planning
- ◆ Automates billing with Airtable, cutting processing time significantly

BANQUET SUPERVISOR

2019 - Present

Crowne Plaza Knoxville

Knoxville, TN

- ◆ Lead event teams, achieving high client satisfaction and repeat business
- ◆ Enhance team communication and collaboration for seamless event execution
- ◆ Motivate diverse teams, fostering a positive work environment and improved productivity
- ◆ Customize events to client needs, boosting repeat business
- ◆ Develop billing spreadsheets for precise financial analysis and reporting

EDUCATION

BACHELOR OF SCIENCE IN GEOGRAPHIC INFORMATION SCIENCE & TECHNOLOGY

May 2025

University of Tennessee, Knoxville

Knoxville, TN

SKILLS

Reporting, Data Visualization, Spatial Databases, Data Analysis, Data Collection, Remote Sensing, Cartography, ArcGIS, QGIS, Spotfire, Tableau, Airtable, R, Python, SQL, Team Leadership, Project Management, Statistical Analysis, Problem Solving, Process Improvement.

LANGUAGES

English (*Native*), Spanish (*Novice*).

ADDITIONAL INFORMATION

GIS PROJECTS

- Created web maps to enable companies to easily analyze well data throughout Appalachian regions
- Developed dashboards linked to company database for efficient data access using Spotfire
- Produced map to highlight major oil and gas basins for geologic consulting
- Sourced and analyzed EPA data on emitters to draw geographic conclusions on carbon sequestration hotspots
- Prepared and presented well data analysis reports to management
- Automated billing processes using Airtable, reducing overall time to complete tasks
- Created maps for effective terrain analysis using processes such as watershed delineation
- Automated processes and created maps using programming languages R, Python and SQL
- Worked with team to execute numerous well-received geospatial analysis projects
- Effectively communicated results from geospatial data-related research projects
