

RESUME

CHANDRA SEKHAR ATCHUTA

Tel : +1 804-519-9510

Email: chandrasekhar.atchuta@gmail.com

PROFESSIONAL SUMMARY:

- **Production Support Engineering:** Over 11 years of experience in production and application support within the Banking and Telecom domains, focusing on ensuring high availability, system stability, and minimizing downtime. Proficient in incident management, root cause analysis, performance optimization, and effective service delivery.
- **System Monitoring & Incident Management:** Expertise in managing production environments, resolving high-priority incidents, and providing timely solutions within the SLA through effective ticketing systems (e.g., ServiceNow, Happy Fox). Skilled in using monitoring tools to proactively detect issues and optimize system performance.
- **Database & Performance Optimization:** In-depth knowledge of SQL performance tuning, including indexing, query optimization, and database health checks to enhance system reliability. Hands-on experience with Oracle, MSSQL, MySQL, and PostgreSQL.
- **Cloud & Infrastructure Support:** Experienced in supporting cloud infrastructure across Microsoft Azure and AWS environments, ensuring smooth application performance, and providing on-call support for critical issues.
- **Process Improvement & Automation:** Proven track record of identifying opportunities for automation, process improvements, and streamlining production workflows to improve service reliability and efficiency.
- **Technical Proficiency:** Skilled in various web applications, including Apache Tomcat, and tools like Azure DevOps, Jira, and Confluence for managing production support tasks.
- **ITIL & Best Practices:** Well-versed in ITIL processes for incident management, problem resolution, and change management, with a strong focus on adhering to best practices to ensure operational excellence.
- **Recognition & Achievements:** Awarded Valuable Contribution of the Year at Pennant Technologies (2019) and Best Performer of the Year at Intense Technologies (FY 2015-16).

SKILLS

- Database : MySQL, Oracle, Microsoft SQL Server, Postgres SQL.
- Cloud Services : Azure, AWS
- Middleware : Apache Tomcat
- ETL Tools : SSIS, Azure Data Factory, Oracle Data Integrator (ODI)
- Reporting Tools : Power BI
- Project Management : Jira, Confluence
- DevOps Process : Azure DevOps
- Ticketing Tools : Service Now, Happy Fox

- Environments : Windows, UNIX/Linux

CERTIFICATIONS:

- Microsoft Certified: Azure Fundamentals.
- AWS Certified Cloud Practitioner.

WORKING EXPERIENCES:

Praval Infotech Private Limited (Jul 2023 – Feb 2025)

Role: Technical Lead – Production Support

- Led production support initiatives, ensuring smooth deployment processes and continuous system stability.
- Collaborated with the development and operations teams to resolve production incidents quickly, minimizing downtime.

Technovert Solutions Private Limited (Mar 2023 – Jun 2023)

Role: Technical Lead – Application Support

- Managed production environments, monitoring system health, and resolving incidents in a timely manner to ensure optimal service delivery.

Pennant Technologies Private Limited (Nov 2018 – Dec 2022)

Role: Team Lead – Production Support

- Oversaw production support for critical financial applications, focusing on resolving incidents, system optimization, and process improvements.
- Managed customer escalations and coordinated with cross-functional teams for resolution.

Intense Technologies Limited (Sept 2015 – Oct 2018)

Role: Team Lead – Application Support

- Responsible for troubleshooting production issues, managing incident queues, and performing root cause analysis for issues in telecom applications.

Conrep Solutions Private Ltd (Jan 2015 – Sept 2015)

Role: Engineer – Production Support

- Supported mission-critical applications, ensuring system uptime and performance monitoring for internal and external users.

Bartronics India Limited (Jan 2014 – Dec 2014)

Role: Engineer – Application Support

- Monitored system health, resolved production incidents, and collaborated with the development team to optimize application performance.

MAJOR PROJECTS HANDLED:

Project 1: DLR-BI (Jul 2023 – Jan 2025)

Client: Digital Realty

Role: Technical Lead – Cloud Services

- Led the production support efforts, ensuring high availability and stability of cloud services, creating ETL packages for data integration, and supporting Power BI report generation.

Project 2: pennApps Lending Factory (Nov 2018 – Dec 2022)

Client: Avanse Financial Services

Role: Team Lead

- Supported production applications, ensuring seamless functionality of the lending platform while troubleshooting critical incidents.

Project 3: Onboard (Sep 2015 – Jul 2016)

Client: 9 Mobile Nigeria

Role: Team Lead

- Ensured high availability of the centralized application used for customer onboarding and SIM activation, resolving issues and optimizing system performance.

Project 4: Onboard (Jul 2016 – Oct 2018)

Client: Reliance JIO

Role: Team Lead

- Managed production support for the onboarding system, coordinating with multiple teams for issue resolution and process improvements.

Project 5: Conrep Application (Jan 2015 – Sep 2015)

Client: USM Technologies

Role: Support Engineer

- Supported production environments, ensuring the application met high availability and performance standards.

Project 6: Attendance Management System (Jul 2014 – Dec 2014)

Client: Vedanta Aluminum Ltd.

Role: Support Engineer

- Managed the production environment, ensuring smooth system operations for attendance tracking and payroll processing.

Roles and Responsibilities: -

- Monitor and manage ticket queues, including tickets generated from Happy Fox, ServiceNow addressing issues related to job scheduling and resolution.
- Perform routine system health checks, database maintenance, and script enhancements to ensure system optimization and availability.
- Conduct data gathering, cleansing, and importing/exporting in various formats, ensuring data integrity throughout the ETL process.
- Verify data in the target database, collaborating with BA & Development teams to resolve issues and ensure alignment with client requirements.
- Interact directly with clients to understand their requirements and provide tailored resolutions for technical and functional queries.
- Provide support for user queries through multiple channels, including email, chat (Interchange), and phone.
- Coordinate with multiple teams during weekend or late-night deployments, including post-implementation release checks and follow-up actions.
- Manage multiple concurrent projects and tasks, meeting aggressive deadlines while ensuring high-quality delivery.
- Analyse complex technical problems and use innovative solutions to enhance system performance and operational efficiency.

- Ensure compliance with Service Level Agreements (SLAs) and maintain high standards of documentation and reporting.
- Collaborate closely with cross-functional teams, including BA and Dev teams, to resolve issues and streamline processes.
- Regularly report testing status, project progress, and any potential concerns to stakeholders.

EDUCATION:

- Bachelor of Technology (Computer Science and Engineering), JNTU Kakinada - 2012.
