Experience

New Paltz Marketing - Software Engineer, NY, USA

05/2024 - Present

- Developed full-stack marketing systems using React, Java, Spring Boot, and JavaScript to support ML pipelines, improving development speed by 40%.
- Deployed real-time prediction APIs via GCP, enabling 24/7 automated insights for marketing teams.
- Led peer reviews and backend performance optimization. Partnered with PMs to design dashboards used for ad spend decisions.

SUNY New Paltz - Teaching Assistant, NY, USA

08/2022 - 05/2024

- Designed a course recommendation tool using React, TypeScript, and Vertex AI, used by 300+ students each semester for academic planning.
- Developed grading automation scripts in Python, PyTest that saved grading hours for faculty.

Wipro Limited - Project Engineer, India

08/2021 - 07/2022

- Led full-stack development of an anomaly detection system for 80M+ billing records using Java, identifying fraud and reducing revenue loss by 15%.
- Designed secure, compliant cloud solutions with logging, authentication, and disaster recovery protocols, supporting enterprise audit readiness.
- Designed GCP-based microservices pipeline with real-time alerts for high risk financial transactions.

ITC Limited - Software Engineer, India

08/2019 - 05/2021

- Developed forecasting systems for crop demand and supply chain logistics, contributing to budget planning and cost optimization using Python and Scikit-learn.
- Built scalable ETL workflows using GCP Airflow to process highvolume market data.
- Launched automated dashboards surfacing 5 -10% savings in logistics and supply chain costs.

Projects

AI-Powered Developer Productivity Agent

- Built React frontend, FastAPI backend to auto-refactor Python code, suggest test cases and auto-update documentation, and reduce review time by 30%.

Intelligent Support Agent

- Created FastAPI backend, React tool using Hugging Face, retrieval pipeline for FAQ support.
- Used Azure Functions and caching for scalable response generation and low latency.

Skills

- Languages : Python, Java, SQL, JavaScript, TypeScript, C, HTML, CSS.
- Cloud & Databases : GCP AI, Airflow, Azure, Vertex AI, MySQL, PostgreSQL.
- Frameworks : React, FastAPI, Node.js, PyTorch, Spring Boot, React Native.
- Data Tools : Pandas, NumPy, PySpark, Airflow, ETL Pipelines.
- Dashboards : Power BI, Tableau, Jupyter, Seaborn, Matplotlib.
- DevOps : Docker, Kubernetes, Git, CI/CD, Azure DevOps, A/B Testing.

Education

SUNY New Paltz - M.S. in Computer Science, NY, USA

08/2022 - 05/2024

- On-campus Sustainability Ambassador for the Beyond Plastics team.
