SUMMARY

- Results-driven **Business Analyst** with **5+ years** of experience in driving process improvements, gathering requirements, and delivering IT solutions that align with business objectives.
- Proficient in leveraging data visualization tools like **Tableau** and **Power BI** to create interactive dashboards, enabling data-driven decision-making and strategic insights.
- Adept at ensuring compliance with **GDPR** and **HIPAA** standards, implementing necessary controls during analysis and documentation phases to safeguard sensitive information.
- Experienced in managing stakeholders through effective **communication and collaboration**, ensuring smooth project progression and alignment with business goals.
- Skilled in aligning IT solutions with business needs, conducting **UAT**, and utilizing **Agile-Scrum** methodologies for efficient project execution and delivery.

SKILLS

Business Analytics & Documentation: User Stories, UAT Testing, FRD, BRD, Gap Analysis, Risk Analysis, Requirements Gathering, Documentation, Stakeholder Management

Diagramming & Visualization: Visio, Lucidchart, Excel, Tableau

Productivity & Collaboration: Microsoft365, Smartsheet, Confluence, Jira, ServiceNow

Operating Systems: Windows, Linux, macOS

Methodologies & Processes: Waterfall/Agile/Hybrid SDLC

Data & Reporting: SQL, Power BI

Compliance & Regulations: GDPR, HIPAA

Soft Skills: Communication, Collaboration & Teamwork, Problem Solving, Critical Thinking, Adaptability, Active Listening, Emotional Intelligence, Conflict Resolution, Time Management, Negotiation

WORK EXPERIENCE

SR. Business Analyst

| Sept 2022 – Present

MetLife, Wilmington, DE

- Engage in Business Requirements Gathering sessions with end-users, SMEs, and developers using questionnaires and business scenarios.
- Lead and manage 3 products, conducting client meetings as a Product Owner/BA while consistently receiving positive feedback from clients and mentors.
- Analyze client needs through interviews and existing product research, translating them into engineering specifications and Agile stories for developers and Scrum teams.
- Develop and deploy rich graphic visualizations using Tableau, including drill-down menus, dropdowns, and parameterized options.
- Create detailed documentation, including BRD, FRD, use cases, UML diagrams (use case, sequence, activity, class, and entity relationship diagrams), and RFPs.

- Execute test plans, test cases, and user acceptance testing (UAT) scenarios to ensure that IT solutions meet business needs.
- Produce Use Case Diagrams, Data Flow Diagrams (DFDs), Activity Diagrams, Sequence Diagrams, and Wireframes using MS Visio to visualize workflows and system interactions.
- Work with senior managers and cross-functional teams to identify and resolve issues, ensuring alignment with business goals and project deliverables.
- Perform User Acceptance Testing (UAT) in collaboration with end-users to validate system functionality and ensure user acceptance.
- Facilitate Joint Application Development (JAD) sessions to align stakeholders on project scope and integration strategies, ensuring effective communication and clear expectations.
- Administer Gap Analysis to identify system deficiencies and define requirements for the proposed system, driving process improvements.
- Leverage SQL for data extraction and analysis, and develop interactive dashboards and reports in Power BI to support data-driven decision-making.

Business Analyst

| Aug 2019 – Aug 2022

DXC Technology, Ashburn, VA

- Collaborated with business users, SMEs, external stakeholders, project managers, and IT personnel to gather requirements and analyze processes.
- Utilized Tableau to create customized dashboards, worksheets, and reports, leveraging features such as data blending, action filters, parameters, and calculated sets for enhanced visualization
- Modeled business processes using UML Activity and State Diagrams to visualize workflows and system statuses, providing a clear blueprint for development.
- Collaborated with QA to develop test scenarios, test plans, and cases, and conducted User Acceptance Testing (UAT) to ensure system quality and user acceptance.
- Apply Waterfall, Agile, or Hybrid SDLC methodologies to streamline project execution, ensure timely delivery, and adapt to evolving business requirements.
- Developed KPI reports for business analysts and top management to support data-driven decision-making.
- Conducted JAD sessions, user interviews, and requirements workshops to gather and document business needs.
- Utilized Agile-scrum methodologies for requirements gathering, sprint planning, and user story development.
- Performed stakeholder analysis and interviews with IT teams to identify key system changes and manage stakeholder expectations, ensuring smooth project progression.
- Ensured that all projects adhered to GDPR and HIPAA standards, implementing necessary controls during the analysis and documentation phases to safeguard sensitive information.

EDUCATION

Babcock University, Ilishan-Remo, Nigeria

Bachelor of Science - BS, Microbiology

CERTIFICATION

- ✓ **Professional Scrum Master**
- ✓ **CompTIA Advanced Security Practitioner (CASP)**
- ✓ **CompTIA Security+**
