Summary

I am a Lead Business Analyst with a proven track record of team leadership, specialization in enterprise-wide systems development and 10+ years of diverse experience in business and data analysis and development. I am excited every time I help my customers achieve their goals.

Experience

TX Department of Transportation (Contract)

Austin, TX

Senior Business Data Analyst / Product Owner / Scrum Master

Aug 2021 - Dec 2024

- Led business and data analysis efforts to modernize data reporting processes, including designing and mapping data for a new enterprise data lake, data marts, and Tableau dashboards.
- Documented requirements for both waterfall and Agile projects, which included documenting User Stories in JIRA.
- Optimized reporting workflows, reducing report generation time from 10 days to 1 by redesigning processes and automating data retrieval.
- Analyzed data trends in the data being migrated to identify potential areas of concern and reported to developers.
- Created enterprise metadata documentation and data lineage to support long-term data governance initiatives.
- Managed multiple assignments for multiple teams of product owners at any one time.
- Facilitated in-depth interviews with business users to document existing reporting workflows and processes, identify inefficiencies, and develop optimized reporting process flow solutions.
- Produced mockups and wireframes for review to enhance the user experience (UX)
- Write complex SQL queries to validate, transform, and analyze data loaded into Snowflake from various TxDOT data sources.
- Design and prototype interactive Tableau dashboards to enhance data visualization and accessibility for business users.
- Elicit and document detailed requirements from business users in Business Requirements Documents, Use Cases and Agile User Stories
- Bridge communication between technical and business teams, translating business needs into actionable technical requirements.

Texas Department of Emergency Management (Contract)

Austin, TX

Senior Business Analyst

Jun 2021 - Aug 2021

- Gathered and documented business, functional, and system requirements for modernization projects, ensuring alignment between business needs and technical implementation.
- Produced workflow diagrams and process documentation using Lucidchart and Syncplicity to enhance communication with cross-functional teams.
- Contributed to metadata standardization and data governance strategy across systems to improve data consistency and reporting accuracy.

Teacher Retirement System of TX (Contract)

Austin, TX

Senior Business Analyst / Product Owner / Scrum Master

Apr 2017 - Jun 2021

- Spearheaded Agile product development for the Health Insurance Line of Business (HILOB) system, managing product owners, backlog prioritization and user story refinement.
- Led Scrum ceremonies, including daily stand-ups, sprint planning, retrospectives, product backlog prioritization and backlog grooming.
- Defined system security frameworks, creating a Security Matrix for user roles and access permissions.
- Followed all phases of the SDLC from definition through deployment
- Elicit and document detailed requirements from business users in Agile User Stories
- Produced mockups and wireframes for review to enhance the user experience (UX) for the Financials area of HILOB
- Identified where to make improvements to process flow and recommend re-engineering software processes
- Facilitated Agile ceremonies (standups, planning, reviews), improving sprint velocity and reducing project delays by 25%.
- Facilitated meetings and collaborated with developers and DBAs to define technical solutions, review code changes, and resolve defects.
- Developed UAT plans, executed test cases, and ensured system readiness before deployment.
- Produced and presented analytics reports for leadership, offering insights into project performance and operational trends.
- Mentored junior business analysts and product owners, enhancing team capabilities.

Assurant Field Asset Services (Contract)

Austin, TX

Senior Business Analyst / Product Owner / Scrum Master

Jun 2015 - Feb 2017

- Led requirements gathering and documentation for CRM migration to Microsoft Dynamics, enhancing data accuracy and service delivery.
- Documented requirements for both waterfall and for Agile projects wrote user stories in AzureDevOps and later JIRA.
- Created Use Case and Process Flow diagrams during the requirements gathering process.
- Created and prioritized user stories and acceptance criteria, supporting Agile product delivery.
- Implemented Agile processes that reduced issue resolution times by 30% and improved sprint outcomes.
- Collaborated with technical teams to resolve system defects and streamline business workflows for field asset management.
- Assisted test team to document and test system changes.

Texas Health and Human Services Commission (Contract)

Austin, TX

Senior Business Analyst

Jun 2014 - Jun 2015

- Created Business Process Mapping, Use Case and workflow documentation for enhancements to the Premiums Payable System (PPS).
- Led defect triage and testing efforts, improving system reliability and supporting project delivery timelines.
- Acted as liaison between business and IT teams to ensure alignment across requirements, testing, and deployment phases.

HP Enterprise Services - State of AL (Contract)

Montgomery, AL

Senior Data Information Analyst / Senior Software Consultant

Oct 2013 - Jun 2014

- Analyzed and designed system enhancements for Medicaid Management Information Systems (MMIS) to improve reporting accuracy and regulatory compliance.
- Developed test plans and supported technical documentation peer review for Medicaid program requirements.
- Provided analytical insights to support Medicaid program decisions and business operations.

**TX Education Agency and TX Department of Public Safety
(Contract)**

Austin, TX

Senior Business Analyst

Apr 2012 - Oct 2013

- Created business cases and cost justifications for Registration Services Division projects.
- Identified and documented changes to TX and Federal regulations, integrating updates into system design and documentation.
- Authored BRDs, FRDs, Use Cases, and User Stories to support requirements traceability and project clarity.
- Worked with end users to design the StudentGPSTM Dashboards aimed at keeping track and identifying abnormalities in student data (grades, absences, etc.)
- Managed JIRA backlog of user stories and defect tickets and performed SQL-based data validation to improve reporting quality.

Accenture (Contract and FTE)

Austin, TX

Senior Consultant / Systems Architect

Nov 2010 - Feb 2012

- Defined System Requirements for changes to the Medicaid Management Information System (MMIS)
- Constructed and tested unit test plans and assisted Business Analysts writing and performing UAT cases using HP ALM.
- Peer reviewed test plans and design documents of changes to the MMIS
- Wrote and tested coding changes to the MMIS
- Developed and produced reports from the MMIS system and Project Leadership
- Subject Matter Expert (SME) of the Claims Editing areas of the MMIS
- Adhered to Systems Life Cycle methodology to ensure changes made to and implemented in the MMIS
- Advised management and Developer Teams of recommended changes to the MMIS
- Produced Claims Processing analytics reports to management
- Led Team of Developers coding the changes / enhancements to the Claims Processing System
- Provided input for Project Management Team when new projects were added or updated
- Mentored new business analyst on the processes and steps taken to gather and document requirements needed for the development team
- Ensured all TX MMIS development cycle standards, including naming standards, were adhered to
- Proposed and reviewed data model changes for the MMIS and determined the impact on other systems
- Interrogated the database, running SQL queries to determine potential data problems or reasons why there were defects in code
- Embedded SQL statements within the MMIS, which updated or retrieved data from the system

EDS / HP Enterprise Services (Contract and FTE)

Austin, TX

Senior Data Analyst Senior / Software Consultant

Nov 2002 - Nov 2010
