PROFESSIONAL SUMMARY

Experienced and results-driven **Lead SDET / QA Engineer** with over **9 years** of expertise in manual and automation testing across healthcare, finance, and eCommerce domains. Adept in building robust frameworks using **Java, Python, Selenium, Cypress, and Rest Assured**. Proven ability to lead QA initiatives, integrate test automation into **CI/CD pipelines**, and ensure compliance with **accessibility standards (WCAG, Section 508)**. Skilled in API, ETL, and performance testing with strong command over **SQL** and cloud technologies including **AWS** and **Azure DevOps**. Passionate about delivering high-quality, accessible, and scalable solutions through collaboration, mentorship, and Agile practices.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, HTML, CSS
- **Automation Tools:** Selenium (WebDriver, IDE, Grid), Cypress, Postman, Rest Assured, JMeter, LoadRunner, Playwright, Appium
- **Frameworks:** Cucumber (BDD), TestNG, POM, Hybrid, Data/Keyword Driven Frameworks
- **CI/CD & DevOps:** Jenkins, GitHub Actions, Azure DevOps, Maven, Git, GitLab
- **Cloud & Monitoring:** AWS (EC2, S3, Lambda, SNS, SQS), Azure Functions, Splunk
- **Databases:** MySQL, PostgreSQL, Oracle, SQL Server
- **Accessibility Tools:** Axe-core, WAVE, Pa11y, ANDI, NVDA, JAWS
- **Methodologies:** Agile, Scrum, SDLC, STLC, Waterfall
- **Operating Systems:** Windows, Linux, MacOS

PROFESSIONAL EXPERIENCE

Lead SDET / QA Automation Engineer

Innova Solutions — Oct 2024 – Present

- Designed and implemented test automation for UI, API, and mobile platforms using Java, Selenium, Cypress, and Rest Assured.
- Executed accessibility testing and authored VPATs to meet WCAG 2.1/2.2 and Section 508 compliance standards.
- Integrated automated testing into CI/CD pipelines using Jenkins, GitHub, and Azure DevOps.
- Conducted end-to-end testing of AWS-based applications, validating data in S3 buckets and Lambda executions.
- Applied complex SQL for data verification in backend and ETL pipelines.
- Collaborated with cross-functional Agile teams during daily stand-ups, sprint planning, and retrospectives.

Lead SDET / QA Engineer

Coforge — Jun 2023 – Sep 2024

- Developed scalable automation frameworks with Playwright and Selenium for new annuity platforms.
- Led accessibility testing using Axe-core, WAVE, and Pa11y for PDF and web content.
- Conducted performance testing using LoadRunner and JMeter.
- Created and executed complex SQL queries to validate ETL workflows.
- Managed defect lifecycle and test execution using Azure DevOps and Jira.

Sr. QA Automation Engineer

American Home Shield — Mar 2022 – Mar 2023

- Built Cypress automation framework using BDD and POM principles.
- Executed automated UI and API testing for customer and internal tools.
- Developed AWS SQS/SNS test cases and Lambda validations.
- Maintained regression suites and ensured seamless integration with Jenkins pipelines.
- Generated detailed reports and ensured coverage across multiple testing layers.

QA Automation Engineer

Latent View Analytics — Apr 2019 – Feb 2022

- Automated test suites for web apps using Selenium, TestNG, and REST Assured.
- Conducted Angular app testing with Protractor and Node.js.
- Used SQL to validate complex backend workflows and ETL logic.
- Documented all test activities and integrated automation within CI/CD.
- Participated in sprint ceremonies and worked closely with dev and product teams.

QA Automation Tester

REI (Recreational Equipment Inc.) — Oct 2016 – Mar 2019

- Developed and maintained test frameworks for eCommerce platforms.
- Performed cross-browser testing using Selenium and executed performance tests with JMeter.
- Validated backend processes using SQL and ensured seamless UI functionality.
- Ensured accessibility and usability testing using screen readers and WCAG guidelines.

Selenium Automation Engineer / SDET

Key Bank — Jun 2014 – Sep 2016

- Built automation frameworks with Java and Selenium for financial applications.
 - Conducted full lifecycle testing including regression, smoke, and ETL validation.
 - Participated in requirement analysis, test planning, execution, and defect tracking using HP ALM.
 - Ensured data accuracy with SQL queries across Oracle and MySQL databases.
-

EDUCATION

Bachelor's Degree in Information Technology

Qurtabah Institute of Information Technology – 2012

HIGHLIGHTED ACHIEVEMENTS

- Automated 500+ test cases across UI and API, reducing regression time by 40%
- Improved test pipeline efficiency by 60% through optimized parallel execution
- Delivered zero-defect releases across multiple Agile sprints
- Achieved 100% WCAG 2.1/2.2 compliance for enterprise apps and authored VPAT documentation
