PROFESSIONAL EXPERIENCE

Senior Business Analyst

StaffBot | Nov 2023 - Present

- Facilitate project related meetings, elicit business requirements, and accurately document the project for both the Business and Technical teams.
- Manage vendor relationships. Including, but not limited to, integrations, testing, and ongoing support. In my time with the company this has included establishing API feeds between their internal ATS, MuleSoft, and third parties. I have increased their speed to market and speed to submissions, by implementing processes that reduce manual entry needs.
- Manage internal projects and support needs via Jira and Slack. This includes a combination of agile sprint and waterfall management.
- Perform quality assurance and user acceptance testing. Currently I perform testing on my own projects, junior business analyst projects, contractor projects and conduct UAT with the business.
- Perform System Administrator duties related to Salesforce on a weekly basis and other systems as required. This includes though not limited to the creation of reports and objects, creating flows, automations, and formulas.

IT Business Analyst

American Health Staffing Group | Nov 2022 - Sept 2023

- Worked with the Project Manager to establish a PMO within the company and create standardized project practices while implementing Agile methodologies.
- Vetted incoming project requests and documented approved project goals and requirements.
- Mentored and trained junior business analysts within child companies. In this role I conformed previous practices into a more efficient process to provide consistent expectations to all company entities.
- Performed the role of System Administrator for the Internal Salesforce and HubSpot systems. During my time in this role I transferred the company from Salesforce and implemented HubSpot, created automated quote and contract tools for Sales teams to close business at a faster rate, and cleaned data to provide better reporting and forecasting.

PROFESSIONAL EXPERIENCE

Senior Business Analyst

MidFirst Bank | Nov 2021 - Nov 2022

- Performed dual roles as the project manager and business analyst for technical projects submitted by all divisions, child companies, and vendors.
- Completed requirements gathering and project documentation. This includes charters, business requirement documents, process and data flows, budget estimates/impacts, timeline forecasting, and scope changes.
- Led daily scrum meetings, project status meetings, and others as required.
- Oversaw vendor management including providing recommendations for new purchases, completing new system implementations, and fostering ongoing relationships.

Agile Business Analyst

Paragon Consulting | Apr 2021 - Oct 2021

- Worked with Clients to learn their industries and specific companies so that I could better serve as a liaison between the businesses and technical teams.
- Gather project requirements, complete documentation, and gather approvals from Clients and internal leadership.
- Lead daily/weekly scrum meetings for developer progress and project updates.
- Conduct user acceptance testing and training for Client implementations.

Business Analyst

TBS Factoring Service | Jul 2017 - Apr 2021

- Managed project intake, backlog, and sprints across multiple development and administrator teams.
- Completed project requirements documents, created corresponding Jira user stories, and training materials.
- Performed as a system administrator for Salesforce. During this time I transferred all contract paperwork and processes into automations that tripled the monthly submissions.
- Facilitate leadership meetings for the Change Approval Board.
- Conduct user acceptance testing and business training.
