EXPERIENCE

Graduate Research Assistant

Indiana University Purdue University

June 2023 – Present

Indianapolis, IN, USA

- The system, RealCV(<https://realcv.iu.edu/>), was developed to help users create resumes by highlighting their everyday life skills. It was launched in response to the COVID pandemic, with a focus on women who manage domestic responsibilities, which may have affected their job histories. The system aims to showcase their everyday achievements.
- Employing machine learning and natural language processing methodologies utilizing the capabilities of the LLAMA 2 framework to enhance the system's functionality

Senior Software Engineer

Cavalier Group

July. 2022 – July. 2023

Islamabad, Pakistan

- Led a backend team for ERP process implementation, developing services in Java Spring, configuring CI/CD pipelines, and designing system architecture for ERP processes
