

JONATHAN FREEMAN

QA Automation Leader

Professional Summary

Dynamic QA automation leader with over a decade of experience and a master's in information systems and data science. Proven record in modernizing testing methodologies and implementing automation frameworks for data-intensive and consumer-facing products. Expert in developing QA strategies for complex systems including data processing pipelines and machine learning applications. Collaborative leader, skilled in mentoring teams of up to 20 members while driving cross-functional projects. Passionate about applying data science principles to quality assurance, especially for emerging AI technologies. Extensive experience designing test approaches that validate data integrity, model performance, and system reliability. Proficient in automation testing, API development, cloud platforms (AWS, Azure), and data analytics tools. Demonstrated success implementing enterprise-wide testing solutions that balance quality, efficiency, and innovation.

Work History

2024-08 -
Current

Lead Corporate Applications QA

AMC Theatres, Leawood, Kansas

- Spearhead all aspects of automation vendor selection, evaluation, and procurement, successfully implementing AccelQ as the organization's testing platform
- Develop and execute a phased automation adoption strategy, balancing immediate quality needs with long-term automation goals
- Create structured AccelQ training programs and learning paths to build team automation capabilities

Education

M.S. MIS/Data Science

Park University

B.S. Information Systems

University of Kansas

Software

Postman	Cypress
Tableau	PowerBI
Visual Studio	SPSS
Azure DevOps	AccelQ
Hadoop	Mongo Db
Visual Studio	Kubern etes
Anaconda	Docker
Mulesoft	Github
.Net	
UiPath RPA	
Selenium	
Playwrite	

- Design and implement data validation frameworks to ensure accuracy across integrated systems
- Establish test data management practices for complex data flows across multiple systems
- Develop testing approaches for predictive analytics features, validating model outputs and data quality
- Create proof-of-concept automation frameworks demonstrating efficiency gains for critical business systems
- Implement continuous testing methodologies within CI/CD pipelines to ensure quality at each development stage

Languages

C#

SQL

Java

Python

Typescript

Javascript

Powershell

2023-06

Founder and Principal Consultant

MoJa Digital, LLC

- Provide digital consultancy services for web, social media, business management, and business intelligence
- Design and implement custom testing solutions for clients utilizing predictive technologies
- Developed automated validation approaches for clients implementing AI-enhanced features
- Created quality assurance strategies for businesses adopting machine learning models
- Applied NLP techniques to automate content testing for digital marketing campaigns
- Established test data management practices for client analytics implementations

2018-06 –
2024-08

Lead Software Development Engineer in Test

GEHA, Lee's Summit, Missouri

- Led a team of SDETs and QA professionals, overseeing automation projects and modernizing test methodologies to industry standards
- Built and maintained Selenium-based frameworks, boosting testing efficiency

- Designed specialized testing approaches for data processing pipelines ensuring data integrity
- Developed PowerBI reports to provide insights into SDET, QA, and DevOps performance
- Implemented machine learning-based anomaly detection to identify potential issues in test data
- Enhanced API quality with advanced Selenium tests in .NET
- Employed Robotic Process Automation to verify our Facets instance
- Developed Cypress load and UI tests
- Applied data science principles to analyze test results and improve test coverage efficiency
- Collaborated with data scientists to create validation procedures for statistical models

2017-09 -
2018-06

Sr. Quality Assurance Analyst

TEK SYSTEMS/VML-Y&R, Kansas City, Missouri

- Led QA efforts for major brands, developing UI automated regression frameworks using Java Selenium
- Led and trained a team of offshore QA professionals, teaching automation principles and practices
- Built and implemented knowledge transfer protocols to effectively onboard remote team members
- Conducted various testing types, including load and accessibility testing
- Managed diverse client projects, ensuring comprehensive testing and documentation
- Implemented testing strategies for data-driven marketing platforms and analytics systems
- Created validation procedures for personalization engines and recommendation systems.

2016-09 -
2017-09

Automation Engineer II

MCG/BALANCE INNOVATIONS, Lenexa, Kansas

2013-12 -
2016-09

- Implemented cross-browser testing and led Sprint retrospectives.
- Utilized Selenium Webdriver in C# to automate complex test scenarios.
- Engaged leadership in testing processes and metric reporting.

Supervisor QA

NIC, Olathe, Kansas

- Early adopter of test automation practices, leading QA workflow and project prioritization.
- Wrote automation code in C# and Java, using Selenium Webdriver and POM design pattern.
- Led scrums, sprint kickoffs, and project planning for a team of three Automation Developers and two Manual Testers.
- Implemented test automation using ReadyApi for Java, middleware frameworks, and .NET teams.

Skills

- **Software Development:** Python, SQL, Java, JavaScript, C#, .NET
- **Automation & Testing:** Selenium Webdriver, UiPath, ReadyApi, Postman, Cypress
- **Data Science:** Data Analysis, Predictive Modeling, Data Mining, Statistical Analysis
- **Tools:** Tableau, PowerBI, Jupyter, GIT, Jenkins, Postman, Jira, Confluence, Azure DevOps, Anaconda, MATLAB, SPSS
- **Platforms:** AWS, Azure, Google Cloud, Hadoop
- **Data Management:** Data Cleaning, Data Wrangling, ETL, Data Warehousing
- **Soft Skills:** Problem Solving, Analytical Thinking, Collaboration, Communication, Team Leadership, Project Management
- **Enterprise:** SOX regulatory compliance Testing and Audit, PCI Compliance, NACHA Testing.
