PROFESSIONAL WORK EXPERIENCE:

Client: Insight Software

Location: North Carolina, US

Role: Senior Product Owner

Duration: July 2023 – Till date

Description: A streamlined, intuitive financial application suite designed to enhance planning, reporting, and analysis. This suite empowers businesses to make informed, data-driven decisions with precision and efficiency.

Roles and Responsibilities:

- Managed the Product Backlog for two Agile Scrum teams in an API Integration Project focused on onboarding payment partners and merchants.
- Converted business requirements into product requirements, ensuring alignment with KPIs and maintaining development integrity throughout the project lifecycle.
- Created Business Requirement Documents (BRDs) for features such as identity verification and account takeover, and documented requirements
- Developed a vision for customer experience improvement by gathering stakeholder input and identifying opportunities through data analysis.
- Defined, tracked, and measured OKRs to prioritize product development efforts, aligning with business goals and customer satisfaction metrics.
- Created dashboards using data analysis techniques to provide recommendations that enhanced airport operations and customer experience.
- Conducted root cause analysis to resolve issues like fee discrepancies, transaction errors, and system performance issues, enhancing product quality.
- Actively participated in scrum ceremonies, maintained and prioritized the product backlog, and collaborated with stakeholders and IT to ensure the successful delivery of over 10 products.

Client: Insight Software
Role: Senior Product Owner

Location: Bangalore, India
Duration: April 2023 – June 2023

Description: Insight Software is an AI-powered tool for finance professionals, offering comprehensive solutions in finance, accounting, and operations to improve business efficiency and decision-making.

Roles and Responsibilities:

- Managed development backlogs, aligning features with business goals and client needs, prioritizing product, regulatory, and risk factors.
- Collaborated with technology, vendors, and operations teams to implement and deliver product solutions.
- Led Agile ceremonies (sprint planning, stand-ups, reviews, retrospectives) to enhance teamwork and project alignment.
- Conducted functional reviews, defined requirements, and led process improvements to optimize product performance and client experiences.

Client: Intel Corporation
Role: Technical Project Manager

Location: Bangalore, India
Duration: June 2018 – Jan 2023

Description: Successfully managed and led 3 Software DevOps teams as Project Manager, overseeing the development and support of tools for End User computing and collaboration space.

Roles and Responsibilities:

- Partnered with senior management and stakeholders to define project scope, objectives, and deliverables aligned with business strategies.
- Developed both short-term and long-term product roadmaps, ensuring consistency with business goals and strategies.
- Oversaw the entire product deployment lifecycle, from conceptualization to launch, ensuring successful execution.
- Managed and prioritized the product backlog, focusing on essential feature development and addressing technical limitations.
- Directed multiple projects, adhering to time constraints while efficiently managing resources, budgets, and schedules.
- Collaborated with cross-functional teams to ensure successful client solution development and implementation, including drafting user stories, risk mitigation, and coordinating testing and production releases.

Client: Intel Corporation
Role: Agile Product owner

Location: Bangalore, India
Duration: Dec 2014 - May 2018

Description:

Led daily stand-ups and Scrum ceremonies to identify improvements. Overcame obstacles in feature development by refining backlog, prioritizing user stories, and engaging stakeholders analytically and empathetically.

Roles and Responsibilities:

- Enhanced team efficiency by overseeing cross-functional teams during product development and launch, ensuring streamlined processes and successful outcomes.
- Fostered long-term client relationships, building trust and collaboration while conducting Scrum ceremonies to maintain agile practices and improve productivity.
- Directed organizational data management initiatives, optimizing data handling, compliance, and monitoring software reliability to maintain system performance.
- Fulfilled dual roles as Product Owner and Scrum Master, balancing strategic vision with day-to-day coordination and guiding teams through change management processes.
- Achieved a 71% reduction in application downtime and 97% compliance with security standards, significantly improving operational efficiency and service management.

Client: Intel Corporation
Role: Systems Engineer

Location: Bangalore, India
Duration: July 2008 - Nov 2024

Description: Developed Intel Hybrid Cloud solutions, offering subscription-based local server hosting for small businesses. Managed app integration, system migration, and virtualization to ensure seamless integration and optimized performance.

Roles and responsibilities:

- Managed application integration, deployment, and policy configuration for Windows and Mac clients.
- Implemented UE-V and tested browser policies to ensure performance and security.
- Deployed Intel Hybrid Cloud for server solutions in small businesses.
- Re-engineered applications with XenApp and led system migration using Citrix XenServer.
- Developed OS images and managed deployment through MDT, SCCM, MECM, Intune, and VMware Workspace One.
