PROFESSIONAL SUMMARY:

I am a passionate DevOps and DevSecOps Engineer with over six years of experience building secure, scalable, and automated cloud infrastructures. With a solid 10+ years in IT, I specialize in streamlining deployment pipelines, enhancing security, and optimizing cloud environments. I thrive in fast-paced settings, solving complex challenges, and working collaboratively to improve efficiency and security. Whether it's automating workflows, securing CI/CD pipelines, or fine-tuning cloud performance, I bring a hands-on approach to delivering robust, reliable solutions.

SKILLS:

AWS (EC2, S3, Lambda, VPC, IAM, CloudFormation), Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD, CircleCI, Azure DevOps, Terraform, CloudFormation, Ansible, Helm, DevSecOps, HashiCorp Vault, AWS Security Hub, SonarQube, Semgrep, Aqua Security, Trivy, Snyk, CIS Benchmarks, Docker, Kubernetes (EKS, AKS, GKE), OpenShift, Podman, Rancher, Istio (IstioD), OPA Gatekeeper, AWS Config Rules, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Datadog, New Relic, Nginx, HAProxy, VPN, Firewall Rules, IAM, Security Groups, Zero Trust, API Gateway, Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Microsoft Teams.

EXPERIENCE:

Comcast Corporation

Role: DevOps/SRE Engineer

September

2023 - Present

- Provisioned, configured, and maintained a self-hosted GitLab instance to automate and streamline CI/CD workflows, implementing GitOps practices with ArgoCD for continuous deployment in Kubernetes clusters.
- Strengthened application security by integrating SAST, DAST, and SCA tools (Gitleaks, Njsscan, Semgrep, Retire.js) into CI/CD pipelines, preventing vulnerabilities and secret leaks.
- Automated infrastructure provisioning and configuration with Terraform and Ansible, ensuring consistent deployment across AWS services, including compute, storage, security, databases, and networking.
- Integrated OPA Gatekeeper to enforce policy, compliance, and governance within Kubernetes clusters.
- Deployed and managed Istio service mesh (IstioD), including ingress gateways and authorization policies, to secure inter-service communications.
- Implemented compliance-as-code using AWS Config Rules to enforce policies and detect configuration drift, enhancing cloud governance.
- Monitored infrastructure and security activities with AWS CloudTrail and CloudWatch, enabling real-time visibility and rapid incident response.
- Enhanced security and secret management by deploying AWS Secrets Manager within Kubernetes clusters, improving encryption and access control for sensitive data.
- Implemented proactive monitoring and alerting with Prometheus and Grafana, enabling quick detection and resolution of infrastructure and application issues.
- Collaborated with development teams to streamline code integration, automate deployments, and establish efficient rollback mechanisms for seamless incident recovery.

HP(Hewlett-Packard)

Role: DevOps/Cloud Engineer

February

2018 - August 2023

- Designed and built scalable cloud infrastructure on AWS using Terraform, improving system uptime to 99.9% and cutting deployment time by 40%.
- Automated CI/CD pipelines with Jenkins, GitHub Actions, and GitLab CI/CD, speeding up software releases from weeks to days and ensuring smooth deployments.
- Managed Kubernetes (EKS) and Docker for container orchestration, boosting resource efficiency by 35% and making applications more scalable.
- Strengthened security by integrating DevSecOps tools like HashiCorp Vault, AWS Security Hub, and Trivy, reducing security risks by 60% through automated scans.
- Monitored and optimized system performance using Prometheus, Grafana, and ELK Stack, cutting incident response time by 50% and enhancing reliability.
- Worked closely with development teams using Git, Bitbucket, Jira, and Confluence, improving collaboration and boosting development efficiency by 30%.

Ericsson

Role: System Administrator/Configuration Management

July 2013 –

January 2018

- Designed, implemented, and maintained scalable AWS cloud infrastructure, ensuring high availability, security, and cost optimization.
- Monitored and troubleshooted cloud-based applications and infrastructure, proactively identifying and resolving performance and security issues.
- Collaborated with cross-functional teams, including developers and security engineers, to streamline cloud operations and enforce best practices.

EDUCATION:

- **Bachelor of Science in Electrical & Electronic Engineering**
2013

March

Obafemi Awolowo University

CERTIFICATION:

- **AWS Certified Solutions Architect Associate – Amazon Web Service**
- **Certified Kubernetes Administrator (CKA) – Cloud Native Computing Foundation (CNCF)**
- **Certified Kubernetes Application Developer (CKAD) – Cloud Native Computing Foundation (CNCF)**
- **Oracle Cloud Infrastructure Foundation Associate Certified – Oracle**

ACHIEVEMENTS & EXPERTISE:

Building Scalable & Automated Cloud Solutions

I've designed and built cloud infrastructures that don't just run but thrive. By automating infrastructure deployments with Terraform, Ansible, and CloudFormation, I've cut down deployment time by 40% and made systems more reliable. From AWS to Azure, I've ensured that cloud environments are secure, scalable, and always ready to meet business needs.

Strengthening Security with DevSecOps

Security isn't just a box to check; it's a mindset. I've embedded security into every step of the development process, integrating tools like HashiCorp Vault, AWS Security Hub, and Snyk to proactively reduce vulnerabilities by 60%. By implementing automated scans and zero-trust security models, I help teams stay ahead of threats and keep critical data protected.

Optimizing Performance & Reliability

A great system is one that runs smoothly, with minimal downtime. I've leveraged tools like Prometheus, Grafana, and the ELK stack to improve monitoring and incident response, cutting

resolution time by 50%. By optimizing Kubernetes environments and fine-tuning cloud resources, I've boosted efficiency by 35%, ensuring applications run faster, smoother, and more cost-effectively.

Demonstrating Leadership & Commitment

Proud member of the United States Air Force Reserve, exemplifying discipline, teamwork, and commitment to mission-critical objectives while supporting national defense initiatives. This experience enhances my leadership skills, operational precision, and ability to thrive under pressure.
