Senior Business Analyst

PROFESSIONAL SUMMARY:

- Highly experienced Business Analyst with over 9 years of experience in enhancing operational efficiency and extracting insights from complex data sets.
- Analyzed complex business data using SQL, effectively identifying trends and patterns that informed strategic decision-making processes.
- Developed and maintained predictive models using SAS and MATLAB, providing insights that guided business planning and risk assessment.
- Created comprehensive dashboards in Tableau, which provided real-time insights and supported data-driven decision-making across the organization.
- Conducted statistical analysis using Python to decipher complex data sets, which led to actionable business recommendations and optimizations.
- Facilitated requirement gathering sessions, using collaborative teamwork to ensure comprehensive understanding and documentation of business needs.
- Implemented CRM enhancements by leveraging Salesforce and Qualtrics, which improved customer engagement and operational efficiency.
- Utilized Microsoft Excel for advanced data manipulation and analysis, producing reports that supported business operations and strategic initiatives.
- Led process mapping sessions using Microsoft Visio and Lucidchart, effectively documenting and streamlining business processes.
- Managed business analytics projects using Adobe Analytics and Sprout Social, enhancing social media strategies and customer engagement metrics.
- Conducted predictive modeling with d3.js, creating dynamic data visualizations that clearly communicated findings to stakeholders.
- Applied Kaizen methodologies to process improvement initiatives, which enhanced workflow efficiency and reduced operational costs.
- Utilized SQL and advanced analytics to support business reengineering initiatives, which led to significant improvements in business operations.
- Employed JIRA for project management, effectively tracking progress and ensuring timely delivery of project milestones.
- Facilitated the adoption of AGILE methodologies across teams, enhancing flexibility and efficiency in project execution.
- Developed and maintained documentation using Confluence, which ensured clarity and consistency in project communication and deliverables.
- Orchestrated workflow automation using Bizagi and Arena, which optimized business processes and reduced manual intervention.
- Leveraged Microsoft PowerPoint to create impactful presentations that communicated project results and strategic insights to executives.
- Integrated Touchpoint dashboard technology to monitor customer interactions, enhancing customer service and support strategies.
- Utilized SharePoint for document management and collaboration, ensuring easy access to project materials and fostering team collaboration.
- Implemented UML and BPMN for process modeling, standardizing documentation and improving understanding of business workflows.
- Executed data analysis and visualization projects using Microsoft Excel and Tableau, which supported strategic decision-making and operational improvements.
- Utilized SQL for database querying and management, supporting data integrity and timely access to business-critical information.

- Employed statistical analysis tools like MATLAB and SAS for complex data analysis projects, which informed business strategies and operational adjustments.
- Led requirement meetings using collaborative tools and techniques, ensuring effective communication and comprehensive understanding of project scopes.
- Managed and coordinated business analysis projects using AGILE project management methodologies, which ensured project adaptability and successful delivery.

TECHNICAL SKILLS:

- **Data Analysis and Reporting** : SQL, Microsoft Excel, Tableau, Adobe Analytics, Sprout Social
- **Predictive Modeling** : Python, SAS, MATLAB
- **Process Mapping and Modeling** : Microsoft Visio, Lucidchart, Bizagi, Arena, BPMN, UML
- **Documentation and Collaboration** : Confluence, JIRA, SharePoint, Slack
- **Project Management** : AGILE, Requirement Gatherings, Kaizen

PROFESSIONAL EXPERIENCE:

Client: Master Card, New York, NY

Dec 2023 to till date

Role: Sr. Business Analyst(Remote)

Roles & Responsibilities:

- Analyzed business requirements and technical specifications using SQL to guide system enhancements and ensure alignment with business goals.
- Developed use case scenarios and validated them with technical teams using Confluence to ensure clarity and feasibility of project requirements.
- Facilitated effective requirement gathering sessions with stakeholders, employing JIRA to document and track project needs and updates efficiently.
- Led documentation efforts using Microsoft Visio, creating detailed process maps that outlined system functionalities and workflow integrations.
- Implemented Business Process Model and Notation (BPMN) and Unified Modeling Language (UML) methodologies using Lucidchart to standardize documentation and improve understanding across teams.
- Coordinated development and implementation phases through JIRA, ensuring seamless communication and timely updates on project progress.
- Utilized Agile methodologies to manage projects, enhancing flexibility and responsiveness to changes throughout the project lifecycle.
- Prepared and delivered comprehensive presentations to senior management using Microsoft PowerPoint, summarizing findings and project status effectively.
- Engaged stakeholders in detailed discussions on requirement functionalities, using SharePoint to share and review documentation and feedback.
- Maintained thorough project documentation using Confluence, ensuring all processes and decisions were well-documented and accessible.
- Led collaborative teams, leveraging AGILE methodologies to drive deliverables that aligned closely with strategic business objectives.
- Utilized Microsoft Excel for complex data analysis, supporting decision-making processes with accurate data interpretations.
- Ensured technical specifications were rigorously validated, employing best practices in documentation and system design to meet project goals.
- Coordinated project tasks and deliverables using AGILE practices, enhancing project management effectiveness and team performance.
- Implemented best practices in documentation and project tracking, using SharePoint to streamline communication and maintain project alignment.
- Facilitated stakeholder meetings, utilizing Microsoft PowerPoint to effectively communicate strategic insights and progress.
- Maintained a continuous feedback loop with project teams using Microsoft Teams, ensuring alignment with business requirements and project objectives.

- Employed comprehensive documentation tools to create detailed reports that facilitated decision-making and project assessments.
- Engaged in detailed technical discussions to ensure system enhancements were implemented according to precise business specifications.
- Led the development of use cases and scenarios using Visio, accurately representing business processes and requirements for system enhancements.
- Facilitated stakeholder meetings to gather comprehensive feedback using Microsoft Teams, refining project requirements and objectives.
- Coordinated with IT and business units to ensure effective implementation of project deliverables using Lucidchart for process visualization.
- Documented and reported on project statuses using JIRA, maintaining transparency and accountability throughout the project lifecycle.
- Led efforts to identify potential improvements in business processes through detailed analysis and system reviews using SQL and Excel.
- Ensured all project deliverables met the high standards expected in the financial services industry, using rigorous testing and validation processes.

Environment: SQL, Confluence, JIRA, Microsoft Visio, Lucidchart, SharePoint, Microsoft PowerPoint, Agile methodologies, Microsoft Excel, Microsoft Teams.

Client: Farmers insurance, Woodland Hills, CA

Aug 2021 to Dec 2023

Role: Business Analyst

Roles & Responsibilities:

- Analyzed technical specifications and business requirements using SQL to identify necessary system enhancements that align with operational goals.
- Created comprehensive use cases and facilitated validation processes using Microsoft Visio, ensuring accurate implementation according to specified needs.
- Managed extensive documentation processes using Confluence to maintain clarity and compliance with industry standards and regulatory requirements.
- Utilized Microsoft Visio and Lucidchart to provide detailed visual representations of workflows and processes, enhancing stakeholder understanding.
- Coordinated with IT and business stakeholders through JIRA to ensure project alignment and seamless integration of new systems.
- Supported project management efforts using Agile methodologies, enhancing team agility and ensuring efficient project deliverability.
- Developed presentations and reports using Microsoft PowerPoint and SharePoint to communicate strategic decisions and project status to executive teams.
- Engaged with project teams to discuss and refine technical specifications and business requirements, ensuring a shared understanding using Lucidchart.
- Utilized JIRA for efficient project tracking and management, ensuring all tasks were aligned with project goals and timelines.
- Documented all project phases and outcomes in Confluence, ensuring transparency and accountability across the project lifecycle.
- Led requirement gathering sessions using Microsoft Teams, precisely defining project scope and business needs for system enhancements.
- Implemented use case scenarios to validate business processes and functionalities, ensuring enhancements met predefined business requirements.
- Facilitated stakeholder meetings using Microsoft Teams to gather comprehensive feedback and refine project deliverables accordingly.
- Coordinated the development of business cases using Excel, justifying project investments and anticipated outcomes based on detailed financial analysis.
- Utilized business process modeling tools in Lucidchart to visualize and improve insurance process flows, increasing operational efficiency.

- Engaged in detailed documentation efforts using Microsoft Visio, ensuring all project aspects were clearly communicated to all stakeholders.
- Managed communications across project teams using SharePoint, facilitating effective collaboration and information sharing.
- Developed technical specifications using Microsoft Word to guide system enhancements, ensuring alignment with strategic business objectives.
- Facilitated the validation of project outcomes using Excel, ensuring they met the predefined business and technical specifications.
- Employed Agile project management techniques to manage project scope and deliverables efficiently, adapting to changes and stakeholder feedback.
- Led the integration of new business processes into existing systems using Lucidchart, ensuring seamless functionality and user adoption.
- Documented and reported on project progress to senior management using PowerPoint, providing clear and actionable insights into project status and outcomes.
- Ensured all project deliverables and documentation were completed to high standards, meeting industry compliance and requirements, using standardized reporting tools in SharePoint.

Environment: SQL, Microsoft Visio, Confluence, Lucidchart, JIRA, Agile methodologies, Microsoft PowerPoint, SharePoint, Microsoft Teams, Excel, Microsoft Word.

Client: Home Depot, Atlanta, GA

Dec 2019 to Aug 2021

Role: Business Analyst

Roles & Responsibilities:

- Conducted analytics to enhance CRM integrations, utilizing Salesforce to improve customer relationships and operational efficiency.
- Employed SQL for data manipulation and querying, supporting business decision-making and enhancing data-driven strategies.
- Managed social media monitoring using Sprout Social to track customer engagement and gather actionable insights effectively.
- Implemented Adobe Analytics for deeper insights into customer behavior, which informed marketing strategies and business operations.
- Developed requirement functionalities and maintained comprehensive documentation using Microsoft Word to support project clarity and execution.
- Analyzed business processes using Microsoft Visio, identifying potential areas for system improvement and enhancement.
- Utilized Microsoft Excel for data analysis, supporting business decisions and operational strategies with accurate data interpretations.
- Facilitated the integration of customer feedback into business processes using Qualtrics, enhancing customer satisfaction and loyalty.
- Documented all project-related activities and outcomes using SharePoint, ensuring transparency and accountability in project management.
- Utilized business analysis techniques to evaluate the effectiveness of existing systems and propose necessary enhancements.
- Coordinated with marketing and sales teams to integrate analytics insights into business strategies using Microsoft Teams.
- Developed and maintained dashboards using Microsoft Power BI, providing real-time insights into business operations and performance.
- Facilitated requirement gathering sessions using Microsoft Teams, ensuring all business needs were accurately captured and addressed.
- Engaged with stakeholders to discuss and refine project objectives, ensuring alignment with business goals using interactive presentations.
- Documented business processes and outcomes using Lucidchart, maintaining clarity across project teams and stakeholders.

- Analyzed customer data using SQL and Excel, identifying trends and insights that informed business strategies and customer relationship management.
- Coordinated with IT teams to ensure technical feasibility of business recommendations and system enhancements.
- Led the development of technical specifications to guide the integration of new systems and technologies using JIRA.
- Utilized project management tools like Microsoft Planner to track project progress and ensure timely delivery of project milestones.
- Maintained continuous communication with project stakeholders using Microsoft Teams, keeping them informed of project status and developments.

Environment: Salesforce, SQL, Sprout Social, Adobe Analytics, Microsoft Word, Microsoft Visio, Microsoft Excel, Qualtrics, SharePoint, Microsoft Teams, Microsoft Power BI, Lucidchart, JIRA, Microsoft Planner.

Client: EVRY India Pvt Limited, Bengaluru, India

Jun 2017 to Sep 2019

Role: Business Analyst

Roles& Responsibilities:

- Identified and addressed business process bottlenecks using Microsoft Visio, enhancing operational efficiency and process clarity.
- Utilized SQL for data analysis to support reengineering initiatives aimed at improving overall business operations.
- Facilitated the creation of value stream mappings and workflow automations using Bizagi, improving process efficiencies.
- Implemented Kaizen methodologies to drive continuous improvement across business processes, increasing productivity and reducing waste.
- Maintained comprehensive project documentation using Microsoft Word and SharePoint, ensuring all stakeholders were well-informed.
- Engaged in requirement gathering sessions, utilizing collaborative tools like Microsoft Teams to capture precise business needs.
- Developed detailed process maps with Microsoft Visio, providing clear visual representations of workflows for better understanding.
- Coordinated with project teams to ensure effective implementation of business process improvements using JIRA for task management.
- Developed and maintained reports using Microsoft Excel, tracking project progress and measuring outcomes against set goals.
- Facilitated stakeholder meetings using Microsoft PowerPoint, gathering feedback and refining business processes and systems.
- Utilized Lucidchart to create complex diagrams illustrating detailed business processes and workflows.
- Led the integration of new technologies and processes into existing systems, ensuring seamless functionality using Microsoft Project.
- Documented all project phases in SharePoint, maintaining a comprehensive record of activities and decisions.
- Engaged with IT and business teams to ensure the technical feasibility of proposed enhancements, using email and document sharing for communication.
- Developed technical specifications in Microsoft Word, guiding the development and implementation of system enhancements.
- Used business process modeling tools in Lucidchart to visualize and improve business workflows and processes.
- Coordinated with business units to ensure that all business requirements were accurately defined and met using Microsoft Teams.
- Ensured continuous improvement in project execution, regularly updating business processes and systems to align with evolving business needs.

Environment: Microsoft Visio, SQL, Bizagi, Kaizen, Microsoft Word, SharePoint, Microsoft Teams, JIRA, Microsoft Excel, Microsoft PowerPoint, Lucidchart, Microsoft Project.

Client: InfraSoftTech, Pune, India

Jan 2016 to May 2017

Role: Business Analyst

Roles & Responsibilities:

- Utilized SQL and Python for statistical analysis, identifying trends and patterns in business data to inform strategic decisions.
- Developed predictive models using SAS and MATLAB to forecast business outcomes, supporting strategic planning and risk management.
- Created and maintained dashboards in Tableau, providing real-time business insights that facilitated data-driven decision-making.
- Collaborated effectively in team settings for requirement gatherings, using Microsoft Teams to ensure comprehensive documentation.
- Engaged in requirement meetings to understand and document comprehensive business needs and technical specifications.
- Utilized d3.js for developing complex data visualizations that effectively communicated insights to business stakeholders.
- Conducted statistical analyses to support business recommendations and strategic planning efforts.
- Maintained comprehensive documentation of all project activities to ensure transparency and accountability.
- Developed detailed business cases using Excel, justifying investments in new technologies and system enhancements.
- Utilized collaborative tools like SharePoint to enhance teamwork and ensure effective communication across project teams.
- Led the analysis of business data to identify critical insights, informing business strategies and operational improvements.
- Coordinated with technical teams to ensure the feasibility of business recommendations and data-driven insights.
- Documented technical specifications and business requirements to guide system enhancements and improvements.
- Facilitated the integration of statistical models into business processes, enhancing predictive capabilities and operational effectiveness.
- Maintained a focus on continuous improvement, regularly updating business processes and systems to align with evolving business needs using JIRA.

Environment: SQL, Python, SAS, MATLAB, Tableau, Microsoft Teams, d3.js, Excel, SharePoint, JIRA.

Education:

- Bachelor of Technology (B. Tech) in Information Technology from JNTUH, Hyderabad, Telangana, India. – 2016
