

SAI MANIDEEP CH | UI DEVELOPER

channasaimanideep6@gmail.com || +1 (980) 549-2936

www.linkedin.com/in/sai-manideep-channa-440b33228

PROFESSIONAL SUMMARY:

- Experience of 9+ years in all the phases of Software Development Life Cycle including requirements gatherings, analysis, applications design, development, integration, maintenance, installation, implementation and testing of various client/server, N - tier and web applications.
- Experience in creating User Interfaces and professional web applications utilizing **ReactJS, TypeScript, ES6, XHTML, JavaScript, MongoDB, Ember.js, VanillaJS, CanvasJS, jQuery, AJAX, XML, Ext JS, NodeJS, CanJS, Bootstrap, JSON, HTML 5, CSS.**
- Expertise in a modern JavaScript framework (i.e. **Angular, React, Backbone**)
- Expertise in Design, development and testing of web application and integration projects using technologies such as **Java, J2EE, Struts, JSP, JDBC, Spring Framework, Design Patterns, Hibernate, Webservices (REST/SOAP).**
- Strong knowledge on principles of **Microservices and Microservices-Architecture.** Experience developing **Spring Boot based microservices** by leveraging modern CI/CD tools and deploying in Public-Cloud (AWS).
- Experience developing SOA based application with **RESTful and SOAP web services using Spring Boot.**
- Expertise to build interactive user interfaces (**UIs**) using **react.js, one-way data flow, virtual DOM, jsx, SAML, Vue JS, and react native principles.**
- Experience with design patterns such as the singleton, factory pattern, prototype, business delegate, session facade, service locator, observer, decorator, front controller, and **Vue.JS pattern.**
- Having strong DevOps experience with **Jenkins, Gradle, GitHub, Jfrog Artifactory and Docker.**
- Experience with Continuous Integration and deployment tools like **Docker / Kubernetes / Jenkins /Hudson.**
- Worked in container-based technologies like **Docker, Kubernetes and OpenShift.**
- Good working knowledge of **AWS, Spring Boot, Spring Cloud, Docker, Maven** , etc. in developing applications which use cloud-based services.
- Expertise with **CSS3** and modern compilers (**Less, Sass**, etc.)
- Solid understanding of object oriented programming.
- Experience in Data analytics & visualization using front-end JavaScript frameworks (**D3.js, High Charts, Chart.js** etc.)
- Experience with **Amazon web services** such as **ec2, Kibana, SQL, ReactJS, MongoDB, Spark Streaming, Vue JS, TDD GitHub, S3, GraphQL, elastic search, and dynamo DB via the AWS LAMBDA console and API integration.**
- Experience of **GIT, API, CONFLUENT, microservices CVS, elastic search, docker SVN, Vue JS, Spring boot, Spark Streaming, bootstrap, Spring Cloud** and **Perforce.**
- Experience in using Web services like **SOAP and RESTful Web Services.**

- Experience in developing unit test cases using **Karma, Mocha and Protractor** to perform end-to-end testing on AngularJS applications.
- Worked on Responsive Web Design (RWD) and implemented basics level of **AngularJS, ReactJS**.
- Used various IDE's like **Dreamweaver, WebStorm, IntelliJ, Notepad++, Eclipse, Sublime Text 2, Brackets and Visual Studio**.
- Worked on different browsers (**IE/Firefox/Safari/Chrome**) for checking cross browser compatibility and Responsive Web Design.
- Used **GitHub, CVS and TFS** for code repository and **Jenkins** for continuous build.
- Familiar with Full Stack JavaScript (Mongo EAN).
- Experience in working with Relational Database (RDBMS) concepts and have strong experience in writing complex queries using **Oracle, DB2, MySQL and NOSQL databases like Cassandra and MongoDB**.
- Expertise in creating and moving existing applications to cloud-based platforms such as **Amazon Web Services (AWS Lambda)** and crucial Cloud Foundry.
- Good understanding of **Java, JSP, AJAX, jQuery, jQuery mobile and plugins**.
- In depth knowledge of design software (**Photoshop, Fireworks, Illustrator, Flash, etc.**).
- Well versed **W3C and ADA** standards. Versed on current web development and industry standards.
- Well versed in using Software development methodologies **Agile Methodology, Scrum and Waterfall software** development processes.
- Strong analytical, presentation, problem solving and excellent inter-personal skills, and an active team player with proven work ethics and leadership qualities, Flexible and versatile to adapt to any new environment, ability to work independently or as a part of the team.
- Quick Learner, highly motivated team player and self-starter with effective communication, motivation and organizational skills combined with attention to detail and business process improvements.

TECHNICAL SKILLS:

Programming Languages: Java 1.7/1.8, JavaScript, SQL, Python, HTML, CSS, PL/SQL

J2EE Technologies: EJB, Hibernate, Servlets, JSP, JMS & JDBC, Spring Framework, Webservices

Web Application Development: Servlets, JSP, Spring MVC, Spring Boot, Hibernate

Front End/Web Technologies: HTML5, DHTML, JavaScript, Typescript, AngularJS 1 to 13, Angular, ReactJS, CSS, XML, XML Schema, XSLT, XSD, DTD, JSON, YAML, NodeJS

Web Services & API development: REST APIs, JAX-RS, JERSEY, SOAP, WSDL, JAX-WS

Database Development: SQL, PLSQL, MySQL, Oracle 11g/12c, MongoDB, Cassandra

Application Servers/Web Servers: Apache Tomcat, Oracle WebLogic, JBOSS, WebSphere

IDE, Version Control: IntelliJ, Eclipse, Spring Tool Suite, SVN, Git, GitHub

Cloud technologies (AWS): EC2, S3, ELB, Auto-Scaling, VPC, Route53, DNS & IAM

Operating Systems: Microsoft Windows, Unix, Linux, MacOS

SDLC: Agile, Scrum, Iterated Waterfall

Build tools: Maven, Jenkins, Docker, Apache Ant

Cloud services: Amazon Web Services (AWS), Azure.

PROFESSIONAL EXPERIENCE:

Client: JPMC

April 2023 - Till Now

Location: Columbus, Ohio

Role: Sr. UI Developer

Responsibilities:

- Implementing responsive **ReactJS** components for different solutions and performing the server-side validations using **NodeJS** Framework.
- Developed, tested, and maintained current systems written in React and Angular. Responsible for installing, configuring and maintaining **React, Node and MySQL on AWS cloud servers**.
- Used functionalities to write code in **HTML5, CSS3, Angular 4 to 13, JavaScript, jQuery, Ajax, JSON, and Bootstrap with MySQL database** as the backend. Extensively used **ES5, ES6, Responsive Design, JavaScript and Typescript** to make the web pages more interactive.
- Built Restful web API with Spring, **Spring Boot**, and testing APIs using **Postman**.
- Made **NodeJS** backend using **ExpressJS and MongoDB**
- Involved designing in web pages using **HTML5, CSS3, JavaScript, ES6, Bootstrap, SASS, LESS, React.js, Redux, Flex, MongoDB**
- Implemented various screens for the front end using **ReactJs** and used various predefined components from **NPM** (Node Package Manager) and **Redux library**.
- Developed **ReactJs application Using Iframe in Angular application** with different browsers and fixed bugs for browser compatibility.
- Used **Redux and Redux Toolkit for state Management** across the components.
- Participated in meetings with the end-clients to develop layout color scheme for the web page and implemented them with the help of **HTML5, CSS3, Angular 10, React JS and JavaScript**.
- Experience in using ANT and Maven tools to compile, package and deploy the components to the Application Servers in different environments.
- Experience with Version Control tools like **GitHub, CVS, VSS and SVN for Source Code** version management and merging Source code after intermittent Project releases.
- Participated in the **CI/CD** process by using **GIT, Nexus, Jenkins**, job generation, Maven build, and **Docker** image creation and deployment in an **AWS** environment.
- Established a display layer for dynamic web content using **HTML5, Kafka, Gradle, Appian BPM, XML, SPARK STREAMING, Vue.JS, Camunda, MuleSoft, ForgeRock, Scala, Angular.io AWS Lambda, CSS3, DevOps, GRAPHQL, Mainframe, GKE, SPARK ARCHITECTURE, docker, JavaScript, and React.js**.
- Experience in working with Relational Database (RDBMS) concepts and have strong experience in writing complex queries using **Oracle, DB2, MySQL and NOSQL databases like Cassandra and MongoDB**.
- Good understanding of **Java, JSP, AJAX, jQuery, jQuery mobile and plugins**.
- In depth knowledge of design software (**Photoshop, Fireworks, Illustrator, Flash, etc.**).
- Well versed **W3C and ADA standards**. Versed on current web development and industry standards.
- Well versed in using Software development methodologies Agile Methodology, Scrum and Waterfall software development processes.
- Worked on large data Visualizations and presentations using **AngularJS and visualization frameworks using D3.js**.

- Performed PCI audits on front-end pull requests and add bug fixes to features on a large-scale, multi-repository billing interface project using **AngularJS, LESS, HTML5, Git, and Gulp/Grunt**.
- Coded extensively using **JavaScript, MVC Framework, AngularJS to make rich internet web application for a Single page app**.
- Excellent experience in **Restful Web services and Big Web service development**.
- Design and developed various view and partial view using Object Oriented **JavaScript, Bootstrap, JSON, jQuery, Ajax Helpers, AngularJS and Node.js**.
- Implemented client-side validations in registration forms, login and logout forms using JavaScript.

Environment: HTML5, CSS3, Angular 4 to 13, JavaScript, JSON, jQuery, Node.js, React Js, Redux, AJAX, Bootstrap, SQL, Typescript, JSP, OAuth2, Servlets, MySQL, Spring, Spring boot, POSTMAN, Hibernate, AngularJS, API Gateway, Servlets, Bootstrap, Node JS, Typescript, JavaScript, MySQL, Apache Kafka, Protractor, Karma, Jasmine, Jenkins, CI/CD, AWS, GIT, JIRA, Maven.

Client: District Online Portal (LAUSD)

Sep 2019 - Mar 2023

Location: Chicago IL

Role: Sr.UI/Web Developer

Responsibilities:

- Used JavaScript, Grunt.js and Angular 2 for client-side validations.
- Developed test scripts to automate process of testing in Protractor Angular 2/4. Contributed to write e2e and unit tests with Protractor and Jasmine (with Karma as tests runner)
- Worked on Cloud Applications and Polymers.
- Brief experience on implementing the Angular JS in creating animations based on CSS classes.
- Participated in meetings with the end-clients to develop layout, color scheme for the web page and implemented them with the help of HTML5, CSS3 and JavaScript.
- Extensively used CSS3 (Cascading Style Sheets) along with RWD to apply different styles to the layouts for varying screen sizes and pixels.
- Created Wired frames using Adobe Photoshop and Illustrator. Converted the Photoshop mock-ups in to hand-written HTML and CSS pages.
- Coded JavaScript and jQuery for page functionality, modal windows and to perform the client-side validations.
- Upgrading the project from Angular2 to Angular 4 and performed form validations using reactive forms for sign in and inputting ticket rising information from Angular4.0 framework.
- Used functionalities to write code in HTML5, CSS3, Angular 4, JavaScript, JQuery, Ajax, JSON, and Bootstrap with MySQL database as the backend. Extensively used JavaScript to make the web page more interactive.
- Built Web pages that are more user-interactive using jQuery plugins for Drag and Drop, AutoComplete.
- Designed Frontend for enhancing user experience by designing new web features with object-oriented JavaScript Framework like Angular2, Node.js etc.
- Developed web pages using Ext JS, Forms, Components, Layouts, Events, Validations, Trees, Grids components.

- Involved in developing responsive web pages for the application using Bootstrap and JavaScript for client-side presentation and data validation on client side with in the forms.

Environment: HTML5, CSS3, Angular 2/4, Java Script, JSON, jQuery, Node.js, Typescript, AJAX, Ext.js, Bootstrap, D3.js, DOM, Tomcat Server, Visual Studio, SVN, SQL, Ember.js, Node.js, Hibernate, Cloud Applications, Polymers, SAAS, RWD, Typescript, Angular JS 2.0, GIMP, AngularJS, Knockout.JS, Bootstrap, Ext.JS, Mongo DB.

Genpact

Nov 2017 - July 2019

Title: HLT – Hearing Aid Center

Client: Hearing Lab Technology (HLT), USA

Location: Hyderabad

Role: Front End Application Developer

Responsibilities:

- Developed the User Interactive web pages in a professional manner using web technologies like HTML5, XHTML and CSS3 based on the W3C and ADA standards.
- Developed the App using HTML, CSS, JavaScript and Servlets. Deployed the application in Tomcat.
- Involved in developing a single page application (SPA) using AngularJS framework and Bootstrap twitter framework.
- Developed the application for responsive to different screen resolutions using Bootstrap and CSS3 media queries.
- Developed the UI with extensive use of Backbone.js framework that helped to organize the code.
- Developed UI modules for the mobile version of the website using React.js
- Implemented Backbone.js and React.js to create a dynamically changing website.
- Designed Node.js applications using MVC frame works and installation of client-side dependencies using BOWER.
- Designed dynamic client-side JavaScript codes to build web forms and simulate process for web application, page navigation and form validation.
- Used jQuery core library functions for the logical implementation part at client side for all the applications
- Involved in writing code using AJAXto interact with APIs, RESTful Web Services.
- Performed POST requests in Ajax calls for JSON using AngularJS (\$http, \$resource).
- Development workflow using task runner Grunt, package management tools BOWER, Node.js for the server-side run-time environment.
- Involved in multiple projects with different clients in developing UI screens using spring, Hibernate and JavaScript frameworks.
- Did Cross Browser coding, for making pages compatible with all browsers.
- Produced GUI prototypes for business logic presentations.
- Performed validation of completed sites including the debugging and testing of code.

Environment:HTML5, XHTML, CSS3, JavaScript, jQuery, JSON, AJAX, NodeJS, AngularJS, Bootstrap, React.JS, Backbone.js, Apache Tomcat, MVC.

Genpact

May 2015 - Oct 2017

Title: HLT Online Scheduler

Client: Hearing Lab Technology (HLT), USA

Location: Hyderabad

Role:Front End Application Developer

Responsibilities:

- Created Responsive Web page designs using HTML5&CSS3 and validated web pages with W3CValidator.
- Used Dreamweaver as HTML Editor for designing new pages. Developed HTML prototype documents with CSS Style Sheets.
- Gathered the data from the backend using AJAX and JQuery.
- Gathered data from API/web services via AJAX-JSON calls and updating the DOM within the result sets.
- Creating cross-browser compatible and standards-compliant CSS based page layouts.
- Created Valid XHTML, CSS templates.
- Developed components based on JavaScript using ExtJS framework like GRID, Tree Panel with client reports customized according to user requirements.
- Developed interactive UI components and server-side functionalities using Python, leveraging object-oriented programming principles and libraries like Pandas, NumPy, and Flask for seamless integration.
- Optimized application workflows by implementing Python scripts for data manipulation, validation, and automation, enhancing overall performance and user experience.
- Developed client-side validation code using JavaScript and jQuery.
- Involved in coding pages with best Search Engine Optimization (SEO) techniques.
- Created and deploying new features in order to sustain and amend existing applications.
- Fixed the HTML errors in site core content editor.
- Worked on fixing cross browser compatibility issues.
- Fixed Front-End issues with the layouts.

Environment: HTML, CSS, JavaScript, jQuery, AJAX, XHTML, Ext.js, DOM, GIT, Usability Testing, Windows.

EDUCATION DETAILS:

- **Bachelors in computer science** from JNTU- Hyderabad. 2015
- **Masters in computer science** from University of Illinois Springfield. 2020
