- ❖ Email: saad.atlabme@gmail.com
- ❖ Location: California, USA

Seeking employment opportunity as **Android Developer** specializing in **Java | Kotlin | Android Jetpack APIs**.

PROFILE SUMMARY

- **Having 5+ years** of experience as a **Android Developer**, with expertise in **design, development, testing, and deployment** of mobile applications.
- **Proficient in Core Android & Android SDK technologies**, including Activities, Fragments, Broadcast Receivers, Services, Content Providers, and strong object-oriented programming (OOP) skills.
- Hands-on experience with Jetpack components (LiveData, ViewModel, Room, WorkManager, Navigation) for modern Android development.
- Well-versed in RESTful and GraphQL APIs, with experience in API development, integration, and documentation using Retrofit and OkHttp.
- Strong expertise in Room Database, SQLite, and Firebase Firestore, implementing offline data persistence, caching, and synchronization.
- Experience working with databases such as SQLite, Firebase Realtime Database, and Room, including query optimization and local storage management.
- Proficient in UI/UX design principles, working with XML layouts, Jetpack Compose, Material Design, ConstraintLayout, and third-party libraries like Glide, Picasso, Lottie.
- Good knowledge of MVVM and Clean Architecture, implementing scalable and maintainable applications.
- Hands-on experience with Android Jetpack, Dependency Injection (Dagger/Hilt), and Kotlin Coroutines for asynchronous programming.
- Strong knowledge of CI/CD pipelines for mobile applications, using GitHub Actions, Bitrise, and Firebase App Distribution.
- Expertise in unit testing and automation testing using JUnit, Espresso, and Mockito.
- Experience working with agile methodologies (Scrum, Kanban) using tools like JIRA, Trello, and Confluence.
- Strong problem-solving skills, ability to work in a team environment, and excellent communication skills for client interactions and technical documentation..

EDUCATION

Hamdard University
Karachi, Pakistan
Bachelor of Science in Computer Science
Majors: Software Engineering

September 2011 - June 2015

EXPERIENCE

02/2023 – 03/2025

Net Management.
Senior Android Developer (Java/Kotlin)
Dubai, UAE

Android Developer with a strong focus on integrating next-gen payment systems, using innovative technologies to create secure, seamless, and scalable payment solutions that deliver exceptional user experiences and meet business objectives.

Tasks and Achievements

- Designed, developed, and optimized high-performance Android applications using **Kotlin & Java**, implementing **modern architectural patterns (MVVM)** and adhering to **clean code principles** for scalability and maintainability.
- **Integrated payment systems** like **Rubean, Payfelix, Worldline**, and other secure transaction solutions, ensuring seamless in-app payments and compliance with industry standards.
- Experience in **dynamic language localization**, implementing multi-language support, including **English, German, and Arabic**, ensuring seamless UI/UX across global markets.
- Wrote highly efficient Kotlin code to handle features like Google Play Services detection, formatted currency handling, and switch states based on app conditions.
- Hands-on experience integrating **RESTful APIs** using **Retrofit & OkHttp**, ensuring efficient data communication and optimized network performance.
- Expertise in **local data storage solutions** like **Room Database** with **LiveData** for real-time updates, improving application responsiveness and efficiency.
- Proficient in **Google Play Services API integration**, including features like **Google Sign-In, Play Store validation, Google Maps and location services**.
- Strong knowledge of **CI/CD pipelines** using **GitHub Actions, and Fastlane**, streamlining app builds and releases.
- **Experience working with Android devices with partial Google Play certification**, implementing robust detection and validation mechanisms.
- **Proficient in Firebase services**, including **Cloud Messaging (FCM), Firestore, and Firebase Analytics** for real-time data updates and push notifications.

07/2021 – 01/2023

Expert Hub Robotics.
Senior Software Developer (Java / Kotlin)
Humanoid Research & Development Department
Dubai, UAE

Team player for all the projects of **Java web** and **Android** Development. Collaborate with the stakeholders of the project to develop and integrate **Web** and **Android** applications and to deliver the project to the business within the timeline.

Tasks and Achievements

- Communicate with clients to gather and understand their business requirements.
- Involved in various phases of the Software Development Life Cycle (SDLC), including requirement gathering, modeling, analysis, architecture design, prototyping, development, and testing.
- Developed complex nested **components** for reuse such as **Pop-Up, Navigation**.

- Applied **CSS3** and **Bootstrap** for responsive web pages.
- Created **Services** to consume **REST APIs** and to communicate between components using **Dependency Injection**.
- Developed server-side applications to interact with the database using **Spring Boot** and **Hibernate**.
- Implemented **Log4j** technology for a broader perspective of the project.
- Used **Postman** to test the **RESTful** API for **HTTP** requests like **GET**, **POST**, and **PUT**.
- Used **GIT** for a version control tool for merging branches and used **Source tree** to solve conflicts.
- Integrate **3rd Party Artificial Intelligence** components with robots such as **Facial Recognition** and **Voice Recognition**.
- Integrate **Robot SDK** to utilize functions of **Robot Operating System** with **Android** applications.
- Worked on different Robots like **Sanbot**, **Cruzr**, **Oculus**, **Alice** and **Amy**.
- Worked on **Facial Recognition** and **Voice Recognition** engines (**Speech to Text** and **Text to Speech**)
- Worked on chat\voice bot hardware and software specific with different language localization.

05/2018 – 06/2021

Atlab Trading LLC.
Software Developer (Java J2EE)
Humanoid Research & Development Department
Dubai, UAE

Team player for all the projects of **Java web** and **Android** Development. Collaborate with the stakeholders of the project to develop and integrate **Web** and **Android** applications and to deliver the project to the business within the timeline.

Tasks and Achievements

- Communicate with clients to gather and understand their business requirements.
- Involved in various phases of the **Software Development Life Cycle (SDLC)**, including requirement gathering, modeling, analysis, architecture design, prototyping, development, and testing.
- Developed complex nested **components** for reuse such as **Pop-Up**, **Navigation**.
- Applied **CSS3** and **Bootstrap** for responsive web pages.
- Created **Services** to consume **REST APIs** and to communicate between components using **Dependency Injection**.
- Developed server-side applications to interact with the database using **Spring Boot** and **Hibernate**.
- Implemented **Log4j** technology for a broader perspective of the project.
- Used **Postman** to test the **RESTful** API for **HTTP** requests like **GET**, **POST**, and **PUT**.
- Used **GIT** for a version control tool for merging branches and used **Source tree** to solve conflicts.
- Integrate **3rd Party Artificial Intelligence** components with robots such as **Facial Recognition** and **Voice Recognition**.
- Integrate **Robot SDK** to utilize functions of **Robot Operating System** with **Android** applications.

01/2017 – 04/2018 **Management & Real Estate Academy.**
Software Engineer (J2EE\Java)
Dubai, UAE

Project lead of web and mobile development team for **J2EE and Android projects**. Collaborate with quality assurance, key executives, UI designers, and other developers to develop cutting-edge applications for the procurement sector without jeopardizing data privacy or security.

- Tasks and Achievements**
- Created flow and functional requirement documents of application modules according to company standards and business logic; made projects organized and structured.
 - Involved in analysis, debugging, system integration, and testing phases of the projects.
 - Deployed and configured the server in a production environment for **J2EE** required components like **MySQL, Tomcat, Apache2**, etc.
 - Used a Subversion control system to track developed artifacts which increased the work efficiency of the team.
 - Applied **OOP** and **design patterns** on web, console, and Android-based applications.

10/2015 – 11/2016 **Order Call (Pvt.) Ltd.**
Software Engineer (J2EE\Java and Android)
Research & Development Department
Karachi, Pakistan

Project lead of web and mobile development team for J2EE and Android projects. Collaborate with quality assurance, key executives, UI designers, and other developers to develop cutting-edge applications for the procurement sector without jeopardizing data privacy or security.

- Tasks and Achievements**
- Created flow and functional requirement documents of application modules according to company standards and business logic; made projects organized and structured.
 - Developed **RESTful** web services for Android and external applications.
 - Involved in analysis, debugging, system integration, and testing phases of the projects.
 - Worked on **GIS** with **Google Maps, JavaScript**, and Android **API** to keep track of field force and outlet mapping for distributors.
 - Worked on **NFC** card bit-level programming in the Android framework.
 - Worked on **MySQL/SQLite** with **web** and **mobile** applications.
 - Deployed and configured the server in a production environment for **J2EE** required components like **MySQL, Tomcat, Apache2**, etc.

Projects
J2EE Applications

- ❖ Product Batch Management System – VeriText

Android Applications

- ❖ Field Force Track Management System – FT
- ❖ On Spot Order – Sales
- ❖ Outlet Order – Retailer
- ❖ OC Admin – Sales

- ❖ Lead Generation – Sales
- ❖ Veri App - Logistics

08/2014 – 10/2015

Badar Expo Solutions (Pvt.) Ltd.
Software Engineer (.Net)
IT Department
Karachi, Pakistan

- Developed new software\website functionality to increase productivity
- Worked closely with team and learned advanced programming techniques, project management, and development of software modules
- Exposure to Java programming language and OOP concepts
- Debug and unit test the code using different test cases
- Maintenance of existing projects
- Perform unit & system level testing
- Document the system through system narratives and flowcharts
- Develop moderately complex software in C# in accordance with applicable software development methodology and release processes.

SKILLS

- **Programming Language:** Java J2EE, Kotlin, Android
- **Mobile Technology:** Android
- **Development Environment:** NetBeans, Eclipse, Android Studio, STS
- **Database:** MySQL, SQLite
- **Operation System:** Linux, Ubuntu, Windows
- **Other Skills:** Software Development Life Cycle, Requirements Gathering and analysis, Technical and end-user documentation, Problem Analysis and resolution, and Project Management

PERSONALITY TRAITS

- Good oral, written & presentation skills
- A high tolerance for stress and enjoys responsibilities
- Quick learner with good grasping ability
- Action-oriented and result-focused
- Lead & work as a team in an organized way
- Great time management skill
