

NURDAN SABAN
QA / Software Automation Test Engineer
(508) 603-9803 | sbnnurdan@gmail.com | Greater Boston, MA

SUMMARY

QA Engineer with **5+ years** of expertise in Quality Assurance and Software Automation Testing for web-based and client/server applications. Proficient in both **Manual** and **Automation** testing within Agile Methodology frameworks.

TECHNICAL SKILLS/TOOLS

- Languages: **Java, Python, SQL, HTML, Gherkin**
- Automation Tools: **Selenium WebDriver, REST Assured, JDBC**
- Test Management: **JIRA, Jenkins, Confluence**
- Testing Frameworks: **JUnit, TestNG, PyTest, BDD Cucumber, Maven**
- Databases: **Microsoft SQL, PostgreSQL, MySQL**
- API Testing: **Postman** for **RESTful** API testing
- Version Control Systems: **Git, Sourcetree, GitHub, GitLab**
- IDE: **Eclipse, VS Code**
- Project Management Methodologies: **Agile/Scrum**

EXPERIENCE

Exacom, Inc., Manchester, NH | QA Automation Test Engineer | Jan 2023 – Present

- Led testing initiatives for enterprise-level components ensuring efficient storage and retrieval of multimedia data across **on-prem** and **cloud environments**.
- Developed comprehensive **Test Plans, Test Scenarios, and Test Cases** for both **Manual** and **Automation** Testing from scratch.
- Designed and implemented a web-based applications testing Automation Framework utilizing **Python** and **Selenium WebDriver, Pytest Framework**.
- Integrated automated testing seamlessly into the **CI/CD pipeline using Jenkins**, facilitating nightly test executions.
- Spearheaded the implementation of **automated regression testing**, resulting in a considerable reduction in regression testing time and improved detection of critical issues prior to product releases.
- Backend Testing, including **SQL query** execution and database testing. Connected to the database to query the database using SQL for data verification and validation.

Fannie Mae, Washington, D.C. | QA Automation Test Engineer | Jul 2019 - Jan 2023

- I used **Selenium** as a testing tool with **Cucumber** Behavior Driven Development (**BDD**) framework using **Java**. I developed my “testing framework” based on Page Object Model (POM) and I have worked with MAVEN as a build management tool and Selenium with JUnit testing framework. I have also worked with **TestNG** and Data Driven Testing using Apache POI.
- Developed and sustained **automated testing frameworks**, crafted and deployed tests, identified remedial actions, and conducted automated tests to guarantee product excellence.
- Produced **Test Scripts** to operationalize test cases, test scenarios, behavioral attributes, and step definitions for **BDD** through the using **Java** and utilization of **JUnit** and **Cucumber with Gherkin**.
- Extensive knowledge of **SQL** queries and I used **MsSQL** to interact with a relational database and and **JDBC** for database testing. I am also comfortable with the **Data Driven (DDD) Frameworks**.
- Expertise in **REST API automation** testing using **REST Assured Java**.
- Through knowledge on Rest manual testing tools like **Postman**.
- Created and maintained detailed **documentation of testing procedures, results, and issues** to facilitate transparency and collaboration across teams.

EDUCATION

- **Bachelor of Faculty of Economics and Administrative Sciences | Anadolu University, Türkiye**
