

Neha Sanjamgari

(845) 233-1623 | sanjamgari.neha29@gmail.com

Professional Summary

- **Experienced ServiceNow Developer & Administrator** with **3+ years** in development, administration, and ITSM module customization.
- Expert in automation using **Workflows** and **Flow Designer** to streamline business processes.
- **Proficient in ITSM, CMDB, Asset Management, Service Catalog, and Workflow automation** for enhanced platform functionality.
- **Skilled in scripting:** Business Rules, UI Actions, Client Scripts, Server-side Script Includes, and fix scripts for system optimization.
- **Strong expertise in data management**, including external data imports, CMDB governance, and dashboard/report creation.
- Strong Expertise in developing and customizing ServiceNow **forms, fields, sections, related lists, and views** to optimize user experience and streamline data management within the platform.
- **Hands-on with REST/SOAP API integrations**, ensuring seamless communication between ServiceNow and external systems.
- Knowledgeable in **Agile and Scrum methodologies**, ensuring smooth project execution and team collaboration.
- Experienced in **instance migrations, system upgrades, compliance reporting, and governance audits**.
- **Configures and manages SLAs in ServiceNow** to ensure service delivery standards.
- **Up to date with latest ServiceNow features and industry trends** to drive innovation and platform optimization.
- **Expertise in security and access controls**, including ACLs, Client Scripts, UI Policies, Data Policies, UI Actions, and UI Builder.
- Engaged in **self-directed learning** through online resources to deepen understanding of ServiceNow functionalities and best practices.
- Strong skills in creating technical **documentation, user guides, and process flows** to support knowledge sharing and training.
- Effective communicator, capable of working with cross-functional teams to gather requirements and deliver solutions that meet business needs.

Technical Skills

Programming Languages	Java, SQL, and VBA.
Scripting Languages	HTML, CSS, JavaScript, PowerShell, and Linux Shell, Glide Script.
Web Services	REST and SOAP APIs for integrations
Development Tools	ServiceNow Studio, Update Sets
Workflow Automation	Workflow Designer, Flow Designer for process automation
Reporting and Analytics	Performance Analytics, Report Designer
Databases	MySQL and Oracle
Software Methodologies	Waterfall and Agile
Tools & Utilities	ServiceNow, Visual Studio
MS Office Suites	Excel, Word, Power Point and Outlook
Operating Systems	Windows 7/8/10 and Linux
IntegrationHub	Skills in using ServiceNow IntegrationHub for building integrations

Professional Experience

SERVICENOW DEVELOPER (REMOTE)

JANUARY 2025 – TILL DATE

Spartan Solutions INC.

Collierville, Tennessee

- Created and customized various front-end forms using Client Scripts, UI Policies, and UI Pages/Macros while implementing advanced UI customizations with JavaScript, JSON, and HTML.
- Designed and developed workflows along with reusable Workflow templates.
- Implemented HR Workspace via UI Builder and developed HRSD onboarding forms.
- Implemented and maintained the ServiceNow platform to align with ITIL best practices while configuring applications to support ITIL processes such as Incident Management, Change Management, Problem Management, Service Catalog, GRC/IRM, and User Administration.
- Developed and maintained inbound and outbound REST APIs for integration with third-party tools while managing integrations using Web Services like REST and SOAP.
- Created and managed scripts to invoke existing Script Includes for seamless automation.
- Experience using ATF to automate testing of ServiceNow applications, ensuring robust deployment cycles.
- Created and configured Business Rules, UI Actions, UI Policies, Data Policies, and Client Scripts while developing Import Sets, Transform Scripts, and Transform Maps to automate data processing.
- Conducted instance migrations between different ServiceNow versions such as Vancouver, Washington, and Xanadu using Update Sets while participating in quarterly releases, testing efforts, and UAT planning for smooth deployment.
- Worked closely with stakeholders to gather business IT requirements and translate them into ServiceNow solutions while following Agile and Scrum methodologies for project management and iterative development.

SERVICENOW ADMINISTRATOR

MAY 2020 – APRIL 2023

Connect DigiTech

Hyderabad.

- Extensive experience in configuring, managing, and maintaining the ServiceNow platform, ensuring optimal performance and availability.
- Familiarity with Mobile Studio for developing mobile applications on the ServiceNow platform.
- Knowledge of using and integrating third-party applications from the ServiceNow Store to enhance platform functionality.
- Conducted regular audits and reconciliation reporting to ensure data integrity and compliance with governance policies.
- Successfully set up a personal ServiceNow instance for hands-on practice, experimenting with various configurations and customizations.
- Proficient in handling incident and problem management processes, including ticket resolution and root cause analysis.
- Expertise in managing users, roles, and groups, ensuring proper access control and permissions across the platform.
- Implemented security best practices in application development, including data encryption, access controls, and compliance measures.
- Identified and resolved performance bottlenecks in existing applications, enhancing speed and responsiveness for end-users.
- Skilled in creating and customizing workflows and business rules to automate processes and improve efficiency.
- Emphasized a culture of feedback and iteration within the development team to continuously improve products and processes
- Experience in designing and maintaining service catalogs, ensuring user-friendly service request processes.

- Knowledgeable in managing update sets for application changes and coordinating release management activities.
- Proficient in monitoring system performance, identifying bottlenecks, and implementing optimization strategies.
- Awareness of the mobile capabilities of ServiceNow and basic principles of mobile app configuration.
- Familiarity with creating and consuming REST APIs for integrating ServiceNow with other applications or services.
- Understanding of JSON and XML data formats, commonly used in data exchange and API responses.
- Ability to create custom reports and dashboards to provide insights into service performance and usage metrics.
- Designed and implemented custom applications tailored to meet specific business needs, enhancing functionality and user engagement.
- Experience using version control systems (e.g., Git) for managing code changes and collaboration.
- Basic knowledge of JavaScript, Glide scripting, and automation tools within ServiceNow.
- Leveraged IntegrationHub capabilities to build complex integrations and automate workflows across multiple platforms.
- Experience with REST and SOAP APIs for integrating ServiceNow with other applications.
- Understanding of access control, security incidents, and compliance requirements.
- Conducted usability testing and feedback sessions to refine user interfaces, improving overall user satisfaction with ServiceNow applications.
- Experience working in Agile environments and participating in Scrum ceremonies.
- Developed and executed automated testing scripts to ensure code quality and reduce manual testing efforts, improving deployment efficiency.
- Validated expertise in ServiceNow administration and best practices.

Education

MASTER OF BUSINESS: MANAGEMENT INFORMATION SYSTEMS

Lamar University, Beaumont, TX
(GPA 3.99)

DECEMBER 2024

Achievements

- Received Graduate Non-Resident Fee Waiver for best performance in academics.
- Achieved Honors as a Best Student in bachelor's in Sreenidhi Institute of Science and Technology.

Certifications

ServiceNow Certified System Administrator (CSA).

Micro-Certification - Welcome to ServiceNow.

Mastering the Servicenow Admin & Development (Udemy).
