Salesforce Consultant-Architecture/Development

Summary Skills

- 10+ years of Salesforce.com / Full-Stack Developer experience
- Experience delivering functionality through an Agile Scrum delivery model interacting with business processes.
- Ability to communicate technical solutions, both written and verbally, in a clear and easy-to-understand way.
- Strong leadership and coordination of project direction and resources.
- Experienced implementing simple solutions while cleaning/organizing/streamlining Salesforce orgs.
- Ability to pick up new technologies, programming languages and concepts very quickly and independently.
- Currently working towards Salesforce Certified Technical Architect.
- Experienced professional in coaching and educating others.

PROFESSIONAL HISTORY

Nickjohnson.cloud | Independent Senior Salesforce Consultant

February 2009 – Current

Providing Salesforce consulting services, driving innovative development and architecture for various clients. Project highlights include:

Client: Safelite | Senior Salesforce Developer

September 2023 – December 2024

- Spearheaded Salesforce implementation to optimize customer scheduling workflows. • Designed reusable LWCs for dashboards and reporting tools.
- Integrated Salesforce with external CRMs, enhancing sales and customer management. • Designed and implemented Einstein Chat Bots with SMS integration to enhance service desk customer support, leveraging custom LWC components and complex chatbot workflows to streamline interactions and improve response efficiency.

Client: Syngraffi | AppExchange Consultant

December 2023 – June 2024

- Developed a scalable AppExchange product for customer feedback management. • Created custom Apex frameworks, reducing deployment time by 30%.
- Led continuous integration pipelines for seamless release management.

Client: US Army | Senior Salesforce Developer

September 2022 – June 2023

- Built a custom, reusable Lightning Web Component (LWC) User Management solution. • Developed complex Apex interfaces for user onboarding and recruiting hierarchies. • Integrated Salesforce with government systems via MuleSoft and Platform Events. • Created asynchronous processes leveraging Queueables and Salesforce setup objects. • Implemented a multi-tier custom sharing model with order-of-execution control. • Supported agile pipelines, peer reviews, and QA documentation for ongoing success.

Client: Self Credit Builder | Lead Developer

July 2021 – June 2022

- Led development of a fully custom Service Cloud implementation.
- Created a geo-tagging user interface with backend integration for location-based selling. • Built mobile SDK integrations and Service Cloud SDK for enhanced user engagement. • Managed release support and drove best practices for project efficiency.
- Integrated Einstein Chat Bot APIs with the mobile SDK, collaborating closely with the client's mobile development team to ensure seamless integration, enhance customer engagement, and optimize real-time support experiences within the mobile app.

Client: Consulting | Senior Technical Consultant

February 2021 – July 2021

- Developed a Salesforce-based loan platform with AWS backend integration. • Delivered LWC-based frontend components and custom Salesforce sites. • Implemented integration workflows and best practices for scalable deployment.

Client: Sansotti Technologies | Senior Technical Consultant

January 2017 – February 2021

- Spearheaded custom development within Salesforce OMS to support complex tax scenarios, enhancing the order lifecycle with tailored logic and automation.
- Created REST API frameworks in Apex for AngularJS-based loan applications.
- Developed CI/CD pipelines for Salesforce deployments using AWS, Jenkins, and Git.
- Mentored junior developers, producing technical blogs, guides, and training content.
- Built custom DevOps architecture, including rollback strategies and deployment monitoring.

Client: UGA Finance | Senior Salesforce/Java Developer

January 2016 – September 2016

- Created batch Apex processing tools with fault tolerance and concurrency controls.
- Developed a lightweight Apex trigger framework for data integrity and error handling.
- Designed payment system syncs and optimized Salesforce integration.
- Led a Java Spring MVC portal migration hosted on Amazon AWS.
- Developed sandbox post-copy scripts for PCI-compliant data masking.

Client: CloudFastener | Salesforce Lead Developer

October 2017 – October 2019

- Delivered scalable Salesforce solutions with custom workflows and API integrations.
- Automated recurring processes for operational efficiency.
- Improved system performance through Apex optimizations and Lightning upgrades.

Client: UL Information & Insights | Salesforce Consultant/Developer

May 2014 – July 2015

- Supported a private AppExchange application, enhancing product functionality.
- Delivered daily solution support and Salesforce optimizations.

Client: Perceptive Software | Salesforce Technical Lead Developer

February 2014 – January 2015

- Led Salesforce delivery for marketing and sales process optimization.
- Developed two-way integration with Rally Agile management via Apex and REST APIs.
- Created custom Visualforce forms, proposal automation, and feedback workflows.
- Integrated Salesforce with Qvidian proposal software and built recurring workflow notifications.

Client: Cloud Software, LLC | Salesforce Developer

September 2013 – January 2014

- Developed a Visualforce deduplication app for Five9 Cloud Call Center integration.
- Implemented search-by-phone functionality for lead management.
- Created Apex triggers and managed Salesforce deployments via change sets.

Golf Sales Rep

Srixon/ Cleveland Golf/ XXIO

Jan 2008 - Feb 2009 (1 year 2 months)

Education

Centriq Training's Career Program

Computer Programming, Specific Applications 2010 - 2011

ASP.NET 3.5 Web Framework • Quality Assurance • Project Management • Team Leadership
• Technical Architecture • Soft Skillings Training: Customer Care & Effective Communication

Certifications

Salesforce Certified Force.com Developer

July 2013 - March 2015

Certified Force.com Developers have mastered the declarative programmatic capabilities of the Force.com platform. They solve tough business challenges using their knowledge of the platform and make data-driven decisions using reports and analytics. Credential was retired in Spring '17 and replaced by Platform Developer I.
