East Northport, New York 11731
(631) 912-7751 | gangwishr@gmail.com

Work Experience

North Atlantic Industries

Bohemia, NY

Electrical Test Engineer

September 2022 - Present

- Lead testing/troubleshooting on the [NIU3A/NIU3E](#) product lines.
- Develop test procedures for electrical systems based on customer specification.
- Provide technical support to production personnel for release of new hardware/software.
- Troubleshoot circuits with the use of schematics, oscilloscopes, DMMs, thermal cameras.
- Root Cause Analysis & Corrective Action planning for customer failures.
- Write batch scripts & macros to assist in automation of new/existing hardware.
- Design tools to aid in the interfacing of hardware and software.

TLD America

Windsor, CT

Electrical Specialist Engineer

August 2021 - September 2022

- Design, layout, and symbol creation for electrical schematics & wiring harnesses.
- Produce, test and verify wiring harnesses to meet customer standards.
- Analyze hardware replacements for cost reduction and product improvement.
- Test department support; troubleshoot complex electrical issues.
- Maintain legacy systems; Identify replacements for obsolesced parts & investigate wiring discrepancies.

Education

University at Buffalo: SUNY

Buffalo, NY

Bachelor of Science: Electrical Engineering

Graduated January 2021

Skills & Certifications

- Schematic Design & Interpretation: Solidworks Electrical & Cadence Allegro
- Automation Programming: Batch script, Shell script, TeraTerm/PuTTY, Python
- Circuit Analysis & Troubleshooting Tools: Oscilloscopes, DMMs, Function Generators
- Mechanical Measurement Tools: Dial Calipers, Depth Gauges, Torque Gauges, Micrometers
- Soldering Certification: Soldering Electronics (J-STD001) & PCB Inspection (IPC-A-610)
- Communication Protocols: UART, CAN, I2C, SPI, TCP
- Advanced Microsoft Office: Excel, PowerPoint, Word, etc.
- Broad Knowledge of Military & Aerospace manufacturing standards
- Familiar with ISO9001 & AS9100 standards
