Professional Summary

DevOps Engineer with 9+ years of experience building, automating, and optimizing cloud and infrastructure systems. Proven success in managing large-scale AWS environments, creating CI/CD pipelines, container orchestration with Kubernetes, and deploying Infrastructure as Code using Terraform and Ansible. Experienced in Agile environments, mentoring, and cross-functional collaboration to deliver efficient and secure deployments.

Technical Skills

Cloud: AWS (EC2, S3, RDS, VPC, IAM, ELB), Azure

CI/CD Tools: Jenkins, TeamCity, Harness, ArgoCD, Bamboo, Hudson

IaC & Automation: Ansible, Terraform, CloudFormation

Containers: Docker, Kubernetes, Helm, EKS, AKS, ECS

Scripting: Shell, Bash, Python, Perl, Ruby, PowerShell

Monitoring: Splunk, ELK, Datadog, Grafana, Nagios, Dynatrace

Version Control: Git, GitHub, GitLab, Bitbucket, SVN, CVS

Build Tools: Maven, Ant, Gradle

Database: MySQL, PostgreSQL, MongoDB, Cassandra, DynamoDB

OS: Linux (RedHat, Ubuntu, CentOS), Windows, MacOS

Web Servers: Tomcat, Apache, Nginx, JBOSS, WebLogic

Other Tools: SonarQube, Nexus, JFrog, Rundeck, Jira, Confluence, Slack

Networking: TCP/IP, DNS, ICMP, VPNs, Security Best Practices

Agile & Dev Practices: Scrum, TDD, SDLC, Role-based Access Control (RBAC)

Professional Experience

Equilogs — *DevOps Engineer*

July 2022 – Present

- Automated configuration management using Ansible across multiple environments.
- Migrated CI/CD pipelines from TeamCity to Harness, improving deployment efficiency.
- Created Helm charts and supported Kubernetes-based microservice deployments.
- Supported DR region setup and scaling infrastructure using IaC and CI/CD principles.
- Integrated build tools (Maven/ANT) and managed Git/GitHub workflows.
- Built secure pipelines with SSL, certs, and monitoring integration.

Toyota Motors North America — *DevOps Engineer*

May 2020 – April 2022

- Managed AWS environments: EC2, VPC, ELB, Auto Scaling, IAM, and CloudFormation.
- Configured SonarQube quality gates for 300+ app teams to enforce security compliance.
- Facilitated communication across Ansible Core/Tower teams and app developers.
- Supported cloud migrations and system monitoring with Splunk and ELK.

Fiserv — *DevOps Engineer*

Aug 2018 – Feb 2020

- Maintained CI/CD pipelines with Jenkins and Ansible for AWS infrastructure.
- Deployed OpenStack in high-availability environments.
- Managed source control branching/merging via Git.

Chemex Global, LLC — *DevOps Engineer*

Sep 2017 – Mar 2018

- Built CI/CD pipelines integrating Jenkins, GitHub, Maven, Docker, and SonarQube.
- Set up master/slave Jenkins architecture and automated app deployments with Rundeck.
- Wrote shell scripts for app restarts and monitored deployment health.

Mitsubishi Heavy Industries — *DevOps Engineer*

Jan 2016 – Sep 2017

- Onboarded projects to GitHub, created CI pipelines in Azure DevOps.
- Created AKS clusters, pushed Docker images to ACR, integrated Azure pipelines.
- Deployed apps to Tomcat using Ansible and configured Linux environments.

Education

University of Houston – Victoria

Computer Information System

Federal University Of Technology

Mining Engineering

Certifications

AWS Certified Solutions Architect – Associate
