

Ken Beitel

Sr. IT Business Analyst

4410 Ludlow St, Boulder, CO 80305

e: ken.beitel@graphdash.com m: 720 436-2465

Business Analyst with 10+ years of experience supporting software development projects for clients with global reach. Skilled in gathering detailed requirements, designing technical workflows, and collaborating with developers to deliver scalable, user-focused systems. Proven success in Agile environments, API integration planning, and cross-team coordination.

Core Skills & Technical Proficiencies

Requirements Analysis & Documentation

- User Stories, Use Cases, Acceptance Criteria, BRD, TRD, FRD
- Strong collaboration with product owners and dev teams across SDLC
- Tools: Microsoft Office Suite, Excel, Word, Project

Business & Technical Analysis

- System Evaluation, API & ERP Integration, Data Mapping, Process Mapping
- Cross-functional collaboration between business, QA, and development teams
- Team Leadership, strong communication skills, people person, ability to mentor

Data Analysis & Integration

- SQL, NoSQL, ETL pipelines, System integration, SaaS projects
- Neo4j (Certified), PostgreSQL, MySQL, Microsoft SQL Server, SSIS
- Data mapping and transformation, data quality assurance

Tools & Platforms

- Lucidchart, Visio, SharePoint, Confluence, ServiceNow
- Postman, SoapUI, Azure DevOps, Jira

AI Systems & Automation Analysis

- AI/ML Integration Strategy, Business Process Automation, Workflow Optimization
- Natural Language & Semantic Search, AI Agents, Vector Search Analysis

APIs, Reporting & Deployment

- REST API Development, Swagger/Open API, JSON, XML, CSV, EDI
- Node.js, AWS, HTML, CSS
- Reporting: Power BI, SSRS, Crystal Reports, Dashboards

Development Methodologies & Lifecycle

- Agile, Scrum, Kanban, SAFe, Waterfall, UAT Testing
- Strong knowledge of data models, RDBMS objects, Hibernate object modeling

Work Experience

Sr. Business Analyst

GraphDash – Boulder, CO | *August 2021 – Present*

- Lead Business Analyst for **GridTechCentral.com**, an AI-powered platform enabling utilities and developers to search and evaluate grid technologies. Defined functional and technical requirements, developed metadata-driven data models, and supported implementation across a **TypeScript / Neo4j / React** stack.
- Contracted by **Boeing** to lead requirements engineering for a graph database system integrating **weather, flight, and airport data** for digital twin modeling. Authored Cypher queries, designed metadata schemas, and mapped data flows for AI search use cases.
- Served as **System Analyst for RTI International**, reverse engineering integrations between **Oracle HCM, HFM, SQL Server, and Deltek Costpoint**. Created enterprise architecture documentation including **Visio diagrams, data flows, and REST API interface specs** to ensure cross-system alignment and accessibility.
- Acted as **Product Owner and Scrum Master** for **WildFlower Education**, a mobile-first collaboration app for students. Delivered AWS Lambda-powered APIs and Postgres RDS backend, supporting real-time functionality for iOS/Android users.

Business Analyst

Motive Retail - Louisville, CO | *September 2014 to August 2021*

- Led business and systems analysis for a global API integration platform, enabling dealership software vendors in **58+ countries** to connect with automotive OEMs (Ford, Daimler, Jaguar Land Rover) via **OpenAPI-compliant REST services (JSON, XML) and ETL processes**.
- Delivered full lifecycle documentation, and stakeholder-led workshops to ensure clarity, usability, and alignment across multi-system development teams.
- Defined and maintained requirements for **cloud-based NodeJS/Express microservices** deployed on **AWS** integrated with **MySQL & SQL Server** processing **20M records daily**.
- Served as **Product Owner and Scrum Master** for the development of API certification and simulation tools, including UAT across **Java, C#, HTML, CSS** environments.
- Authored architecture documentation, metadata structures, and API maps to support consistent data integrity & repository alignment across a distributed vendor ecosystem.
- Acted as **technical lead and SME**, delivering global onboarding, dev enablement, and systems integration alignment to support OEM-grade API compliance. Featured Case Study: [Jaguar Land Rover API Integration](#)

Education & Certifications

- **Bachelor's in Computer Science**
- **Microsoft Certified Professional - .NET and Database Architecture**
- **AWS Well-Architected & Serverless Architecture Training (2023)**
- **Neo4j Graph Database Certified**
- **AWS Courses:** AWS Well-Architected, Architecting & Scaling Serverless Applications
- **Google Cloud Platform:** Core Infrastructure
