PROJECT/PROGRAM MANAGER

Drive multiple, complex, high-value software projects from concept to delivery, integrating modern PMO practices to streamline execution and elevate client outcomes. Lead cross-functional global teams through agile transformations that reduce overhead, accelerate delivery, and boost productivity. Deliver measurable results by optimizing processes, strengthening client partnerships, adaptable servant leadership, and managing multimillion-dollar budgets to achieve strategic growth. Love to learn new skills.

Technical Project Planning / Implementation, Delivery & Integration | Client Relationship Management | Process Improvement & Standardization | Data-driven Decision Making / Analytics | Former holder of PMP certification | Interfacing with product owner | Business Development | Change Management | PMO Development & Optimization | Global Remote Team Management

PROFESSIONAL EXPERIENCE

VERTIV CORPORATION | Westerville, OH

Project/Program Manager, B2B

04/2010 – 07/2025

Directed multiple concurrent embedded/desktop software projects generating \$2B+ in annual sales. Prepared and presented monthly project/program status for executive management to maintain stakeholder alignment. Led projects through full lifecycle, transitioning from waterfall to agile methods for teams of 5-20 with budgets exceeding \$3M, 70,000 hours, and CapEx/OpEx budgets of \$1.5M. Chaired status, standup, sprint planning, retrospectives, and change control meetings, managing scope, risk, and timely project performance. Developed detailed project roadmaps to streamline IT project delivery and enhance client outcomes,

- Coordinated Rally Agile toolset rollout (similar to Jira) and established training, which reduced administrative overhead by 15%, improving team efficiency and more accurate schedules.
- Optimized CMMI processes and improved estimation using historical data to support agile projects, leading to more accurate project timelines (< 6% from >10%) and resource allocation.
- Led team to integrate Agile development processes into the corporate product development process, resulting in formal corporate approval of agile development processes, faster product delivery and improved team collaboration.
- Received company achievement award for work leading a large Agile software development project that released a new human interface to data center infrastructure equipment that significantly enhanced product usability in setup and diagnostic capabilities.

LOGIKOS, INC. | Fort Wayne, IN

Software/Hardware Program Manager, B2B, Consulting

03/2008 – 12/2009

Directed embedded/desktop software teams with budgets up to \$900K, supported sales, and developed proposals and statements of work, enhancing client relationships. Managed and mentored 18 engineers through performance appraisals and training initiatives.

- Pioneered agile transformation by launching pilot scrum project integrating test-driven development practices.
- Implemented PMO/PMI best practices to standardize project reporting and enhance overall project management.

EDUCATION | CERTIFICATION

CASE WESTERN RESERVE UNIVERSITY | Cleveland, OH

Bachelor of Science in Computer Engineering

PROJECT MANAGEMENT INSTITUTE | Online

Previous certification—Project Management Professional (PMP)

TECHNOLOGY

Project Management Methodologies: Agile, Scrum, Kanban, waterfall, PMO, IT Project Delivery, Gantt Charts, PMI PMBOK

Technical & Analytical: CMMI, Cost Estimates, Requirements Analysis, Roadmaps, Software Delivery, Risk/Cost/Change/Schedule Management, Sales support, Data Lake project experience

Process Optimization & Tools: MS Office, MS Project, Rally (similar to Jira), SharePoint, Smart Sheet, MS Teams. Loop, Google Docs
