Objective

Modem Test/Validation Engineer with 5 years of experience with wireless testing, scripting, and RF environments across LTE, 5G, and Wi-Fi networks. I have proven expertise in managing test system such as Rohde & Schwarz, Anritsu, Keysight, device testing projects, and wireless field testing across LTE and 5G technologies. I have done scripting and log analysis with Python and Linux automation.

Education

B.S. in Electrical Engineering | University of Texas at Dallas | Aug 2017 – May 2020 | GPA 3.648

M.S. in Electrical Engineering (in progress, Online) | Purdue University | Aug 2024 - Present

Skills

Wireless	3GPP, LTE, 5G NR (NSA/SA), IMS, TCP/IP, L2, L3, SSSID, DNS, DHCP, Wi-Fi (802.11 ax, be)
Languages	AT Commands, Python, MATLAB, C++
Tools	Wireshark, iPerf3, Xcall, LinkMaster, MediaTek/Apple debugging tools, Spirent, QXDM
Equipment	octoScope (OTA), Oscilloscope, Splitters, Shielded Boxes, Attenuators
Software	Cadence Virtuoso, PSpice, Labview, Xilinx, MATLAB, Verilog, Linux, Windows
Certifications	FE, Fundamentals of Engineering, Electrical and Computer (December 2019 in United State at Texas),

Work Experience

Apple (via Staffing Agency) | Jan 2025 – Present

- **Field Design Engineer**
 - Conducted 5G/4G Cellular performance validation including OTA and mobility tests using Keysight and internal tools.
 - Logged and debugged KPIs related to voice (VoLTE, VoNR) and data (iPerf3, Wireshark)
 - Analyzed Cellular/Wi-Fi signal strength, connection stability, and RF behavior in controlled environments.
 - Cross-functional debugging using Wireshark and Linux based tools.

MediaTek (via Staffing Agency) | May 2020 – Dec 2024

- **Staff Engineer, System Validation** | November 2022 – December 2024
 - Led validation and CPE testing projects with Verizon (DFIT) and AT&T (10776)
 - Managed test plans for various carriers across North/South America (Canada, US, Brazil, Mexico) involving LTE, NR, GNSS.
 - Led customer joint testing with Samsung and Verizon for 5G FR2 and SA/NRCA.
 - Provided scripting support and trained filed engineers on Python and Linux tools.
- **Modem Test Engineer (Junior to Mid-Level)** | May 2020 –October 2022
 - Conducted carrier-specific testing for Verizon (DFIT, AGPS), AT&T (10776), and T-Mobile (F4L).
 - Supported lab testing with Rohde & Schwarz (CMW/CMX), Nokia, Ericsson systems.
 - Executed FR2 antenna tests and IoT protocol validation (CDRS, LAA, NSA, GNSS)
 - Supported lab validation with equipment such as spectrum analyzers and shielded enclosures

University of Texas at Dallas | Aug 2018 - Dec 2018

- **Student Apprenticeship and Mentoring Intern** ○ Documentation: Assisted professor in grading attendance, discussion boards, and assignments submitted by students.

Projects

VLSI Design – Verilog, Layout & Verification | Aug 2024 – Dec 2024

- Designed and verified password memory system in Cadence (DRC/LVS clean)

Senior Design – Solar Angle Detector & Orienting Solar Panel | Aug 2019 – May 2020 •

Developed energy0efficient orientation system (3rd place, UTD Expo 2019)

Solar Racing in University of Texas at Dallas | Feb 2019 – Dec 2019.

- Served as an Electrical Motor and Controls Leader; designed and organized data for members; constructed integrated circuits and control systems for the vehicle; handled recruitment of volunteers for motor and controls design.

Honors, Clubs, Organizations

National Society of Leadership and Success, Sigma Alpha Pi | Jan 2019 – Present

Tau Sigma National Honor Society | Mar 2018 - Present

Institute of Electrical and Electronics Engineers (IEEE) | Aug 2017 - Present

The National Society for Collegiate Scholars | Feb 2015 – Present
