TROY, MI | 248-635-8426 | INDXIGO@ME.COM

PROFESSIONAL EXPERIENCE

General Motors | Systems Integration Engineer | Warren, MI

07/2018-Present

- Support the development and validation of current and future battery technologies (car/boat/train) involving durability, life cycle, thermal, drive cycle, capacity/energy, cell characterization (HPPC, OCV, etc.), SOP limits, etc.
- Analyze wiring diagrams and build harnesses for test set-up
- Participate in DFMEA and DFMA review for improving pack design
- Calibrate test equipment; i.e. chamber, chiller, cycler, I/O rack, etc.
- Responsible for test script, module hardware, and driver projects involving CAN and LIN communication between battery pack to automation testing software and equipment; i.e. A&D iTest, NI Labview/Veristand, Vehicle SPI, etc.
- Create and maintain a cloud-based database system tracking battery pack information and test performance records
- Occasional collaboration projects and training with engine and transmission dyno testing
- Minor involvement with improving the design of the future Lunar Mobility Vehicle against regolith, testing battery technology in full vehicle mule Corvettes, aerodynamic drag testing for wind tunnel training, and on-track testing of company vehicles at MPG in 2018 and 2019
- Volunteer and mentor with Formula SAE

Consumers Energy | Technical Analyst Engineer | Jackson, MI

11/2016 – 04/2018

- Worked alongside electrical engineers using AutoCAD and Microstation to design layout diagrams and diagnose issues that may arise
- Additions and changes to circuit diagram projects maintained by C#/WPF script
- Completed high voltage training and visited substation/line sites to diagnose issues, suggest improvements to layout, or work with electrical engineer team for creation of new design

Ford Motor Company | Software Engineer (Contract) | Livonia, MI

06/2016 – 09/2016

- Developed and maintained automated testing with Matlab, CATIA, C++, and VB.net for the Hybrid Electric team to test vehicle engines/motors on dynamometer test cells
- Debugged issues at the testing equipment while working alongside test engineers to develop solutions
- Designed and implemented SQL database solutions including report design and deployment

Freelance software Development (Contract)

01/2011 – 01/2016

- Used Agile development to create an eCommerce website for a client selling handmade products with Javascript (including Coffeescript, jQuery, and Node.js), HTML5, PHP, and CSS3 for the front-end and user interface. Developed a SQL database to store product information required for the client.
- Developed web applications and designed web pages using C#, VB.net, and ASP.net languages over Visual Studio. Created the backend using SQL databases on Microsoft Access and SQL Server/MS.
- Designed and integrated a 3D web and mobile game application in Java and Javascript through Unity and SketchUp.

SKILLS

Programming: Python 3/2, VCL, WPF, C#, SQL, T-SQL, .NET, Visual Basic, C++, Java, Javascript, Coffeescript, Git, Go

Software: dSpace, Ansible Motion simulator, LabView, Vehicle Spy, Matlab, Simulink, DEWESoftCAN/LIN, Ethernet, Serial, A&D iTest, CATIA, Microstation, AutoCAD, SolidWorks, Visual Studio, Azure, MS Office Suite, Adobe Suite, Agile Development, SCRUM, barcode tech., MVVM, Gitlab, Jira, BMS, Blender, Siemens NX

Languages: English (Fluent), Spanish (Fluent), French (Intermediate), Japanese (N4), Chinese (Beginner), Norwegian (Beginner)

EDUCATION

Bachelors of Science, Information Systems Engineering - Oakland University, Rochester, MI

Minor, Spanish Language

CERTIFICATIONS

Lean Six Sigma Black Belt

Private Pilot License - (Estimated end of 2025)
