

SUMMARY:

- Results-oriented .NET Developer with 8+ of experience in designing, developing, and implementing software solutions using the .NET framework. Proficient in **C#, ASP.NET, MVC**, and **SQL Server**, with a strong understanding of object-oriented programming principles.
- Experience in using front-end techniques such as **HTML, CSS, JavaScript, jQuery, AJAX, JSON, react, AngularJS** to create the client-side user interface.
- Experience in Object-oriented analysis, design, and programming using UML and design patterns.
- Skilled in creating **RESTful APIs** using **ASP.NET Web API 2**, managing incoming HTTP requests, and generating responses with JSON data serialization.
- Proficient in applying Object-Oriented Programming (OOP) concepts such as Inheritance and Polymorphism, and adept at building applications using design patterns like **MVVM, MVC 5/4**, Abstract Factory, and Singleton.
- Experienced developing **REST API's** using **ASP.NET Web API 2**, handling **HTTP** requests and sending **HTTP** response with serialized JSON data.
- Working experience on developing Front-End based **AngularJS** applications, creating custom directives, services.
- Practical experience with working on Multiple-Environments like Development, Testing, and Production. Possess high working qualities with good interpersonal skills, high motivation, fast learner, good team player and very proactive in problem-solving to provide best solutions.
- Writing SQL, PL/SQL queries, and stored procedures, with a good understanding of Relational databases such as Oracle and SQL Server.
- Good programming, problem-solving skills, commitment & result-oriented, with a quest & zeal to learn new technologies.
- Expertise in developing, consuming, and deploying **XML Web Services (SOAP, WSDL)** using **.NET** Framework, coupled with a strong grasp of **Service-Oriented Architecture (SOA)** principles.
- Experience building reusable framework for consuming and providing REST API's using **Postman/Swagger**.
- Ensured **Quality and Timeliness** in Deliverables.
- **Self Confidence** and ability to deal with **critical situations**.
- Strong **analytical and decision-making** skills.
- Provided **Production Support** and **Resolved Issues** in critical times.
- Ability to adjust new environment.
- **Good interpersonal skills** and ability to **work in team** as well as **individual team member**.
- Hands on experience with **MySQL and PostgreSQL**.

TECHNICAL SKILLS:

- **Languages** : C#.NET, VB.NET, T-SQL, SQL, JavaScript, CSS, DHTML, PHP, NodeJS
- **Frameworks & Libraries** : ASP.NET MVC, jQuery, React Native, Angular, React
- **Databases** : MS SQL Server (2019/2016/2014), Oracle
- **Web Services** : RESTful API, SOAP, JSON, XML
- **Tools & Technologies** : Visual Studio, Azure DevOps, Git, CI/CD, Agile/Scrum
- **Cloud Platforms** : Microsoft Azure

PROFESSIONAL EXPERIENCE:

CVS Health, Connecticut

Nov 2023- Present

Senior .NET Developer

Responsibilities:

- Actively involved in the Design & development of a new rich user screen using Ext JS, JSF, jQuery, and service side controllers, model classes, and database components like packages, and procedures.
- Proficient in developing RESTful and WCF Web services, ASP.NET Web APIs, and engaged in pre-testing using tools like POSTMAN to ensure functionality and reliability.
- Experience with creating component-based architecture that can be reused at various places in application.
- Involved in requirements gathering, analysis, and development of the Insurance Portal application and implement the MVC pattern to separate presentation components.
- Involved in writing API with the database integration code using entity framework in .net core API.
- Integrated Plaid API to securely verify patient bank accounts for processing healthcare payments, reducing manual verification efforts and ensuring HIPAA-compliant financial transactions.
- Developed ACH payment solutions using Dwolla API, enabling seamless insurance claim payouts, provider reimbursements, and patient payment processing within the healthcare platform.
- Also works on Angular to implement Lazy loading for Angular Routing to improve the speed of the application load time by splitting the application into several bundles.
- Worked in an Agile environment and was involved in scrum meetings such as Product backlog meetings, Sprint planning meetings, Daily standup meetings, Spring review meetings, and Sprint retrospective meetings.
- Familiarity with a broad spectrum of Web technologies, principles of UI design, and Web Services APIs.
- Responsible for developing creative & responsive user interfaces using Angular 8, HTML5, JavaScript.
- Worked on configuring auto-scalable and highly available Microservices set with monitoring and logging using AWS, Docker, and Jenkins.
- Active participant in code reviews, offering valuable feedback to enhance team performance.
- Dedicated to ensuring code efficiency, reusability, and adherence to project structure and coding standards, while rigorously testing features
- Proficient in creating and executing design plans, prioritizing tasks effectively.
- Skilled in developing websites, landing pages, and applications from inception to deployment, emphasizing a responsive, mobile-first approach.
- Committed to building reusable code for future projects. Familiar with GIT strategies such as git-flow.

Environment: .NET, ASP .NET, MySQL, html, CSS, Bootstrap and JavaScript, jQuery.

State Of Wisconsin, Wisconsin

Nov 2022 – Aug 2023

Full Stack .NET Developer

Responsibilities:

- Responsible for application design, development, and lifecycle maintenance for portfolio performance systems with Java, JavaScript, Spring as required skills and EXT-JS, REST.
- Proficient in developing RESTful and WCF Web services, ASP.NET Web APIs, and utilizing tools like POSTMAN for pre-testing, ensuring functionality and reliability.
- Actively participated in daily Scrum and weekly meetings to meet project expectations and deadlines.
- Designed, developed, and tested HTML5, Bootstrap, JavaScript, jQuery, and React JS components adhering to accessibility and web browser standards.
- Designed SQL Server databases and implemented stored procedures, functions, views, and triggers to optimize front-end SQL queries and enforce entity relationships.
- Designed and implemented a CI/CD system using Jenkins to support weekly releases and out-of-cycle releases.

- Implemented secrets management using Key Vault in Azure environment and automated Azure deployments using Azure DevOps.
- Utilized TFS for version control, code review, and automatic builds, and conducted various testing including unit testing, integration testing, performance testing, and system testing.
- Utilized Azure Event Grid for publishing and consuming data and employed Azure HTTP triggers functions for on-demand and continuous jobs.
- Developed ASP.NET Core Web API 6.0 based on departmental requirements and specifications.
- Develop software that is modular, scalable, well-tested, stable, and optimized.
- Designed and implemented a continuous build-test-deployment (CI/CD) system with multiple component pipelines using Jenkins to support weekly releases and out-of-cycle releases based on business needs.
- Experience with container-based deployments using Docker, working with Docker images, Docker Hub and Docker-registries and Kubernetes.
- Used Key Vault to maintain secrets in Azure env. I also used Azure DEVOPS to automate the Azure deployment of the CI/CD process.
- Refactoring of monolithic applications to Microservices and Component-based architectures.
- Building/Maintaining Docker container clusters managed by Kubernetes Linux, Bash, GIT, and Docker, on GCP. Worked with the OpenShift platform in managing Docker containers and Kubernetes Clusters.
- Designed database in SQL Server and created stored procedures, functions, and views to reduce the complication of front-end SQL queries and triggers to enforce entity relationships.
- Worked on TFS for version control, Code Review and for automatic builds, and continuous Integration.
- Performed Unit testing using N-Unit, Integration Testing, Performance Testing, and System Testing.

Environment: .NET, ASP .NET, MySQL, REST, HTML5, Javascript, jQuery, ReactJS

HSBC, INDIA

Jan 2019 – July 2022

.Net fullstack Developer

Responsibilities:

- Followed agile methodology with daily scrum meetings and providing user story updates.
- Experienced in web forms development using IIS, ASP.NET, Dataset, and .NET Framework, along with VB.NET application development. Possess working knowledge of key technologies such as AJAX, XAML-based applications, SharePoint, and Microsoft SQL Server.
- Extensive experience in creating, deploying, and consuming XML Web Services, WCF services, REST services, and Web API. Implemented MVC design pattern for ASP.NET applications and developed modules using Visual Studio 2015.
- Considered the advantages and disadvantages of ASP.NET MVC and utilized C#.NET for programming business logic. Developed web applications using ASP.NET MVC, C#, JavaScript, VB.NET, jQuery, HTML5, and CSS3.
- Skilled in arranging status calls and gathering information, with experience in interacting with onsite teams for business requirements gathering.
- Proficient in software configuration management, including setting up company version policies using AzureDevOps Team Foundation Server (TFS)..
- Developed client-side validation through Angular Js and dynamic UI using JavaScript and HTML5, DHTML and Bootstrap.
- C#.NET is used to program business logic including Code-behind files and Classes in the middle tier.
- Performed database operations on SQL Server 2012 to create and maintain customer's information by creating SQL queries, stored procedures, functions, and views, Delete (CURD).
- Proficient in developing applications using ASP.NET MVC Framework, incorporating unobtrusive AJAX and jQuery for enhanced interactivity.
- Skilled in creating views with Master Pages, Partial Views, custom HTML helpers, and jQuery utilizing the Razor view engine.

- Successfully integrated ASP.NET Core MVC web applications into the Liferay Content Management Framework, leveraging its capabilities.
- Extensive experience in managing MongoDB environments, ensuring availability, performance, and scalability.
- Provided technical guidance to programmers to meet project deadlines and ensured the accuracy and completeness of programs and systems through rigorous testing procedures.
- Created automation using Typescript and Protractor for a web-based application.

Environment: .NET, ASP .NET, MySQL, html, CSS, Bootstrap and JavaScript, AJAX, MVC Framework.

Loyalty Methods, Hyderabad, India

June 2016 – Dec 2018

Software Developer

Responsibilities:

- Involved in various stages of project lifecycle including requirement gathering, development, testing and development using Java, PL/SQL, jQuery, HTML and CSS
- Consumed SOAP Web services to interact with legacy systems which is in main frames and REST Web services to generate and store pdf documents in electronic content management.
- Extensively used Core JAVA collections and concurrency to improve the performance of the application and to schedule tasks using multi-threading.
- Involved in developing various reusable Helper and Utility classes using Core Java which are being used across all the modules of the application,
- Used Microsoft SQL Server Management Studio to interact with the database of the application and worked on SQL queries and Stored Procedures.
- Developed and creating client-side validations using jQuery and JavaScript that greatly decrease the processing time and resource consumption freeing the resources for use by other applications and speeding up the processing times.
- Implemented the application with JIRA for task tracking and bug tracing and deployed and tested the application.

Environment: MySQL, html, CSS, Bootstrap and JavaScript, jQuery.

EDUCATION:

- **Bachelors in computer Science** | Jawaharlal Nehru Technological University, Hyderabad, India
