SUMMARY

AI-focused Software Engineer skilled in building **LLM-powered solutions** and deploying AI workflows using **Python, Django, FastAPI, and React**. Certified in LLMOps with **Azure** and **AWS**, **ETL automation**, and **REST API** development. Strong background in **SQL** and cloud-based automation with **UiPath** and **Power BI**. Certified in Oracle Vector AI, LLMOps, Web development and Python specializations. Passionate about solving real-world problems through scalable, intelligent systems.

SKILLS

Category	Skills
Programming Languages	Python, SQL, JavaScript
Web Frameworks	Django, FastAPI, Flask
API & Integration	REST APIs, Gemini APIs, Telegram API, Excel Automation, OpenAI APIs
Databases	PostgreSQL, MySQL, SQLite
Automation	UiPath, Power Automate, Web Automation
AI/ML & LLM	LLMOps, NLP, Vector Search, Oracle Vector AI, Prompt Engineering
Reporting & BI	Power BI, Excel Dashboards, Matplotlib, Seaborn
Tools & Platforms	JIRA, Postman, Visual Studio Code, Notion, VS Code, Colab, Jupyter Notebooks

EXPERIENCE

MacvaarAI - Houston, USA Apr 2025 – Present

GenAI Intern - Volunteer

- Contributed to building AI-powered solutions aimed at supporting women undergoing cancer treatment, aligning with one of the UN's 17 Sustainable Development Goals.
- My work involved leveraging generative AI models to enhance mental health support, help in searching for resources, and improve patient engagement.

Zenoti - Hyderabad, India Jan 2022 – July 2023

GenAI Transformation Engineer

- Integrated **LLM models** to create an optimized service search based on customer type, history, and specializations.
- Designed and deployed LLM-powered tools to automate **knowledge retrieval**, dynamic service recommendations, and contextual search, significantly improving user engagement.
- Implemented retrieval-augmented generation (**RAG**) techniques by combining LLMs with internal knowledge bases, improving the accuracy of generated outputs for internal teams.
- Designed and developed **end-to-end ETL automation** tools using **UiPath, Python, FastAPI, Django, SQL, React, and JavaScript**, reducing customer onboarding time by **26%** (medium businesses) and **17%** (large businesses).
- Built a logging system integrated with **UiPath, PowerBI** using **Python APIs**, reducing report **creation time by 80%** and improving real-time data tracking.
- Developed a **browser extension** for permission management, automating access control and **saving 4+ hours** for medium businesses and **18+ hours** for large businesses.

- Automated **data extraction and transfer processes**, reducing **manual intervention by 90%**, increasing efficiency.
- Designed and implemented optimized APIs to run on local server, increasing response time **efficiency by 25%**.

MAQ Software- Hyderabad, India

Jun 2021 – Nov 2021

Associate Software Engineer

- Migrated **SQL-based pipelines** to **PySpark**, improving **query execution time by 40%**.
- Designed and optimized **data pipelines for Microsoft Store Inventory**, enhancing **data retrieval efficiency**.
- Automated **business workflows using Power Automate and Power Apps**, streamlining processes.
- Created **interactive PowerBI dashboards**, enabling **data-driven decision-making**.
- Collaborated with cross-functional teams, improving overall **ETL process efficiency**.

Planful - Hyderabad, India

Mar 2021 – Jun 2021

Developer Intern

- Developed and optimized **unit test frameworks** for business logic using **Python & Flask**, improving code quality.
- Achieved **6% additional code coverage** for core functionalities within four months.
- Designed **modular testing strategies**, improving **maintainability**.
- Assisted in debugging and **optimizing database queries**, leading to improved execution speeds.

Aptagrim - Hyderabad, India

Sept 2020 – Mar 2021

ML Developer Intern

- **Built ML modules** to extract and match key entities from resumes and job descriptions using **NLP techniques**.
- Implemented a **vector-based similarity model** to rank candidate-job relevance, improving recruiter selection accuracy and speeding up the shortlisting process.
- Developed **23% of backend APIs** for features such as **Resume Parsing, Profile Matching, and Job Boards** using **Python – Django and REST API**.
- Led development of **63% of core functionalities**, including **Payroll, Attendance, Time Tracking, and Scheduling**, improving automation.

Spanav EdTech - Hyderabad, India

July 2020 – Aug 2020

Full Stack Web Developer Intern

- Built **47% of a Learning Management System (LMS)** using **Python – Django and REST API**.
- Developed APIs for **user login, course enrolment, progress tracking, exams, and certification** using **React and SQL**.
- Implemented **role-based access control (RBAC)**, ensuring secure user authentication.

PROJECTS

YouCart - Integrating YouTube and Groceries Application

Apr 2025 - Present

- Developed an application that analyses cooking videos on YouTube and automatically adds recipe ingredients to Kroger shopping cart with a single click.
- **LLM, FastAPI, and APIs** in enhancing user convenience in grocery shopping.

CSE Helper— Automated Bot

Feb 2020 - Present

- Developed a **Telegram bot** that serves as a repository of academic materials for Computer Science students with **18,000 active users**.
 - Utilized **Telegram API** to automate content retrieval and sharing.
-

Meet+ - Automated Meeting Solution

Mar 2025 - Present

- A powerful tool that extracts action items, generates meeting summary, creates event details, and assigns to-do tasks to the assignees automatically.
- Ensures **efficient follow-ups and documentation** for enhanced productivity.

Common API - Simple API Manager

Dec 2023 – July 2024

- A **lightweight API management program** that automates **complex HTTP API requests** using **Excel sheets as input**.
- Built using **Python**, improving workflow automation for non-technical users.

EDUCATION

Master of Science in Engineering

Aug 2023 – May 2025

University of North Texas | Denton, Texas, USA | CGPA: 4.0/4.0

- Worked as a Teaching Assistant. Volunteering at Engineers United at Texas to organize workshops, hackathons, and

Bachelor of Technology in Computer Science and Engineering

Jun 2018 – May 2022

Jawaharlal Nehru Technological University | Hyderabad, India | CGPA: 3.4/4.0

- Intern at the College's Innovation Centre. Developed an in-house Learning Management System

CERTIFICATIONS

Oracle Vector AI Certification
