Summary

Results-driven SAP Consultant with over 10 years of experience in SAP ECC 6.0 & S/4HANA, specializing in Warehouse Management (WM), Logistics Execution (LE), Sales and Distribution (SD), Inventory Management (IM), Materials Management (MM), and Production Planning (PP). Demonstrates exceptional skill in leading large-scale, complex SAP initiatives, driving significant improvements in operational efficiencies. Experienced in process redesign, automation, and optimizing SAP systems for enhanced performance and capacity, debugging and root cause analysis. Known for a strategic approach in planning and execution, complemented by strong capabilities in stakeholder engagement and balancing technical and business requirements. Proven ability to optimize supply chain executions (inbound, outbound, goods receipt/issue, stock transport orders, customer returns). Proficient in Purchase Requisitions, Purchase Orders, Goods Receipt, Sales Order Management, ATP, Delivery Processing, Picking, Packing, Shipping & Transportation, Billing & Invoicing. Strong background in ABAP programming, user exit enhancements, and output management for critical documents such as invoices, bills of lading, and shipping labels. Adept at working with remote teams, providing technical and functional specifications, and validating custom developments. Strong communicator with a track record of delivering process improvements and compliance assurance in large-scale SAP environments. Skilled in collaborating with cross-functional teams to ensure seamless SAP integration and operational excellence.

TECHNICAL SKILLS

- SAP Modules:** WM, LE, SD, IM, MM, PP, PM, QM
- SAP Skills:** Integration of WM with HU management, RF scanning, batch management, serialization, Inbound, Outbound, Returns, Refusals, Pick, Pack, Ship, Bundling, De-Bundling/Kitting, Cycle Counting, TM experience, Background Scheduling
- WM-LE:** Task and Resource Management, Weigh Scale Integration, HAZMAT/Dangerous Goods, LATAM, Value Added Services (VAS), Gate- and Yard management, Scan-to-lane/truck, parallel picking solutions, SAP TMS integration
- SAP-WMS Integration:** 3PL Logistics, Warehouse Automation, RF technology and development, SAP-WMS Middleware, Splunk
- EDI & IDocs:** Sales Order Processing (EDI 850, 940, 943, 944, 945, 856, 947), Manifesting, ASN/PGI Confirmations, Seeburger, Biztalk, Carrier- and Vendor integration
- SAP S/4HANA:** Assisted in global S/4HANA transitions, ensuring minimal business disruption and smooth go-lives.
- Custom Development:** ABAP, IDocs, RFC, BAPI, User-Exits, BADIs, SAPscript, Adobe Forms, Smartforms, CDS views, AMDP's
- Tools & Technologies:** UC4 Job Scheduling, ATTP, Trace Link, Winshuttle, Splunk, Eclipse, Oracle, SQL, Web Services

CORE QUALIFICATION

- | | | |
|---------------------------------|--------------------------------------|-------------------------------|
| • SAP Implementation | • Order-to-Cash Procure-to-Pay | • Cross-Functional Leadership |
| • Project Management | • Debugging, Development and Support | • Technical Documentation |
| • SAP Testing and User Training | • Automation Solutions | • Capacity/Strategic Planning |
| • Process Optimization | • Business Analysis | • Output Management |
| • Stakeholder Engagement | • ERP Systems | • Performance Testing |

WORK EXPERIENCE

- | | | |
|--|---|----------------------------|
| • SAP Consultant | Self-employed, Remote | 06/2023 – Present |
| • Senior SAP Developer & Consultant | Arvato Bertelsmann NA - Ontario, CA | 2018 – 06/2023 |
| • SAP Developer | Arvato Bertelsmann NA - Ontario, CA | 2017 – 2018 |
| • SAP Analyst | Arvato Bertelsmann NA - Louisville, KY | 2014 – 2017 |
| • Senior JAVA Software Engineer | Arvato Bertelsmann - Guetersloh, Germany | 2011 – 2014 |
| • JAVA Software Engineer | Arvato Bertelsmann - Guetersloh, Germany | 2005 – 2011 |

DUTIES AND RESPONSIBILITIES

06/2023 - Present | SAP Consultant (Techno-Functional)

- Serving clients within the medical device, pharmaceutical and high-tech sectors, driving deployment of strategic SAP solutions tailored to the unique challenges and regulatory environments of these diverse fields.
- Contributing to custom SAP development, debugging and support initiatives in the Modules of SD, LES, WM, MM, IM, PP, QM, PM and FI.
- Developed and tested multi-picking solutions, integrating RF scanning and qRFC management.
- Provided techno- functional consulting, optimizing inbound/outbound logistics and stock movement strategies.
- Assisted in warehouse optimization solutions, ensuring compliance with regulatory requirements.
- Providing expert consulting and development in ATP, backorder scheduling, warehouse optimizations, enhancing inbound/outbound order fulfilment, stock transfer orders, and overall storage, picking, shipping, and loading strategies.
- Managing and implementing change requests for various output documents—including picking and packing lists, delivery notes, bills of lading, and shipping labels—to enhance order fulfilment accuracy and ensure compliance with customer requirements.
- Collaborating with business and functional teams to implement a scalable and configurable backorder management solution, improving operational efficiency and customer satisfaction.
- Developing and documenting technical and functional specifications for ABAP developments, ensuring seamless cross-module integration within SAP.

2019 – 06/2023 | Global SAP ERP IT lead (SD, LES, WM, MM, IM, PP)

- Served as the primary liaison for SAP-ERP consultations with arvato's head account management for a Fortune Top 5 client.
- Orchestrated global IT process alignment across multiple regions: North America, Hong Kong, Shanghai, Europe, United Kingdom,

- and Australia.
- Executed and managed new project implementations and change requests, including successful go-live and hyper-care phases in North America.
- Provided ongoing SAP support and maintenance for daily business operations.

2018 - 2022 | SAP Developer Output Management (added responsibility)

- Spearheaded printer support and output management development.
- Managed and implemented change requests for a variety of critical documents, including Bill of Lading, pick and packing lists, delivery notes, shipping, and carton labels.
- Developed and maintained output formats for commercial invoices, serial labels, PID labels, enhancing documentation accuracy and efficiency.

2014 - 2019 | SAP Analyst & Developer (WM, LE, SD, MM, IM, PP)

- Acted as the primary contact for SD/LES-related operations, including inbound logistics, order management, warehousing, shipping, RF scanning, and printing.
- Led the implementation of new customer projects in the Supply Chain Management area, enhancing operational efficiency and client satisfaction.
- Directed the support team in managing change requests and ongoing projects for existing customers, ensuring timely and effective resolutions.
- Oversaw all stages of SAP implementation lifecycle, from initial planning to execution and post-launch support.
- Coordinated meetings with PMO, business, and operations teams for requirement gathering and project updates, ensuring alignment and clear communication.
- Established comprehensive end-to-end SCM processes in the SD/LES domain, improving overall workflow and system integration.
- Contributed to both 1st and 2nd level customer support, addressing daily business needs and maintaining high service standards.

2010 - 2014 | JAVA TMS development and support

- Provided 2nd and 3rd level support for arvato's custom JAVA TMS web application, ensuring system reliability and user satisfaction.
- Redesigned the supplier rating tool and track and trace solution, integrating over 60 carriers using XML-services, web services, Selenium, and XSLT, enhancing functionality and user experience.
- Developed EDI import and export interfaces for various functions including shipment, status tracking, invoice processing, and carrier manifest, streamlining data exchange and operational efficiency.
- Configured and maintained the job scheduling system using the Quartz framework, ensuring optimal performance and task automation.

PROJECT HIGHLIGHTS AND ACCOMPLISHMENTS

2023 - 2024 | Techno-Functional SAP Consultant | SD related developments and bugfixes

- Tested and validated the drop-ship order process for Canadian orders fulfilled by a U.S. warehouse, covering end-to-end scenarios from customer sales orders to purchase requisitions, PO creation, and third-party sales order generation via a custom output type.
- Debugged and resolved tax jurisdiction code derivation issues for intercompany sales by implementing custom development and SAP standard user exit modifications, enhancing pricing communication, invoice tax determination, and accounts payable processing in service orders.
- Developed custom copies of MB52 and ZMC.1 reports to incorporate stock-in-transit and cross-company stock-in-transit, ensuring enhanced visibility and accurate inventory tracking across company codes.
- Designed and implemented custom PO item control key determination at the PO item level, utilizing a custom table to enforce procurement rules and business logic.
- Debugged, optimized, and redesigned a custom PO purge program, significantly improving efficiency, accuracy, and data integrity in the PO cleanup process.

2024 | Techno-Functional SAP Consultant | Drop-ship order process

- Tested and validated the drop-ship order process for Canadian orders fulfilled by a U.S. warehouse, covering end-to-end scenarios from customer sales orders to purchase requisitions, PO creation, and third-party sales order generation via a custom output type.
- Developed a custom report that provided comprehensive visibility into the full order flow—from customer sales orders, through delivery, billing, and accounting—with built-in exception handling for missing documents.
- Adjusted and fine-tuned all related output documents (e.g., picking lists, packing lists, delivery notes) to align with process changes and ensure accurate documentation.

2023 - 2024 | Techno-Functional SAP Consultant | System Migration Project of Healthcare client

- Contributed to a comprehensive system migration involving changes to company codes, financial data structures, and process realignments.
- Supported development, testing, and go-live activities to ensure seamless operations post-migration.
- Conducted full regression testing across SAP modules (LES, WM, MM, IM, PM/PP, SD) to validate process integrity and compliance with business requirements.
- Facilitated cross-team collaboration to address system issues and optimize workflows during the migration.

2022 - 2023 | Global IT-lead | Full life cycle implementation to arvato core client (~250PDs)

- Orchestrated full life cycle implementation for arvato's core client, involving system transition and business alignment in two U.S. distribution centers.
- Handled project scope covering ERP setup, master data, sales order management, warehouse, and inventory management.

- Managed stock and serial migration for over 38,000 pallets and implemented automated conveyor belt system integration.
- Oversaw customer and vendor interfacing, output management, and provided support during go-live and hyper care phases.

2022 | Global IT-lead | Custom built mini-MES Integration for SAP PP Work Order Management

- Implementation of SAP PP interface utilizing standard BAPI's to facilitate work order processing.
- Designed and configured outbound IDocs for work order release, start, and confirmations based on customer interface specifications.
- Ensured real-time production tracking by sending partial confirmations.
- Provided ongoing SAP troubleshooting, system optimization, and process enhancement to improve overall work order execution and confirmation workflows.

2021 | Developer | S/4 HANA Migration Project

- Collaborated as part of a global team for the S/4HANA migration project, focusing on testing and validating North American and global processes across SD, LES, WM, IM, PP, and MM modules.
- Played a key role in technical and techno-functional testing, addressing customer data integration issues and ensuring smooth system transition.
- Partnered with developers and functional teams to identify, fix, and adjust system configurations, contributing to successful go-live and stabilization phases.

2021 | SAP IT-lead | Full life cycle implementation for new Ontario & Pleasant Prairie DC's (~135 PDs)

- Spearheaded a full life cycle SAP implementation for new distribution centers in Ontario and Pleasant Prairie, totalling approximately 135 project days.
- Implemented a fully automated conveyor belt system, along with a non-conveyable setup for two new warehouses.
- Oversaw ERP setup, supply chain process design, master data, sales order management, MRP, and external procurement.
- Managed production planning, warehouse operations, outbound and inbound logistics, and intercompany stock transfers.
- Coordinated customer and vendor interface development, output management, and transportation systems.
- Ensured successful project execution through testing, documentation, user-training, and support during go-live and hyper care phases.

2020 | SAP IT-Lead| Redesign of outbound processes in existing Louisville DC (~65 PDs)

- Led the redesign of outbound processes in the Louisville distribution center, involving around 65 project days.
- Integrated a fully automated conveyor belt system into SAP, enhancing operational efficiency.
- Focused on subsystem integration, output management, and redesign of all outbound fulfilment processes.
- Revamped warehouse structure and implemented new pick, pack, and ship strategies.
- Conducted full end-to-end testing, documentation, user-training, go-live, and hyper care support.
- Achieved capacity improvements: B2C output increased by 722% from 1,800 to 13,000 units per day, and B2B output grew by 333% from 120 to 400 pallets per day.

2016 – 2022 | Various projects and involvements

- Engaged in a diverse range of projects including COO tracking, peak season performance testing, and free trade zone (FTZ) initiatives.
- Conducted UFT testing and implemented dynamic cycle counting methods.

2014 – 2016 | SAP Developer and Analyst

- Migrations of existing customers into new SAP client
- Managed the full life cycle implementation of five existing clients into a new SAP system, totalling around 150 project days.
- Oversaw the comprehensive migration of multiple modules including Sales and Distribution (SD), Materials Management (MM), Logistics Execution System (LES), Warehouse Management (WM), Inventory Management (IM), and Production Planning (PP).

EDUCATION		
FHdW Bielefeld, Germany	Bachelor of Science in Computer Sc an Economics - Major in logistics and software development	2008 – 2011
b.i.b. International College, Germany	Education to IT Specialist, Computer Science	2005 – 2008
Carl-Miele-Berufskolleg, Germany	State Certified IT Assistant, Information Tech.	2002 – 2005

TRAINING & CERTIFICATION			
2022	HA400 ABAP Programming for SAP HANA - 3 days	2014	ABAP Workbench Basics BC400 - 4 days
2018	In-house training of arvato's printing solution in SAP - 17 days	2013	Smart Kit Central Services Conflict Management - 3 days
2016	Business Process in Sales and Distribution SCM600 - 5 days	2012	IPMA Project Management - 3 days
2016	SAP Development in Greenbelt Lean Six Sigma Project -180days	2008	Introduction to ICEfaces - 4 days
