SKILLS

HTML5

CSS3 / SASS / LESS

JavaScript / ES6+

ReactJS / Redux

AngularJS / Angular

Bootstrap

Tailwind CSS

Node.js / Express.js

Spring Boot, REST APIs

AWS (EC2, S3, Lambda)

MySQL

Microsoft Azure

Docker, Kubernetes

Jenkins, CI/CD

PROFILE

I am a dedicated UI Developer with 7+ years of diverse IT experience across Logistics Management, Health care, Banking, and Financial Services. Proficient in front-end development using a comprehensive set of technologies, including HTML5, CSS3, Bootstrap, JavaScript, Typescript, jQuery, Redux, AJAX, XML, JSON, Java, Angular (6/7/8), React JS, and Node JS.

- **Frontend Development:** Extensive experience with HTML/HTML5, CSS3, SASS, LESS, JavaScript, Next.js, React.js, Redux, AngularJS (1.x), jQuery, JSON, Node.js, Ajax, and Bootstrap.
- **MEAN Stack:** Proficient in MongoDB, Express.js, Angular, and Node.js development.
- **SDLC & Agile:** Experienced in all phases of SDLC (Requirement Analysis, Implementation, Maintenance) with a strong background in Agile and SCRUM methodologies.
- **SPA Development:** Expertise in building Single-page Applications (SPAs) using React.js, Redux, and React Flux Architecture.
- **Web Protocols:** Strong knowledge of HTTP, HTML5, XML, XHTML, CSS3, and web standards.
- **CSS Frameworks:** Customized Bootstrap and Foundation with SASS/LESS and Compass for responsive web design.
- **React.js Expertise:** Advanced skills in React.js for one-way data flow, Virtual DOM, JSX, and React Native concepts, including building Reusable Custom Components.
- **Backend Development:** Experienced with Node.js, Express.js, MongoDB, and Microservices for backend development and RESTful Web Services integration.
- **MVC Architecture:** Skilled in MVC architecture for backend applications with Java, Spring, Servlets, and JEE technologies.
- **Database Expertise:** Knowledge in SQL, PL/SQL, and working with Oracle, MySQL, PostgreSQL, MongoDB, DB2, MS-SQL Server.
- **Cloud Technologies:** Experience with AWS, Microsoft Azure Blob, and Pivotal Cloud Foundry (PCF) for cloud application development and deployment.
- **Full-stack Development:** Proficient in frontend-backend integration, handling API interactions with AJAX and JSON for full-stack applications.
- **Testing Frameworks:** Hands-on experience with Unit.js, Jasmine, Karma, Protractor, and Mocha for unit and integration testing.
- **Version Control:** Skilled in Git, SVN, CVS, Clear-Case for source code management.
- **CI/CD Tools:** Experience with Jenkins, Maven, and Grunt for continuous integration and deployment.
- **IDEs:** Proficient with Eclipse, IntelliJ IDEA, WebStorm, Sublime Text, Notepad++, and Web Matrix for development.
- **Communication Skills:** Strong interpersonal and teamwork abilities, with a focus on clear communication and problem-solving.
- **Collaboration:** Effective in working individually or as part of a team, highly goal-oriented and organize.

TSYS Inc, Atlanta
UI Developer
SEP, 2022- PRESENT

MasterCard Inc, Delhi
UI Developer
Feb 2020 – July 2022

WORK EXPERIENCE

-  **SPA Development:** Developed Single Page Applications (SPAs) using React.js, Tailwind CSS, and RESTful services to ensure responsive and dynamic interfaces.
 -  **Responsive Web Design:** Utilized Tailwind CSS for Responsive Web Design (RWD) to optimize web applications for mobile and desktop views.
 -  **Component Library Integration:** Integrated React Tidbits library for common UI components like Footers, Modals, and Tabs, speeding up development.
 -  **Node.js Backend:** Developed RESTful APIs using Node.js and Express, enabling smooth front-end to back-end integration.
 -  **File Handling:** Managed file uploads and file manipulations using Node.js, ensuring seamless data handling and content management.
 -  **Task Automation:** Automated front-end tasks using Gulp.js and Grunt with Node.js to improve workflow efficiency (e.g., magnification, live reloading).
 -  **Legacy System Modernization:** Modernized legacy code using Backbone.js, RequireJS and Tailwind CSS, enhancing UI performance.
 -  **Mobile Development:** Developed mobile themes and responsive forms using Tailwind CSS to enhance mobile compatibility.
 -  **Unit Testing:** Wrote and executed unit tests using Jasmine, Karma, and Mocha frameworks for ensuring code quality and functionality.
 -  **Version Control & Collaboration:** Managed source code using GitHub and tracked project progress with JIRA, collaborating on Agile teams for faster delivery.
 - Developed and optimized web applications using Next.js, leveraging Server-Side Rendering (SSR), Static Site Generation (SSG), and API routes to enhance performance, SEO, and scalability.
-

-  **Developed UI Pages:** Developed UI pages using HTML, CSS, JavaScript, AJAX, AngularJS, JSON, jQuery, and Node.js.
-  **Two-Way Data Binding:** Leveraged two-way data binding through scope in applications built on AngularJS.
-  **Data Visualization:** Developed POC in D3.js to implement connected data portals for displaying charts and maps.
-  **Custom Directives:** Created custom directives in AngularJS for components like sticky headers, dropdowns, tables, date pickers, and more.
-  **Single Page Application (SPA):** Redeveloped a SPA using AngularJS that supported multiple browsers including IE 9, 10, 11, Firefox, and Chrome.
-  **MVC Architecture:** Implemented Model-View-Controller (MVC) design pattern using AngularJS.
-  **Reusable Components:** Developed reusable components with AngularJS custom directives, optimizing the development process.
-  **Responsive Design:** Used Bootstrap and media queries to make websites responsive for desktop, mobile, and tablet devices.
-  **Dependency Injection:** Used Dependency Injection in AngularJS with factory and services for managing dependencies efficiently.
-  **Search & Filter Functionality:** Implemented filtering and search functions in the web application using Node.js based on the MVC pattern.
-  **Server-Side Integration:** Integrated Node.js with the frontend, using it as the server-side technology and middleware for file uploads with Multer.
-  **Unit Testing:** Conducted unit testing for JavaScript applications using Jasmine and Karma, and used Git and Source Tree for version control.

HESS Group, Bengaluru, India

UI DEVELOPER

MAY 2019 – DEC 2020

-  **Web App Development:** Designed and implemented a web application for storing patient information, generating reports, and managing schedules.
 -  **ASP.NET Development:** Developed websites using the ASP.NET framework following Agile development methodologies.
 -  **Wireframing & Prototyping:** Created initial wireframes on paper, converted them into interactive prototypes, and delivered the final project.
 -  **UI Components & Directives:** Worked on UI components like grids, tabs, panels, and utilized AngularJS directives such as ng-model and ng-click.
 -  **Responsive Design:** Designed a responsive website using Bootstrap grid system, ensuring compatibility across mobile, tablet, and desktop devices.
 -  **RESTful API Integration:** Integrated RESTful APIs supporting JSON and XML to fetch and display backend data efficiently.
 -  **SEO Optimization:** Implemented SEO best practices to optimize websites for search engines, improving visibility and ranking.
-
