PROFESSIONAL SUMMARY

Experienced Senior Software Engineer & Solution Architect with over 25 years of expertise in enterprise software development, cloud computing, and full-stack application design. Specializing in Microsoft Azure, .NET technologies, system architecture, and large-scale cloud migrations. Proficient in developing microservices, optimizing CI/CD pipelines, and leading complex projects. Proven ability to drive innovation, mentor teams, and deliver high-impact solutions. Adept at working with legacy systems, debugging complex issues, and implementing elegant, maintainable code using technologies like C#, WPF, XAML, Entity Framework, Web API, WCF, and container orchestration tools like Docker and Kubernetes.

EDUCATION

- Master of Computer Applications (MCA) – Kakatiya University, Warangal, India (1996–1999)
 - Bachelor of Science (Mathematics Major) – Kakatiya University, Warangal, India (1992–1995)
-

TECHNICAL SKILLS

- **Languages:** C, C++, VC++, C#, Python, JavaScript, XAML, T-SQL
- **Web & Frontend Technologies:** React, ASP.NET, MVC, JavaScript, jQuery, HTML5, CSS3, WPF
- **Backend & Full Stack:** .NET Core, ASP.NET Core, Web API (REST), WCF, Entity Framework, Swagger
- **Cloud & DevOps:** Azure DevOps, Azure Functions, Service Fabric, KeyVault, Docker, Kubernetes, EventHub, ServiceBus, PowerShell, Ansible

- **Databases:** SQL Server, Oracle, MySQL, PostgreSQL, Redis, ElasticSearch
 - **Monitoring & Messaging:** Kibana, Kafka
 - **Platforms:** Windows, Linux
-

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert
 - Microsoft Certified: DevOps Engineer Expert
 - Microsoft Certified Trainer (MCT)
-

PROFESSIONAL EXPERIENCE

Microsoft Corporation, Redmond, USA

Senior Software Engineer (Aug 2015 – Feb 2025)

Project: Microsoft Learning and Certification Platform

- Architected and developed microservices-based solutions for the Microsoft Learning & Certification platform using .NET Core, Azure Functions, and Service Fabric.
- Designed highly scalable API endpoints to manage certification data, integrated with Azure SQL and Cosmos DB for high availability.
- Led end-to-end migration of 4.6 million learner records from a monolithic SQL Server system to an Azure-based microservices architecture, improving system performance by 40%.
- Implemented advanced security and compliance features, including GDPR, PII encryption, and OAuth 2.0 authentication for federated login.
- Optimized CI/CD pipelines using Azure DevOps, reducing deployment time from 60 minutes to 10 minutes with automated testing.
- Troubleshoot and debugged services built with WCF, Web API, and microservices architecture.
- Integrated Docker and Kubernetes to improve deployment reliability and scalability.

- Monitored services using Kibana, ElasticSearch; introduced Redis caching for high-speed lookups.

Project: OpenEdX Microsoft Learning Platform

- Designed and developed an auto-scalable OpenEdX-based learning management system on Azure, integrating it with Azure Media Services to provide secure video streaming.
- Developed custom Django applications and REST APIs for enhanced user tracking, analytics, and certification issuance.
- Integrated Microsoft Graph API and Office 365 SSO to enable seamless authentication and role-based access control.
- Automated deployment using PowerShell scripts and Ansible, reducing server provisioning time by 80%.

Technologies: .NET Core, Azure DevOps, Azure Functions, SQL Server, Service Fabric, Python, Django, JavaScript, Azure VM, MySQL, CosmosDB

Infosys Technologies Solutions, Pune, India

Senior Technology Architect (Apr 2010 – Aug 2015)

Project: Microsoft Learning (Learning Experiences Platform & Services)

- Led end-to-end design and implementation of the Microsoft Learning Experience (MLX) platform, a multi-tenant e-learning platform using ASP.NET MVC, WCF, and SQL Server.
- Developed an interactive UI/UX framework using Knockout.js and Durandal.js, enabling dynamic course rendering.
- Built DRM-protected SCORM-compliant content streaming, ensuring secure and licensed content distribution.

Project: Frictionless Campaign Management (Balboa)

- Designed and developed a real-time ad placement and analytics engine, allowing dynamic budget allocation and impression tracking using Azure EventHub and ServiceBus.

- Implemented rule-based audience targeting algorithms to optimize ad delivery based on historical engagement data.

Technologies: .NET Framework, ASP.NET MVC, SQL Server, WCF, Web API, Entity Framework, Azure

Cognizant Technology Solutions

Senior Associate Projects (Jan 2007 – Mar 2010)

Project: PaymentNet3 (JP Morgan Chase - Commercial Cards)

- Developed high-performance transaction processing APIs handling millions of commercial card transactions daily.
- Implemented AES-256 encryption for secure card data storage and PCI-DSS compliance.
- Led migration from legacy ASP-based systems to modern ASP.NET MVC architecture, improving system security and maintainability.

Technologies: C++, VC++, .NET, SQL Server, Oracle, ASP.NET

Wipro Technologies, India

Senior Software Engineer (Jun 2000 – Jan 2007)

Project: Emerald System & Public Websites Development (Capital One Auto Finance)

- Led the enhancement of multiple public websites used for loan origination, credit scoring, funding, and servicing.
- Developed COM+ components, Windows NT Services, and Web Services for seamless system integration.
- Designed data access layers using ADO.NET and SQL Server, optimizing query execution and database performance.
- Automated monitoring tools for event logs, MSMQ queues, and system alerts.

Project: Better Mail Workshop (Capital One Auto Finance)

- Designed a data processing and mail fulfillment system for loan document printing, inserting, and mailing.
- Integrated FedEx tracking APIs for real-time package status and notification management.

Project: Excelergy Trader BackOffice (TBO)

- Implemented high-performance trading, scheduling, and settlement solutions for wholesale energy markets.
- Developed interactive GUI & browser-based interfaces for real-time trade capture and system administration.

Project: Medtronic Order Entry (MOE)

- Enhanced medical sales order processing applications using Visual C++ (MFC) and DB2/400.
- Implemented multiple credit card processing and improved payment workflows.

Project: Enigma Products Development

- Developed content, commerce, and collaboration tools for Enigma's 3C Support Chain Platform.
- Created TCL/TK extended APIs in C++ and built automated setup and deployment tools for Windows and Unix.

Project: Spinnaker Planning Management (TideWorks)

- Developed shipping operations optimization tools for container loading, unloading, and vessel space utilization.
- Integrated STIF Format readers and enhanced print functionalities for scan and split sheets.

Technologies: C++, VC++, .NET, SQL Server, Oracle, ASP.NET, COM/DCOM, ADO.NET, MSMQ, XML, XSLT, InstallShield, TCL/TK

Computer Associates – TCG Software Pvt Limited

Associate Software Engineer (Nov 1999 – May 2000)

Project: ArcServe IT for NetWare

- Developed enterprise data protection solutions for NetWare Directory Services (NDS), ensuring secure backup and disaster recovery.
- Integrated JOB QUEUE module into the GUI with real-time job tracking features.
- Optimized backup and restore operations by enhancing data encryption and scheduling.

Technologies: Visual Studio 6.0, VC++, C/C++, Windows 2000, Windows NT

KEY ACHIEVEMENTS

- Spearheaded large-scale Azure migrations for enterprise learning platforms.
 - Automated workflows, reducing manual efforts by 60%.
 - Designed resilient microservices, improving system performance by 40%.
 - Optimized DevOps pipelines, achieving 99.9% uptime & faster deployments.
 - Integrated Redis caching and Kafka messaging for performance and scalability.
 - Developed reusable components and reduced technical debt across product lines.
 - Enhanced monitoring and observability with Elasticsearch and Kibana.
