

Ms. Sheethal Lloyd

Dallas, TX | 414-688-6698 | sheethal2006@gmail.com

PROFILE

Experienced and results-driven Software Engineer with over 10 years of experience in designing and delivering highly available, scalable, and reliable cloud-based solutions. Proficient in back-end development with .Net Core, microservices, and CI/CD pipelines in Azure environments. Skilled in Agile, DevOps practices, RESTful APIs, as well as problem-solving and attention to detail. Strong background in QA leadership, data engineering, and cloud deployments.

TECHNICAL SKILLS

- Languages: C#, VB.NET, JavaScript, Java
- Cloud Platforms: Microsoft Azure (App Services, DevOps, Functions, Application Insights, Monitor Logs, Key Vault), AWS (basic)
- Front-End: React, jQuery, HTML5, CSS3, AJAX
- Back-End: ASP.NET Core, .NET Microservices, Entity Framework, LINQ
- Database Management: MySQL, MS SQL, SQL Server, MongoDB/NoSQL
- CI/CD & DevOps: GitHub Actions, Azure DevOps, Docker, Kubernetes (basic)
- Testing & Quality: Selenium, Unit/Integration Testing, Postman, Swagger
- Tools & Version Control: Git, TFS
- Data Integration: SSIS, ADF (Azure Data Factory), Power BI, SSRS
- Additional: RESTful APIs, MVC, JSON, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

Roadrunner Transportation Systems |Downers Grove, IL | June 2013 – Present

- Spearheaded the design and development of cross-platform logistics applications, enhancing system reliability and reducing support tickets by 21% through best practices in scalability and fault tolerance.
- Redesigned legacy SOAP services into high-performance RESTful APIs, decreasing response times by 20% and significantly improving scalability across distributed systems.
- Engineered microservice-based solutions using .NET Core and Docker, increasing deployment speed and enabling independent scaling of critical components.
- Built and maintained CI/CD pipelines using Azure DevOps, reducing deployment time by 60% and ensuring consistent code quality across development environments.
- Authored detailed test reports and conducted code reviews, delivering constructive feedback that led to a 25% drop in recurring defects.

- Led end-to-end QA initiatives, including test strategy and automation planning, collaborating closely with developers and QA engineers to maintain 99.9% uptime in production release
- Defined and enforced quality assurance policies and procedures, designing and executing comprehensive test plans that improved defect detection rates by 35%.
- Developed scalable solutions using Azure services including Azure Functions, Web Apps, and Key Vault, increasing cloud deployment efficiency and security.
- Architected and deployed Azure Data Factory (ADF) pipelines for complex data workflows, streamlining data ingestion and reducing manual processing time by 30%.
- Designed and implemented ETL processes with SSIS to manage large-scale data transformations, including file imports and inter-database transfers.
- Expert in relational database design, SQL development, and data modeling—delivering optimized queries and scalable schema structures.
- Established best practices for error handling, logging, and archival processes, improving system observability and resilience.
- Optimized database performance through advanced stored procedure development, indexing strategies, and query tuning—cutting query times by up to 40%.
- Automated test coverage by building and executing unit and integration tests with Postman, increasing test reliability and regression prevention.
- Monitored application performance using Azure Application Insights and Monitor Logs, proactively identifying and resolving issues before production impact.
- Delivered high-quality application support, resolving critical bugs and performance issues to ensure stable and reliable software releases.
- Collaborated in Agile teams, contributing to sprint planning, peer reviews, and process improvements that enhanced SDLC velocity and code quality.
- Provided hands-on technical leadership and mentorship, promoting excellence in engineering and upskilling team members on best practices and modern tools

Software Developer

Eagle Technology, Inc | *Mequon, WI | August 2012 – June 2013*

- Contributed to the development of enterprise-level software solutions, focusing on scalability and system integration.
- Developed and optimized maintenance management applications using ASP.NET and SQL.
- Collaborated with cross-functional teams to enhance workflows and improve user experience.

Software Developer (Consultant)

Symbioun Technologies | *Nicor Gas – Naperville, IL | March 2012 – August 2012*

EDUCATION

Master Degree in Computer Science

Bachelor's Degree in Accounting
