

PROFESSIONAL SUMMARY

- Over 5+ years of working experience as Data Engineer with high proficient knowledge in Data Analysis and warehousing as well.
 - Implemented and maintained 5+ RDBMS databases using MySQL, SQL Server, PostgreSQL, Oracle, and NOSQL like MongoDB, Cassandra, resulting in a 99% Uptime and minimal Downtime.
 - Experience in performing complex data Transformations, Validations, Cleansing, Modeling techniques.
 - Created Real-time streaming applications utilizing Kinesis, EventHubs, Kafka and Spark Streaming.
 - Utilized docker, Kubernetes and Azure Devops services to build CICD Pipelines.
-

TECHNICAL SKILLS

Methodologies	: SDLC, Agile.
Programing Languages	: Python, SQL, C, C++, Uni, T-SQL.
Big Data Technologies	: Hadoop, Apache spark, Hive, Pig, Sqoop, Flume, Spark core, Spark sql, MapReduce Spark streaming, Apache Kafka, Apache Flink, Yarn, Zookeeper.
Frameworks/Libraries	: Django, Fast Api, NumPy, Pandas, PySpark, Sqlalchemy, Confluent Kafka.
ETL	: Azure data factory, AWS Glue, Apache Airflow, SSIS, Matillion.
Azure Stack	: Azure Databricks, Blob storage, Azure functions, HDInsight, Stream analytics, Event hubs, Logic apps, VM, Azure service bus, Power BI.
AWS Stack	: Aws Athena, S3, Lambda, SNS, EC2, Sagemaker, Kinesis, RDS, EMR, IAM, Code pipeline, Route53, CloudWatch, ECS, Step functions, Elastic search.
Databases/Data warehouses	: SQL server, MySQL, PostgreSQL, MongoDB, DB2, Oracle, DynamoDB, Azure SQL, Cassandra, Azure synapse analytics, Azure data lake gen2, Snowflake, Amazon redshift.
CI-CD/Tools	: Docker, Azure Devops, Aws codepipeline, Azure Kubernetes, Jenkins, Terraform
Version Control Tools	: Git, GitHub, Gitlab, Jira.
Operating Systems	: Windows, Linux.

PROFESSIONAL EXPERIENCE

AT&T – Data Engineer USA | Sep 2023 – Present

- Orchestrated **Azure Data Factory** Pipelines for data ingestion, effectively migrated all tables from an on-premises **SQL Server** database to **Azure Data Lake Storage Gen2**.
- Orchestrated workflows in **Databricks** and migrated data to **delta tables** and utilized **delta live tables** for real time data processing and loading.
- Integrated **Power BI** with **Azure SQL** database to extract views, creating an engaging and interactive dashboard that effectively displayed and analyzed the data.
- Integrated **Azure Logic Apps** and **Azure Functions** with **Azure Monitor** for real-time data pipeline monitoring and alerting, resulting in a 30% improvement in issue resolution time.
- Scheduled workflows in **Apache Airflow**, ensuring seamless transformation and resolving 100% issues checking **Airflow** tools, logs, and corrective actions.
- Designed **snowflake** modeling in **data warehousing**, improving **data cleansing** by 25%, optimizing slowly changing dimension, enhancing change data capture and data validation

NCR (India) – Data Engineer Hyderabad | Aug 2021 – Dec 2022

- Created **SQL Server** stored procedures, functions, views, and triggers using both sql and **T-sql** improved.
- Created **ETL** pipelines for data integration in both cloud and on-premises environments by leveraging the capabilities of **Azure Data Factory** and **SSIS** packages.

- Built **Spark** applications using **Pyspark** and **Spark-SQL** programming with 30% improvement in data extraction, and aggregation from multiple file formats (JSON, Parquet, Avro, CSV, XML).
- Enhanced **Azure Data Factory** pipeline deployment by implementing **CI/CD** processes via **Azure DevOps**, **Kubernetes** and **Docker** 50% betterment in production release efficiency.
- Utilized **Agile** methodology and **Azure Boards** for **sprint** planning, ensuring complete alignment with sprint deadlines for a team of 4 individuals and collaborated with cross-functional teams.
- Efficiently migrated data from **SQL Server**, **DB2**, **Oracle**, and **MySQL** to **Azure Synapse Analytics** and **Azure Data Lake**, achieving a 30% reduction in data latency.

Aktrix (India) – Program Analyst

Chennai | Jan 2020 – Jul 2021

- Created **spark streaming** applications for real time data processing by integrating with **the AWS Kinesis**, **Kinesis Data Analytics** and loading the data to **redshift**.
- Applied **snowflake** features like **Snow Pipes** and **stages** to process 10GB data everyday in real-time and ingest the data into **snowflake tables**.
- Scheduled a **Serverless Workflow** with **AWS Step Functions** and **Amazon EventBridge** Scheduler.
- Orchestrated **ETL Pipelines** in **Glue Studio**, applying diverse transformations, and ingesting data into **S3**, **Redshift**, and **RDS** reduced 40% completion time.
- Proficiency in configuring, working with big data technologies to improve performance using **Hadoop**, **Sqoop**, **Spark**, **Hive**, **MapReduce** and **HBase** on **AWS EMR** clusters.
- Architected **RESTful APIs** with **Django** and **AWS** services (**APIGateway**, **Lambda**, **Route53**, **IAM**, **S3**, **CloudWatch**, **Step Functions**, **ElasticSearch**, **DynamoDB**) a 20% reduction in latency.

PROJECT

Real-Time Weather Data Pipeline & Dashboard

GitHub: <https://github.com/AMIREDDYSHIVANI>

- **Pipeline Architecture:** Architected a real-time data engineering solution ingesting weather API JSON stream into AWS S3, processing with AWS Glue and PySpark, and loading into Snowflake.
- **Orchestration & Quality:** Automated pipeline orchestration with Apache Airflow; implemented data quality validations and alerts to detect schema drift and data anomalies.
- **Visualization & Accessibility:** Developed a Streamlit dashboard for live visualization of weather metrics, granting stakeholders interactive access to trends and anomalies.
- **Documentation & Governance:** Documented the complete pipeline in Confluence, including data contracts, architecture diagrams, and operational runbooks for compliance and reproducibility.

EDUCATION

Master of Science in Information Systems | Indiana Institute of Technology, Fort Wayne, IN

Bachelor of Technology in Electronics & Communication Engineering | Teegala Krishna Reddy Engineering College, Hyderabad, India

CERTIFICATIONS

- Advanced SQL Certification – HackerRank
- Python for Data Engineering – HackerRank
