EXPERIENCE

Technical Lead

HCL Enterprise

📅 11/2021 - 02/2025 📍 Chennai, India

- **Client :** Western Union (Finance)
- Led periodic data purging initiatives to maintain data hygiene and ensure compliance with data retention policies.
- Identified and archived historical data during pre-migration audits, preventing unnecessary data bloat in new system.
- Analyse target system functionality and data models , enhancing ETL architecture and understanding.
- Performed Data Analysis and quality assessments, Implementing cleansing strategies.
- Developed entity relationship digrams and data dictionaries to support data governance.
- Extensively utilized advanced data cleaning techniques to ensure high data quality for accurate analysis and reporting.
- Monitor ETL jobs, Python DAGs, ensuring SLA compliance, and handle incidents in Agile framework.
- Analyze existing conversion processes and identify/address problems impacting the quality of our data conversions and implementations.
- Proficient in using SQL queries to clean, validate, and transform large datasets. Skilled in Excel functions and macros for data cleaning and manipulation.

Software Engineer

Tata Consultancy Services

📅 07/2016 - 11/2021 📍 Chennai, India

- **Client :** Woolworths (Retail)
- Core Forecasting Systems are central to achieving optimal stock levels across the supply chain network and stores.
- These systems are at end of useful life for support, warranty, infrastructure and lagging behind the latest capability in the market.
- Upgrading to the latest suite of Forecasting products provides us comparable Stay in Business solutions.
- Remaining on the vendor upgrade path will reduce and smooth ongoing financial outlay and deliver more frequent updates
- Improve Product Availability: Declining on shelf availability Customers are unable to get the products when it's needed for them
- Improve Inventory: Lack of ability to clearly and succinctly understand E2E inventory to ensure we have adequate inventory in the right locations
- Improve Forecasting Accuracy: Cumbersome systems that have limited or no scope to modify to fit business needs; therefore, they have high manual workarounds
- Streamlined & Supported systems: Current systems are at end of useful life and have lapsed extended support.

EDUCATION

Bachelors of Technology

Jawaharlal Nehru Technological University

📅 05/2012 - 05/2016 📍 Kakinada

- Information Technology

Master of Business Administration

Acharya Nagarjuna University

📅 05/2019 - 09/2021 📍 Guntur

- Human Resources

SUMMARY

Technical Lead with 8+ years of experience in the IT industry, specializing in ETL processes (Informatica & Talend). Proficient in tools like IBM DB2, SQL and Snowflake, with a strong focus on enhancing business solutions through innovative development and agile methodologies. Committed to leveraging advanced technical skills to drive operational excellence and future growth in dynamic environments.

KEY ACHIEVEMENTS

Enhanced Job Monitoring

Achieved 95% job completion rate by monitoring production batches effectively.

Reduced Job Failures

Reduced failure rates by 20% by fixing job failures and automating tasks.

Performance Tuning

Optimized PLSQL procedures for high volume retail transaction processing, reducing batch runtimes by upto 70%.

Implemented automated data purging scripts, by improving data performance by 25% and reducing manual effort by 40%

SKILLS

Informatica Power Center

Talend Open Studio

JIRA

Unix Shell Scripting

UC4

PLSQL

Performance Tuning

IBM DB2

Snowflake

Tableau

Talend Management Console

Data Migration

Data Purging

CERTIFICATIONS
