Summary:

- A results-driven Senior Software Engineer with 18+ years of extensive experience in design, development, testing and implementation of complete software development life cycle in the field of web application, SaaS and client/server technologies. Proficient in system design, architecture, microservices and distributed systems.
- I thrive in collaborative environments, leveraging my strengths in interpersonal skills, strong leadership, collaboration, problem-solving, and adaptability to new technologies, with a focus on delivering projects within budget and timeline constraints.

Technical Skills:

- Strong Knowledge of C# (.NET Core)
- JavaScript (Node.js, React, JQuery)
- SQL (Oracle, MS SQL Server, MySQL, NoSQL)
- CI/CD (Jenkins, Bamboo, AWS CodePipeline, TeamCity/Octopus)
- Familiarity with C++, Java, Python (Django)
- TypeScript, HTML, CSS
- Cloud (AWS, PCF, Docker, Kubernetes)

Professional Experience:

Stamps.com, Inc, Sunnyvale, CA - Senior Software Engineer (Full-time)

August 2020 to Present

- Migrated complex, high-volume monolith legacy US Postal Service Adjustments systems into modern, efficient solutions using distributed system architecture with a tech stack including C#, AWS services (Lambda, Step Functions, SQS, SNS, DynamoDB and MSK).
- Collaborated with cross-functional teams to prioritize tasks and meet project deadlines.
- Redesigned and implemented databases, migrating from MS SQL Server to MySQL, reducing costs by \$200,000 annually.
- Formulated MySQL optimization strategies, reducing query response time from 12 seconds to 4.5 seconds.
- Improved performance by nearly 30% through analysis of Splunk logs, leveraging complex Splunk queries.
- Improved code coverage by 90% via unit test implementation and utilized SonarQube for code quality inspection.
- Implemented secure authentication in REST/Microservice architecture using JWT Security Tokens.
- Contributed to the continuous improvement of development processes, software architecture principles, design patterns and practices, implemented automation and DevOps solutions in AWS cloud.
- Performed Code Reviews to enforce project coding standards.
- Involved in production support, debugging and problem solving.

Charles Schwab, San Francisco CA - Senior Software Engineer (Contract)

June 2018 to July 2020

- Served as the lead backend engineer in designing and developing microservices to provide services for Schwab decedent clients' inheritors to manage their inherited accounts using a tech stack of C# and MySQL.
- Collaborated closely with product manager, ux designers to define project requirements.
- Collaborated with front-end engineers to design JSON metadata, optimizing data payloads and minimizing server requests.
- Implemented caching, resulting in a 15% performance improvement for the application.
- Contributed to the continuous improvement of development practices using Specflow, Behavior-Driven Development (BDD) Testing with Gherkin and Test Driven Development(TDD).
- Streamlined CI/CD pipeline with Atlassian's Bamboo, reducing the build times by 25%.

- Leveraged PCF to build, deploy and operate on-premises cloud offerings.

Credo Mobile, San Francisco CA - Senior Software Engineer (Contract)

Jan 2016 to May 2018

- Designed and developed custom apps in Zendesk customer service SaaS platform using HTML5, CSS3, JQuery, JavaScript, Knockout.js, Handlebars.js, Toastr, Bootstrap CSS and Zendesk App Tools (ZAT).
- Led the strategic optimization of custom apps and its integration with backend Microservices.
- Investigated and resolved complex technical issues, including SQL Injection vulnerabilities, optimized performance, and enhanced user experience.
- Investigated, resolved spikes, and enhanced MS SQL Server performance, reducing CPU utilization by 40% with the Redgate Monitoring tool.

Elegrity Inc./iManage, San Francisco CA - Software Engineer (Contract)

May 2013 to Nov 2015

- Provided technical leadership in managing all aspects of both front-end and back-end development of Law Business Management System including analysis, testing and deployment with tech stack of Javascript and C# and MS SQL.
- Evaluated legacy systems to determine cost effective solutions.
- Led the adoption of an Agile Methodology to improve resource allocation and mitigate project delays.

Deloitte Consulting, Pittsburgh PA - Software Engineer (Contract)

May 2008 to April 2013

- Served as full-stack engineer in managing all aspects of both front-end and back-end development in KIDS application, including analysis, testing and deployment with tech stack of Javascript and C# and Oracle database.
- Created a technical specification document by collaborating with business analysts.
- Contributed to the in-house library to create reusable components such as user controls and custom controls.
- Designed and implemented databases, created database objects in Oracle database.
- Implemented a windows based authentication module for improving security compliance.
- Managed all aspects of the deployment of major enterprise applications and contributed to its post production support.

HCLTech-CISCO Systems, Chennai, India - Member of Technical Staff (Full-time)

Jan 2006 to Dec 2007

- Designed and developed a Network Management System to configure Cisco switches and routers remotely.
- Evaluated NetFlow collector's parsed data, and generated traffic graphs to monitor Cisco switches and routers' performance.
- Collaborated with a team of engineers to ensure timely project delivery while adhering to best practices.
- Configured logical VLANs and implemented routing technologies such as BGP and MPLS using SNMP queries to monitor the live network status.

Education:

- Master of Science in Networking and Telecommunications IIIT Pune.
- Bachelor of Technology in Computer Science and Information Technology JNTU Hyderabad.
