SUMMARY

- Salesforce Admin with over 4 years of experience in managing and optimizing Salesforce environments, specializing in user management, data security, and process automation.
- Expertise in Salesforce Sales Cloud and Service Cloud, with a strong focus on case management, lead management, and Omni-Channel functionalities.
- Proven track record of driving user adoption through tailored training, comprehensive user documentation, and effective system implementations.
- Skilled in configuring and managing user access controls such as Profiles, Roles, Permission Sets, and Sharing Rules, ensuring secure and compliant data access.
- Proficient in implementing Salesforce automation tools like Process Builder, Flow Builder, Apex, and Visualforce to streamline business processes and improve operational efficiency.
- Hands-on experience in data management and integration using SOQL, SOSL, RESTful APIs, and Salesforce Data Loader to ensure clean, accurate data.
- Adept at conducting audits and troubleshooting to enhance data security, monitor system performance, and ensure regulatory compliance.
- Experienced in creating custom reports and dashboards that provide real-time insights and support data-driven decision-making.
- Hands-on experience in Sandbox Management, Change Sets, and Deployment Tools to test and deploy Salesforce configurations efficiently.
- Skilled in login IP ranges, trusted IPs, and two-factor authentication (2FA) to enhance data security and user access.
- Salesforce Certified Administrator, continuously improving skills and knowledge through professional development and staying current with the latest Salesforce updates.

SKILLS

- **User Management & Security:** Profiles, Roles, Permission Sets, Sharing Rules, Field-Level Security, Audit Trail, Login History, Data Security
- **Sales & Service Cloud:** Case Management, Knowledge Base, Lead Management, Omni-Channel, Case Auto-Response, Lead Assignment Rules, Case Assignment Rules, Email-to-Case, Web-to-Case
- **Security & Compliance:** Two-Factor Authentication (2FA), Single Sign-On (SSO), Login IP Ranges, Trusted IPs, Field History Tracking
- **Change Management & Training:** User Adoption Strategies, End-User Training, User Documentation, Sandbox Management, Change Sets
- **Automation & Process Management:** Flow Builder, Workflow Rules, Approval Processes
- **Programming & Tools:** Apex, JavaScript, Python, HTML, CSS, Salesforce Lightning, Visualforce, LWC, Apex Triggers, Process Builder
- **Data Management & Integration:** SOQL, SOSL, RESTful APIs, SOAP APIs, JSON, XML, Data Loader, Schema Builder, Data Migration
- **Cloud Platforms & Deployment:** Salesforce Platform (Force.com), AWS, Google Cloud, Salesforce DX, Metadata API, Jenkins
- **Version Control & Testing:** Git, GitHub, Apex Unit Testing, Debug Logs
- **Collaboration & Project Management:** Agile, Jira
- **Soft Skills:** Problem-Solving, Communication, Team Collaboration

WORK EXPERIENCE

DXC Technology

February 2025 – Present

Salesforce Admin

- Led the migration from Salesforce Classic to Lightning Experience, optimizing user interfaces and implementing custom Lightning components to enhance user productivity and improve reporting capabilities, resulting in a 20% increase in user adoption across teams.
- Collaborated with cross-functional teams to ensure seamless data transition, configuring custom page layouts and automating repetitive tasks using Salesforce Lightning tools.
- Conducted user training sessions and created detailed documentation, facilitating the smooth adoption of Lightning Experience and driving increased user engagement across departments.
- Automated repetitive processes using Flow Builder and Process Builder, reducing manual effort by 30% and enhancing operational efficiency across sales and support teams.
- Performed regular audits, monitored system health through debug logs and login history, and ensured data security and compliance with enterprise governance policies.

DXC Technology

July 2024 - December 2024

Salesforce Admin Intern

- Managed a comprehensive data clean-up process in Salesforce, focusing on identifying and merging duplicate records, standardizing data formats, and maintaining data integrity across systems.
- Developed and implemented data validation rules, improving data accuracy and reducing errors in reporting.
- Automated data entry processes using Salesforce tools to reduce manual intervention and streamline workflows, enhancing overall efficiency across departments.
- Coordinated with various teams to ensure business processes were aligned with data structure changes, optimizing integration and reporting accuracy.
- Performed extensive testing and delivered training to users on best practices for data entry and maintenance, driving long-term improvements in data quality.

Salesforce Admin

- Spearheaded the implementation of user access controls by configuring Profiles, Roles, and Permission Sets to align with company security policies.
- Developed and maintained Field-Level Security settings, ensuring that sensitive data was only visible to authorized personnel, reducing the risk of data exposure.
- Streamlined record visibility management by configuring Sharing Rules, optimizing collaboration while maintaining data integrity and security.
- Enhanced system security by tracking login history and audit trails, providing detailed access reports to facilitate compliance and security audits.
- Oversaw the security of critical business data by implementing Salesforce's security features to prevent unauthorized access, thus safeguarding business assets.
- Partnered with cross-functional teams to ensure alignment of Salesforce access controls with company-wide security protocols and compliance requirements.
- Enforced Two-Factor Authentication (2FA) and SSO to enhance system security.
- Delivered user training and created comprehensive documentation, aiding employees in adopting and adhering to new security procedures.
- Improved user management processes by integrating role hierarchies and permission sets, ensuring efficient and secure user access management.
- Mitigated security risks through ongoing audits and regular troubleshooting of user access, ensuring a secure and compliant Salesforce environment.
- Managed Change Sets and Sandbox Testing to ensure smooth deployment of new configurations and automations.

Trigent Software**January 2018 - July 2020****Salesforce Admin**

- Orchestrated the automation of Salesforce sales processes, incorporating Visualforce pages, Apex Triggers, and Process Builder to enhance lead management and streamline opportunity tracking.
- Engineered custom Visualforce pages and Apex Triggers to automate business processes and improve the user interface, leading to improved sales team productivity and higher adoption rates.
- Set up Process Builder to automate critical sales processes, such as lead routing, opportunity updates, and task creation, minimizing manual work and accelerating the sales cycle.
- Utilized SOQL and SOSL queries to create custom reports and dashboards, providing real-time visibility into sales pipeline and performance metrics, which led to a 20% increase in reporting accuracy.
- Synced Salesforce with external tools to automate the flow of customer data, optimizing lead nurturing and reducing data discrepancies between systems.
- Established automated email alerts and notifications to ensure the sales team remained informed of important opportunities, follow-ups, and approval processes.
- Used Salesforce Data Loader to manage and migrate large volumes of data, ensuring data integrity and streamlining data import and export processes.
- Teamed up with development and sales teams to troubleshoot and fine-tune automation processes, ensuring smooth system functionality and alignment with business objectives.

PROJECTS**Salesforce Automation for Customer Service**

- Implemented Process Builder and Flow Builder to automate case assignment and escalation rules, improving customer service response times.
- Created custom reports and dashboards to monitor case resolution time and customer satisfaction, providing insights for performance improvements.

Salesforce Data Quality Improvement Initiative

- Developed and implemented data validation rules and duplicate management strategies to ensure clean, accurate, and reliable customer data.
- Used Salesforce Data Loader to perform large-scale data cleansing and migration from legacy systems, ensuring data integrity for accurate reporting.

EDUCATION

- Masters in **Computer Science**
California State University | **CGPA: 3.78/4.0**
- Bachelors in **Computer Science**
Gitam Deemed University | **CGPA: 8.52/10**

January 2023 – December 2024**June 2016 – June 2020****CERTIFICATIONS**

- **Salesforce Certified Administrator (SCA)**
- **Salesforce Certified AI Associate**
- **Red Hat Certified System Administration (RHCSA)**
