

Ms. SUMATHI | SAP S/4 Hana ABAP and Process Integration Lead Developer

sumathi.gov@gmail.com |

+1 309 532 5097 |

L2 EAD |

Immediate

Bachelors in Information and Communication Technology with 20 years of experience in implementing SAP ERP solutions. Associated with SAP implementations for various clients in Asia Pacific across industry segments.

NetWeaver-**ABAP** Workbench Consultant with good technical experience in the areas of **ABAP**, Process Integration (**PI**) & Cloud Process Integration **CPI**, **Supply Chain Management (SCM)**, Business Process and Consolidation (**BPC**).

ABAP/4 Experience includes developing Classical **reports**, **ALV** Drill down reports, **Dictionary** objects, **Smart Forms**, **Module pool** programming, **LSMW**, **Enhancement & Switch Frame work**, **BADI**, **BAPI**, **ALE**, **EDI**, **Web Dynpro** and **Process Integration Development**, **ODATA & NetWeaver Gateway**, **Fiori**.

ABAP for **HANA** - Well versed with the new syntax of **ABAP 7.50** and enhanced open SQL. Good hands-on in using the HANA features to **Code Push down** using the HANA modelling artifacts - **CDS Views**.

Good knowledge in areas of **MM**, **SD**, **FI**, **PP**, **PS**, **Treasury**, **VIM**, **SCM** and **CRM** including extensive custom development work. Experience includes designing and developing complex business requirements in functional areas of Materials Management, Finance, Sales & Distribution and CRM.

Well versed with **Mergers and Acquisitions (M&A)** projects, integrating SAP with third-party systems using various technologies such as BAPIs, IDocs, and Proxies to streamline business processes and ensure seamless data flow

Strong technical skills and self-driven and innovative, to explore and gain knowledge in understanding the new business tools of SAP and understanding SAP's Road map ahead. Well versed with **ASAP** methodology & Agile model. Fast learner and a team Player with previous work experience under demanding, problem-oriented circumstances.

Has been part of successful projects and appreciated highly in all the engagements for active participation in **Development & Design** activities with strong **technical** skills and leading the team by example.

SAP Experience Summary

SAP Technical Consultant, Jebsen & Jessen(SEA) Pte Ltd , Singapore	Oct-2011 to Jan-2025
SAP Technical Consultant, Electra (S) Pte Ltd , Singapore	Dec-2007 to Sep-2011
SAP ABAP Consultant, Epson , Singapore	Dec-2006 to Aug-2007
SAP ABAP Consultant, (HP) Hewlett Packard , Singapore	Aug-2005 to Nov-2006

Academic Chronicle

Bachelor of Information and Communication Technology – University of South Australia
2005 to 2007

SAP Middleware Tools (XI/PI/PO/CPI/BTP-Integration Suite) Expertise:

- **Designed, developed, and governed interfaces** utilizing both cloud and on-premise integration tools such as SAP XI/PI/PO/CPI, employing best practices and integration patterns.
- **Expert in implementing integrations** between on-premise and cloud applications, including SuccessFactors and C4C, using integration tools like PO and CPI, along with Groovy scripts and XSLT mappings.
- **Comprehensive knowledge of various integration protocols** including SuccessFactors, OData, EDI, IDOC, HTTP, JDBC, JMS, RFC, SOAP, XI, FILE, Proxy, and MAIL adapters.
- **Led migration projects** to different versions of SAP PI/PO, ensuring seamless transitions and optimized system performance.
- **Implemented B2B and B2C EDI scenarios** using UBL standards for electronic invoicing, credit and debit notes.
- **Extensive experience with SAP Business Technology Platform (BTP)**, particularly in the Integration Suite (CPI & PI/EDI).
- Proficient in **Cross-Component Business Process Management** to streamline workflows across various systems.
- **Facilitated training sessions** on SAP Integration tools and best practices, enhancing team knowledge and skills.

ABAP Expertise:

- **ABAP 7.50 and ABAP for SAP HANA 2.0** (HANA artifacts CDS views).
- Well versed with all the components of **ABAP dictionary**.
- Experience in **Screen Flow programming/** Dialog Programming using **Screen Painter** and **Menu Painter**.
- Experience in adapting Modularization Techniques - **Includes, Subroutines** and **Function modules**.
- Experience in developing **ABAP Reports** using **ALV**
- Data Migration using Batch Data Communication (**BDC**), Legacy System Migration Workbench (**LSMW – Idoc, Bapi, Direct/Batch Input**) and **BAPI**.
- Extensively worked on **ALE/IDoC's** programming and Enhancements
- Well versed in using **OOABAP** in programming
- Worked on **User exits, BAdI's** and **Enhancement and Switch Frame work**.
- **ODATA & NetWeaver** Gateway
- Worked on Interfaces with XI as middleware to integrate with SCM and legacy systems.
- Implemented **ABAP Proxies** and enhanced IDocs, customer user exits for integration scenarios.
- Developed **BADIs** for Master Data and SAP module-specific requirements.
- Participated in support pack upgrades, applied relevant **OSS Notes** and **SPAU** activities.
- Delivered reporting/enhancements quickly with minimal functional input.
- Mentored new SAP team members and provided leadership and guidance.

BPC Expertise:

- Contributed to the development of new BPC reports, enhancing business insights and decision-making.
- Managed month-end and year-end processing for Management and Legal Consolidation.
- Implemented BADIs to support custom calculation requirements and business-specific logic.

Industrial Expertise:

Life Sciences, Packaging, Consumer Business, Trading, Manufacturing, Material Handling, Cables, Offshore and Chemical.

Project Experiences:

1. Jebsen & Jessen (SEA) Pte Ltd, Singapore – October 2011 to Jan 2025 (12 Projects)

JJSEA is South East Asia focused engineering, manufacturing and Distribution Company. Which has the following Regional Business Units, Offshore, Chemicals, Communications, Cable Technology, Life Sciences, Material Handling, Packaging & Technology.

Project: SuccessFactors Implementation/Support

Role: SAP CPI Consultant

- Enable the **CPI Integration Flow** between S/4 HANA and **Employee Central**.
- Monitoring and application administration for **CPI, Cloud Connector** and proficient in error handling mechanisms.
- Strong knowledge in **Payroll SF, Employee Central and Compensation** modules.

Project: Safetech Australia implementation (Merger and Acquisition)

Industry: Industrial Products Manufacturing

Role: Lead & Senior Developer for ABAP Enhancements

- Re-designed, developed the existing solution for **BOM Manager** to overcome the bottle necks, facilitated data uploads and downloads for PP and MM tables to enable seamless integration with third party application.
- Review the design of key technical components to make sure that they are aligned with the established standards and fits into the overall architecture.

Project: Malaysia E-Invoice [UBL Standard] (B2B and B2C Integration)

Industry: Malaysia RBU's (Cables, Life Science, Packaging & Technology)

Role: ABAP and PI Lead

- Worked closely with the functional & Core user team in identifying the gaps and in realizing the same.
- Providing estimates and timelines to the project management for the developments involved.
- Designed custom tables, reports to read, validate and process the Invoice, Credit and Debit Note documents and oversee the developments done by the team.
- Downloaded and implemented **UBL 2.0 (Universal Business Language)** Invoice, Credit Memo, and Debit Memo **XSLT standards within SAP's ESR (Enterprise Services Repository)**.
- Developed ABAP **Proxy to SFTP** and **SFTP to Proxy** interface and configure **SOA Manager** to submit the Invoice and other documents to Malaysia IRBM portal.
- Modified invoice output to include the IRBM UUID and barcode for sending validated invoices to customers.
- Supporting the functional team and core users in acceptance testing and in integration testing.

Project: Treasury Module and SWIFT Bank Interface Implementation

Role: ABAP and PI Consultant

- Create and maintain custom solutions for specific treasury requirements, such as **cash flow forecasting, hedge accounting, and risk management**.
- Designed and implemented **File and Proxy interfaces** using PI/PO to send and receive SWIFTNet's **FIN and FileAct** services.
- Developed **ABAP Proxy** custom code to interpret and format SWIFT Message type **MT940** (Customer Statement Message) used for bank statements sent to customers and **CAM86**.
- Configure **SOA Manager** and create **Logical Port for ABAP Proxy**
- End-to-End Testing for the complete payment or transaction process, from message creation in SAP to successful transmission via the SWIFT network and processing at the bank.

- Implement monitoring mechanisms to track the status of SWIFT messages and to capture logs for troubleshooting and audit purposes.

Project: Opentext/VIM Implementation

Role: ABAP Technical Consultant

- Modified **SAP workflows** to handle vendor invoice approval and routing.
- Implemented custom logic using **BADI (Business Add-ins) and User Exits** for processes that are not covered by standard **VIM** functionality.
- Mapping and transforming data between different systems, including invoice data processing and integration with SAP's backend systems.
- Troubleshoot issues within the VIM workflow and perform ongoing system maintenance and support. Customizing the system to handle 2-way, 3-way, or 4-way matching for invoice verification against purchase orders and goods receipts.
- Designed and developed programs, function modules to handle new exceptions and process options based on the user requirement from different countries and forms to print Label which is used by AP Document Processor.
- Developed reports for various stakeholders (e.g., finance teams) for monitoring the status of invoices, payment schedules, and approval workflows.

Project: SAP Fiori Custom App Development for PO Approval

Role: Technical Consultant

- Designed and developed the Webpage for PO Approval using **WEB IDE**
- Created User Interface (**UI**) for **Fiori Launchpad** Tile that links the PO Approval App, with action buttons 'Approve' and 'Reject'.
- Created custom **OData** service to connect the **Fiori** app to SAP backend data.
- Implemented backend custom logic to handle PO Approval and Rejection, trigger approval/rejection notifications to relevant users by e-mail.
- Created user roles and authorizations in SAP **Fiori** to ensure only authorized users can approve or reject PO's.

Project: S/4 HANA Upgrade

Role: Technical Consultant

- Analyzed the custom ABAP programs and reports to identify any compatibility issues with S/4 HANA.
- Replaced the inefficient database queries with optimized versions using ABAP **CDS Views**
- Adjust existing integrations with third-party systems to ensure smooth operation.
- Test and confirm **RFC's** and **BAPI's** are correctly updated for compatibility with S/4 HANA's simplified data model.
- Assist functional teams in mapping existing business processes to the new S/4HANA version, ensuring that all processes remain intact or are enhanced.

Project: Mobile Interface for MHE Demag Australia

Role: Technical Consultant

- Design and development of **RFC** function modules to synchronize the SAP data to Mobile development via **SQL Server** database.
- Configure and code the **stored procedures in SQL Server**
- Co-ordinate with functional team to setup Master data in both SAP and **SQL Server** for Customer Service

Project: MHE Demag PI Implementation

Role: PI Technical Consultant

This project is an Integration of B2B for MHE division of Jebsen & Jessen Pte Ltd with vendor DeMag Germany. Automation of purchasing process [PO, Order Confirmation & Invoice Verification]

- Design **Technical specifications** for **PI** interfaces.
- Enhanced the standard **Idoc** Function modules in ECC based on PI business requirements.
- Configured and developed the necessary components to trigger the Purchase Order **IDOC ORDERS05** to PI as soon as the PO is approved and mapped the PI receiver to a **HTTP adapter**.
- Configured PI Interface from End-to-End **SLD, ESR & Integration builder** for **IDOC to HTTP Adapter** (Outbound) and **SFTP to Idoc Adapter** (Inbound) interfaces.
- Configured Order Confirmation (**ORDRSP**), Ship Notification(**DESADV**) and Invoice verification (**INVOIC02**) inbound **Idocs**.
- Implemented B2B **monitoring / error handling** reports for all outbound and inbound interfaces.
- Prepare test cases for unit testing and System Integration testing.
- **Go live** and on-call support for all of the applications in SAP ECC and PI.

Project: Cable Builder Integration

Role: ABAP and PI Technical Consultant

- Designed and implemented the integration of JJ LAPP with Cable builder third-party application.
- Cable Builder is a desktop application that reads processes the data input and generates the Materials required for BOM and Routing.
- Created the entire integration process to extract information from Cable Builder system which generates XML file, and create **Idocs** in SAP.
- Configured PI Interface from End-to-End **SLD, ESR & Integration builder** for **SFTP to Idoc Adapter** (Inbound).
- Configured Material Master(/**SAPMP/MATMASP**), BOM(/**SAPMP/BOMMAT**) and Routing (**ZIZ_MPROUTING**) inbound **Idocs** and trigger mail to the users to update the status of the processed Idoc's.
- Implemented **monitoring / error handling** reports for all inbound interfaces.

Project: Offshore implementation (Merger and Acquisition)

Industry: Offshore

Role: ABAP Technical Consultant

Implementation of SAP software modules SD, MM, FI and PP for newly acquired offshore regional business unit from Jebsen & Jessen(SEA) Pte Ltd

- Updated **SMARTFORMS** to include the new logo and modified them according to the requirements for business documents in the SD, MM & FI modules
- Developed custom **ALV** report to display monthly stock movements for Plant, Sales & Project stocks
- Modified the **BOM Upload program** to meet the new requirements
- Developed a new upload program using **BAPI** to upload **Standard Project & Standard Network** for **PS** module
- Supported the functional team with Open PO, SO, AM and Material data uploads

Project: Packaging Malaysia Rollout

Industry: Packaging

Role: ABAP Technical Consultant

- Completely configured the FI-AP payment run (F110) for vendor/customer payments via IDOC and CSV setup, integrated with the company's house banks.
- Implemented email notifications for payment advice following a successful payment run.

- Updated **SMARTFORMS** to include the new logo for business documents in the SD, MM & FI modules
- Added checks in **user exits** and **BADI's** for the new plant
- Created custom program to upload **BOM & Routing** using **BAPI**

2. Electra (S) Pte Ltd, Singapore – December 2007 to September 2011 (7 Projects)

Electra is an IT consulting service provider offering end-to-end IT solutions and services to enterprises across South East Asia. 1st SAP Gold Partner for A1 solutions in Singapore, and was one of the business unit of Jebsen & Jessen (SEA) Pte Ltd upto September 2011

Project: LAPP SMI Rollout (Merger and Acquisition)

Client: Jebsen & Jessen Pte Ltd, Singapore - Cables division

Role: ABAP Technical Consultant

Create new development objects and enhance the existing developments of Lapp Cables division to new acquisition company SMI Indonesia

- Developed a new print program and form using **Smartforms** for Production Order Printing
- Created **ALV Report** for Production Cost Analysis to compare Plan, Actual & Target Costs
- Developed Manufacturing variance report to capture component usage and work center details for PP module
- Updated **SMARTFORMS** to include the new logo for business documents in the SD, MM & FI modules

Project: LAPP Cables PI Implementation

Client: Jebsen & Jessen Lapp Cables

Role: PI Technical Consultant

Implementation of SAP PI Interface (B2B) between JJ Cables division [Singapore, Malaysia, Thailand, Philippines & Indonesia] and vendor Lapp Cables Germany to automate purchasing process.

- Design **Technical specifications** for **PI** interfaces.
- Modified **Idoc User Exits** using **SMOD** in ECC based on business requirements.
- Configured and developed the necessary components to trigger the Purchase Order **IDOC ORDERS05** to PI as soon as the PO is approved and mapped the PI receiver to a **SFTP adapter**.
- Configured PI Interface from End-to-End **SLD, ESR & Integration builder** for **IDOC to SFTP Adapter** (Outbound) and **SFTP to Idoc Adapter** (Inbound) interfaces.
- Configured Order Confirmation (**ORDRSP**) and Invoice verification (**INVOIC02**) inbound **Idocs**.
- Implemented B2B **monitoring / error handling** reports for outbound and inbound interfaces.
- Prepare test cases for unit testing and System Integration testing.
- **Go live** and on-call support for all of the applications in SAP ECC and PI.

Project: JJ Chemicals PI Implementation

Client: Jebsen & Jessen Chemicals

Role: PI Technical Consultant

Implementation of SAP PI Interface between JJ Chemicals and Vendor Evonik Germany to automate purchasing process.

- Configure the PORT, Partner Profile & RFC Destination using **WEDI** transaction
- Co-ordinate with functional team to setup IDOC output type for Purchasing document
- Configuration of PI Interface from End-to-End (**SLD, ESR and Integration builder**) for Idoc to file scenario using **FTP Adapter**

- Enhance the standard Idoc function modules to validate outbound and inbound documents
- Configured Purchase Order (**ORDERS05**), Order Confirmation (**ORDRSP**) and Invoice verification (**INVOIC02**) **Idocs**
- Monitor interface using SXI_MONITOR & SXI_ADMIN and Runtime Workbench [RWB]

Project: Rollout

Client: Adval Tech [Omni], Singapore

Role: ABAP Technical Consultant

- Developed Custom Print Program & **SMARTFORM** to enable PO print & E-mail [PDF] with Korean and Chinese languages
- Collaborated closely with the functional team to define and develop **ALV Reports** and other technical solutions based on business requirements.
- Reviewed the existing user exits, cleaned up unnecessary code, and removed outdated PO document types.
- Developed custom transactions in the CO module to bypass user exits.

Project: Implementation

Client: Sysmex Asia Pacific Pte Ltd, Singapore

Role: ABAP Technical Consultant

Sysmex Asia is a market leader in the field of clinical laboratory products. This project is the New Implementation for Singapore and rollout for other plants in Malaysia, Indonesia & Thailand

- Created **SMARTFORM** and custom print programs for CS & SD sales quotations/orders, delivery, invoices, and MM GI slips based on country-specific requirements.
- Enhanced **ALV Reports** for the MM, FI, SD, and CS modules.
- Developed interface programs for banking, user exits, and **VOFM** routines in the SD module.
- Created upload programs for delivery, invoice, PGI, and material data using IDocs from XML files.

Project: Support Package Implementation

Client: Jebesen & Jessen Pte Ltd, Singapore

Role: ABAP Technical Consultant

- Performed code reviews and implemented necessary changes for objects affected by support package updates using **SPAU** and **SPDD** transactions.
- Liaised with the functional team to conduct testing of the objects.

Project: Implementation

Client: Fabulous Printers, Singapore

Role: ABAP Technical Consultant

- Implemented Integration between SAP and Printelli Estimator [Legacy System, which does the highly dynamic calculations for Printing Industry]
- Developed a **ALV** program to generate Job Sheet and Cost Analysis reports from integrated data required for production.
- Created forms for Business Documents using **SMARTFORM**

3. Epson, Singapore – December 2006 to August 2007 (1 Project)

Project: Rollout

Role: ABAP Technical Consultant

Project rollout for Hong kong & Thailand and Internal Support for Epson Singapore

- Developed program to create group delivery for selected picking list from **ALV list**

- Developed Program to create Sales Order, Delivery Note, Post Goods Issue and Billing from Customer PO data as the input file in XLS format
- Created custom program to export stock information for stock reconcile
- Created program to Post and Reverse monthly GIT using **BAPI**
- Managing production issues for Epson Singapore

4. Hewlett Packard, Singapore – August 2005 to November 2006 (3 Projects)

Project: IPMO APO upgrade (SCM 5.0)

Client: Hewlett-Packard (Imaging and Printing Group), Singapore

Role: ABAP Technical Consultant

Upgrade of APO system to SCM 5.0 and APO Support

- Worked on the technical aspects of the DP and SNP modules in **SAP APO**.
- Applied **OSS Notes** during system upgrades and addressed any manual processes as needed
- Identified screen changes and implemented them in custom **BDC** programs.
- Created new selection IDs to link the Planning Book, Data View, Planning Area, and Info Objects.
- Created and monitored jobs for new variants in the production environment.

Project: IPMO & IJMS AMN Wave 2 Project Enhancement

Client: Hewlett-Packard (Imaging and Printing Group), Singapore

Role: ABAP Technical Consultant

This project analyses the GAP Issues in WM (warehouse management) and fulfils the requirement

- Developed print program and **SMARTFORM** to print Shipment Release form, Invoice & Packing List
- Developed **BDC** program that creates delivery with reference from TO or Material Document. (Standard TO will not create the delivery document)
- Created **ALV report** to display Transport Billing information
- Modified the user exit for cancellation of delivery for the new delivery type
- Developed GST reports for materials, which are imported from Malaysia CM to Singapore for shipment or Quality Inspection
- Created New **Requirement Routine** to restrict the Output Type
- Modified the Custom Invoice to show breakdown of a higher level part

Project: IPMO Migration to Single Instance

Client: Hewlett-Packard (Imaging and Printing Group), Singapore

Role: ABAP Technical Consultant

This project involves migration of IPMO to IJMS system. Both the systems are in different versions. Most technically diverse compared to normal migration project. Migration of MM, SD, FI & PP Modules.

- Reviewed the code, and migrated and merged the user exits for the two businesses, ensuring that the requirements of both businesses were not affected.
- Created utility programs to identify business within common programs and **user exits**.
- Migrated **VOFM** routines
- Analyzed UNIX Scripts for sending buyer emails and converted into ABAP code for easy maintenance & coordinating development work with developers in India
