

Vijayakumar Sethuraman

Technical Architect | +1 (571) 604-4215 | vijayinitlak@gmail.com | [My Linked Profile](#)

Summary

Results-oriented technical architect with 16 years of experience in solving complex challenges, coordinating large teams, and making data-driven decisions. Expert in **.Net Core**, **Microservices**, and **DevOps**, with a proven track record of deploying scalable solutions using **Azure** and **AWS** cloud technologies

Skills and Competencies

- **Microservices** Architecture and Implementation
- **CI/CD** Pipeline Management with **Docker** for **containerization**
- Advanced **GraphQL** Schema Design and Optimization
- **API Security** and Authentication Strategies
- **.NET asynchronous** and multithreading programming
- **Performance** Monitoring and Scalability Solutions
- Cross-functional Team Leadership and Collaboration
- **AI-assisted Code** Generation and Optimization

Education:

Master of Science – Information Technology

Certifications:

- *Microsoft Certified Professional*
- *AWS Certified Solution Architect*
- Microsoft Specialist in – Developing Azure Solutions
- Certified Agile SAFe Practitioner

Core Expertise	.Net Core, Advanced C#, C++, WPF (MVVM), LINQ, Microservices, ASP.Net MVC, REST APIs, GraphQL OAuth, JWT , MFA, OpenID Connect, jQuery, Angular JS, ReactJS, NodeJS, Python, CSS, Bootstrap, Docker, Kubernetes, Redis
Cloud Technologies	Azure: App Services, Web Apps, Azure Functions, App Configurations, Service Bus Queues, Key Vault, Azure DevOps, Azure Pipelines, Azure Kubernetes Service AWS: EC2, S3, SQS, Lambda, RDS, API Gateway, App Dynamics, Splunk, Kafka
Databases	Microsoft SQL Server, Azure SQL, MS Access, MySQL, Firestore
Dev Methodologies	SAFe Agile development, Waterfall, XP, RAD, FDD
Dev Tools	Visual Studio, VS Code, Xcode, Android Studio, Postman
SCM	TFS, Bitbucket, Git, MS Visual Source Safe (VSS), Tortoise SVN
Testing Frameworks	NUnit, xUnit, MS Test, Appium, Ranorex
DevOps	Azure DevOps, Jenkins, Cloudbees Jenkins, Nexus 3.2.x , Firebase, Appcenter, Coverity
Scripting	Bash, Windows Batch, Powershell
Mobile Technologies	Xamarin MAUI 8.0.100 Android / iOS , Xcode

Technologies – .Net Core 7, RESTful API, Azure API Management, JWT, Azure AKS, Docker, Azure KQL, Oracle

Roles and Responsibilities

- Developed microservices using **ASP.NET Core**, including the **API Gateway pattern**.
- Created a web API with ASP.NET Core, incorporating **Entity Framework** Core concepts and custom middleware components.
- Designing and implementing architecture for systems using .NET technology, including **Microservices**, N-tier architecture, and project documentation.
- Created **RESTful APIs**, SOAP web services, adhering to API design principles, and maintaining **API documentation** standards
- Developed **Azure Functions** and **Azure App Services**, Service Bus Queues, and Event Grid Subscriptions.
- Implemented **Jenkins** for continuous integration and delivery, automating build and deployment processes to improve efficiency and reduce manual errors.
- Facilitated the transition to **RESTful services**, addressing legacy system limitations with effective solutions.
- Implemented **Docker** for **containerization**, enabling consistent environments across development, testing, and production, and improving scalability and deployment efficiency.
- Utilized SourceTree, Bitbucket, and Jira for development and issue tracking.
- Followed Test-Driven Development (**TDD**) using Microsoft Unit Testing framework.
- Worked within Agile/SCRUM methodology.
- Participated in database design using **normalization** and **denormalization** principles.
- Experienced with API management platforms such as **Azure API Management**
- Implemented API security protocols like **OAuth** and **SAML**, and best practices

Roles and Responsibilities

- Design, build and manage the **CI/CD** infrastructure and tools to deliver high-quality software
- Successfully implemented **Nexus** repository for artifact management, streamlining the build and deployment processes and enhancing version control across multiple projects.
- Implemented **Jenkins** for continuous integration and delivery, automating build and deployment processes.
- Implemented **Docker** for **containerization**, enabling consistent environments across development.
- Implemented Azure Kubernetes Service (**AKS**) to orchestrate containerized applications, enhancing scalability
- Implemented **Dotfuscator** to enhance application security by obfuscating code, reducing the risk of reverse engineering and protecting intellectual property
- Contribute code, focusing on **proofs of concept** and critical functionalities within our engineering ecosystem.
- Architecting DevOps for **Mobile** and **Embedded Apps** on medical devices.

Guardian Life Insurance
Technical Lead

Sept 2017 – Dec 2020

Technologies – .Net Core 5, RESTful API, Apigee, JWT, AWS EC2, AppDynamics, Splunk, SQL Server

Roles and Responsibilities

- Involved in different phases of SDLC including requirement analysis and architectural design phases of the project using **Agile** methodologies.
- Worked on **Visual Studio 2019/ .Net CORE 5.0** Framework to implement Business Logic.
- Coded business logic and database logic using **Entity Framework 6 and Repository Pattern**. Used Entity Framework Code first approach and **LINQ** to entity for data access.
- Implemented and managed API gateways using **Apigee**, ensuring secure, scalable, and efficient API operations.
- Integrated **AppDynamics** for comprehensive application performance monitoring, enabling proactive detection and resolution of issues to ensure optimal system functionality
- Utilized **Splunk** for **logging** and analyzing application data, improving troubleshooting processes and gaining valuable operational insights.
- Created a controller and its endpoints using **Web API** methodology of different **HTTP verbs** in developing Web services.
- Created **RESTFUL** services using **WebAPI**, **built HTTP** services and formatted responses using web API media type formatter to **JSON**.
- Responsible for implementing the **JWT token-based** Authorization to the service endpoint.
- Created/Modified Stored Procedures, Triggers and Views in SQL.

Accenture Solutions Inc.
Technical Lead

Sept 2013 to Oct 2017

Roles and Responsibilities

- Utilized key features of **ASP.NET**, including Dataset, Data Bag, and Data Adapter.
- Replaced legacy systems with **ASP.NET MVC** single-page web applications (SPAs).
- Developed the Data Access Layer (**DAL**) for database transactions using Entity Framework Database First approach.
- Production Release Implementation plan and Install Support
- Worked within the Scrum Framework to meet timelines with high-quality deliverables.
- Implemented forms authentication in ASP.NET Web API, including login, password, and user **authentication**.
- Built and maintained SQL scripts, indexes, and complex queries for data analysis and SQL ETL batch processes

Cognizant Technology Solutions
Programmer Analyst

Feb 2011 to Sept 2013

Roles and Responsibilities

- Responsible for requirement gathering from the SMEs and Business Users
- Implemented Model-View-ViewModel (**MVVM**) design pattern using MVVM architecture for the application Implemented in **WPF XAML** for the GUI for a better look and feel.
- Used Unity Container for Dependency Injection of **WPF Views and View Models**.
- Used Collection View Source for custom Sorting and Filtering of records.
