

Eric Reid

Address: 3006 Marta Circle – Kissimmee – FL 34741

Phone: (407) 516.7781

E-mail: ereid7114@yahoo.ca

LinkedIn: <https://www.linkedin.com/in/reideric/>

Gender: Male | Date of Birth: 04/08 | Nationality: American and Canadian

Goal:

Seeking a mid-level position as a *Test Lead (Remote)*.

Main Skills:

I am an Infrastructure Test Manager/Scrum Master with extensive experience in Information Technology and knowledge in Agile facilitation, coaching, team efficiency, end-to-end delivery, and servant leadership. My organized approach allows me to conduct analyses systematically, contributing to production improvements.

As a Product Specialist, I manage system integration testing (SIT) and User Acceptance Testing (UAT). This expertise enables me to allocate resources effectively, assign tasks, and ensure balanced workloads within the team.

I have successfully collaborated with cross-functional teams to ensure traceability of requirements. I have worked across various industries and can effectively drive QA strategies for multiple projects. My expertise includes Clarity PPM, Jira, Confluence, and ServiceNow. Additionally, I have led both onsite and offshore resources within Scrum and Kanban frameworks. I am skilled in defect management, remote work, and both Agile and Waterfall methodologies.

Work Experience:

Cigna • Orlando, FL • 02/2020 - 04/2025

Position: Infrastructure Test Manager/Scrum Master

Main Activities:

- Scheduled and facilitated sprint events, including backlog grooming, planning, reviews, daily stand-ups, and retrospectives.
- Collaborated with cross-team onsite and offshore
- Collaborated with other Scrum Masters and Agile Coaches to optimize software delivery processes.
- Facilitated team self-organization and ensured adherence to the Scrum process.
- Monitored the team's backlog, ensuring its accuracy and alerting management as needed.
- Ensured all infrastructure environments were configured and updated before testing.

Main Results:

- Improved team efficiency in delivering software projects.
- Increased the quality and timeliness of software deliveries through streamlined processes.
- Fostered a high degree of autonomy and cohesion within the Scrum team.
- Ensured compliance with definitions of done at all project levels.
- Established robust testing infrastructures for complex development environments.

Accounting System Integrators • North Haven, CT • 06/2018 – 12/2019

Position: Product Specialist

Main Activities:

- Participated in Scrum activities, including sprint planning and review.
- Monitored risk management procedures and identified recurring issues.
- Managed and led the testing team in planning and executing System/user acceptance tests.
- Implemented end-to-end system integration testing (SIT) and user acceptance testing (UAT).
- Aligned testing activities with agile development methodologies.

Main Results:

- Enhanced the team's responsiveness to frequently identified issues.
- Improved the overall effectiveness of system testing by utilizing agile methodologies.
- Successfully led test execution in complex enterprise environments.
- Increased end-customer satisfaction through improved testing results.
- Developed and fostered a culture of continuous improvement within the testing team.

Tournament One Corp • Stamford, CT • 03/2017 – 5/2018

Position: QA Software Tester

Main Activities:

- Ensure the quality, stability, and playability of game builds before release.
- Identify, log, and communicate software defects across gameplay, UI, graphics, audio, performance, and network features.
- Validate that game features meet design, technical, and user-experience requirements.
- Perform exploratory testing to uncover unexpected or emergent issues.
- Participate in daily stand-ups and sprint meetings.

Main Results:

- Improved overall game stability and reduced crash rates.
- Consistently delivered high-quality, polished game builds for players.
- Early detection of major defects, saving development time and cost.
- Reliable reporting that helps developers reproduce and fix bugs efficiently.
- Successful releases that meet player expectations and reduce post-launch issues.

Rogers Communications • Toronto, ON • 04/2014 – 2/2015

Position: QA Lead

Main Activities:

- Lead and manage the full QA lifecycle for communication platforms, applications, and network-driven systems.
- Ensure the reliability, security, and performance of communication services such as messaging, voice, video, data routing, and API integrations.
- Coordinate QA teams and serve as the primary liaison between QA, engineering, product, and operations.
- Lead bug triage meetings, prioritize defects based on impact to network reliability and customer experience.
- Ensure testing aligns with industry standards, SLAs, and compliance requirements (e.g., FCC, 911 routing, data privacy).

Main Results:

- Increased platform reliability and reduced service interruptions across communication systems.
- Lowered defect leakage into production through improved test coverage and structured triage.
- Enhanced collaboration between QA, engineering, and product teams, resulting in faster problem resolution.
- Improved customer satisfaction through higher call quality, reduced latency, and more stable messaging/video services.
- Delivered consistently high-quality releases, supporting the company's reputation for reliable communication services.

Education:

Bachelor of Science in Computer Information Systems
DeVry University
Graduation: 1988

Master of Divinity in Bible/Biblical Studies
Canada Christian College & School of Graduate Theological Studies
Graduation: 2010
